The supply of renewables and biofuels rises by 7.4%

According to Eurostat data, the total energy supply in Spain in 2021 was 116,767 ktoe, or 5.9% more than the previous year. This supply is somewhat less than the domestic energy consumption, where oil and derivatives contributed 50,272 ktoe, 42.4% of the total.

Spain's dependence on energy (energy imports) rose 1.2 points in 2021, compared to the previous year, reaching 69.1%.

In 2021, the share of energy from renewable sources was of 20.7%, compared to the average of 21.8% in the EU.

Primary and final energy consumption in Spain.
