

15 February 2018

Consumer Price Index (CPI). Base 2016
January 2018

General index

	Monthly variation	Accumulated variation	Annual variation
January	-1.1	-1.1	0.6

Main results

- The **annual variation rate** of the CPI for the month of January stands at **0.6%**, five tenths of a point lower than that registered in the previous month.
- The **annual** rate of **core** inflation remains at **0.8%**.
- The **monthly** variation of the general index is **-1.1%**.
- The **annual** rate of the **Harmonised Index of Consumer Prices (HICP)** stands at **0.7%**, thus decreasing by five tenths of a point as compared with December.

Annual evolution of consumer prices

The annual rate of the general Consumer Price Index (CPI) in January was **0.6%**, five tenths lower than that registered in the previous month.

The groups with the most negative contribution in the decrease of the annual rate were:

- **Housing**, whose variation rate decreased more than three points to **-2.0%**, because *electricity* prices decreased this month, while they rose in January 2017.

It is worth mentioning, although in the opposite direction, the increases in the prices of *gas* and *heating gas oil* this month, which were higher than last year.

- **Food and non-alcoholic beverages**, whose rate stood at **1.3%**, four tenths lower than that of December. Worth noting in this evolution was the stability in the prices of *fresh vegetables*, as compared with the increase registered in 2017.

Another reason for this variation, although to a lesser extent, was the fall in the prices of *fruits* this month, which hardly changed in January last year.

- **Transport**, with an annual variation rate of **1.8%**, one tenth of a point below that of the previous month, due to the fact that *fuels* prices increased this month less than they did in the same month of 2017.

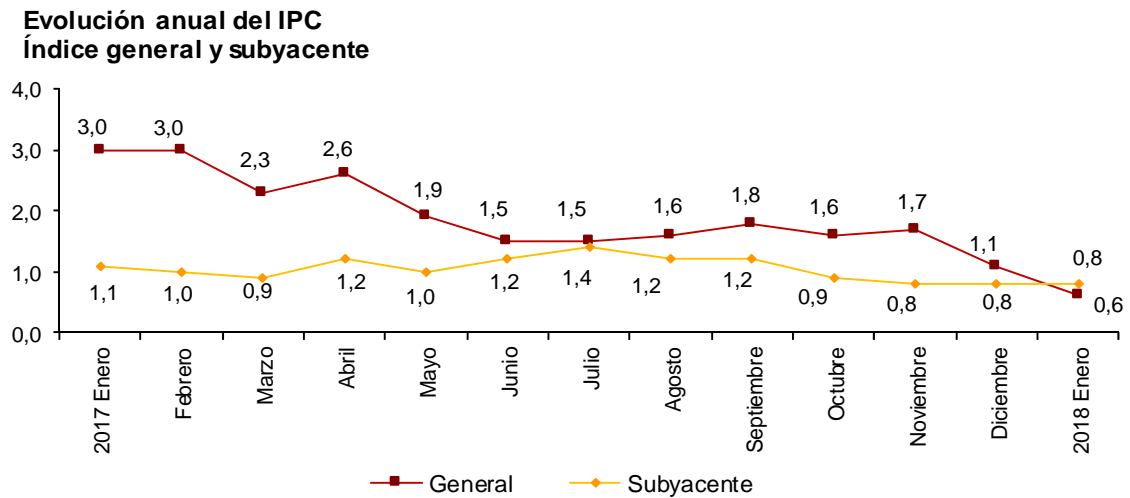

On the other hand, the sector with the greatest positive impact was:

- **Communications**, that registered a variation rate of **0.9%**, seven tenths higher than that of the previous month, mainly due to the increase in the prices of *Telephone and telefax services*, as compared with the decrease registered in 2017.

Influencia de los grupos en la tasa anual del IPC

The annual variation rate of **core inflation** (general index excluding unprocessed food and energy products) remained at **0.8%**, standing two tenths of a point above the general CPI. Core inflation had not been above the general index since November 2016.

Monthly evolution of consumer prices

In January, the monthly variation rate of the general CPI was **-1.1%**.

Among the sectors with a negative contribution in the general index worth noting were:

- **Clothing and footwear**, with a variation rate of **-15.3%**, which includes the effect of the winter sales. Its contribution to the general CPI was **-1.020**.
- **Leisure and culture**, with a variation of **-1.4%** and a contribution of **-0.124**, mainly due to the decrease in the prices of *tourist packages*.
- **Housing**, with a variation rate of **-0.5%** and a contribution of **-0.072**, mainly due to the decrease in the prices of *electricity*.

It is also noteworthy, although in the opposite direction, the increase in the prices of *gas* and *heating gas oil*.

- **Home furnishings**, with a variation rate of **-0.7%** and a contribution of **-0.039**. Worth noting in this evolution was the decrease in the prices of *household textiles*, and, to a lesser extent, of *furniture and accessories*.

In turn, the groups with greater positive contribution to the general index were:

- **Transport**, whose **0.8%** variation rate is explained almost entirely by the increase in the prices of *fuels and lubricants*. The contribution of this group to the general index was **0.120**.
- **Food and non-alcoholic beverages**, with a variation rate of **0.3%** and a contribution of **0.059**, mainly due to the increase in the prices of *fresh fish*.

It is noteworthy, although in the opposite direction, the decrease in the prices of *fresh fruits*.

A more detailed analysis shows the divisions that had the greatest contribution to the monthly rate of the CPI during the month of January.

Divisions with the greatest positive contribution to the monthly rate of the CPI

	Monthly rate (%)	Contribution
Food products		
Fish and seafood	2.7	0.063
Mineral waters, soft drinks, fruit and vegetable juices	1.1	0.010
Other divisions		
Fuels and lubricants for personal vehicles	1.9	0.113
Gas	4.4	0.065
Liquid fuels	7.6	0.038
Catering	0.2	0.026
Telephone and telefax services	0.4	0.015

Divisions with the greatest negative contribution to the monthly rate of the CPI

	Monthly rate (%)	Contribution
Food products		
Fruits	-1.0	-0.019
Other divisions		
Clothes	-16.8	-0.805
Footwear	-11.4	-0.188
Electricity	-5.2	-0.186
Tourist packages	-7.0	-0.117
Accommodation services	-4.0	-0.041
Other clothing and haberdashery articles	-19.2	-0.027
Household textiles	-4.4	-0.023
Other appliances, articles and products for personal care	-0.9	-0.016

Results by Autonomous Community. Annual variation rates

The annual rate of the CPI fell in all Autonomous Communities in January, as compared with December. The greatest decreases were registered in Cantabria and Comunitat Valenciana, with drops of eight and seven tenths, respectively.

On the other hand, Cataluña, Comunidad Foral de Navarra and Canarias were the Autonomous Communities with the lowest annual decreases, with a drop of three tenths.

Tasas anuales del IPC Comunidades y ciudades autónomas

Harmonised Index of Consumer Prices (HICP)

In January, the annual variation rate of the HICP stood at **0,7%**, five tenths below that registered in the previous month.

The monthly variation rate of the HICP was **-1.5%**.

¹ The latest data from the Monetary Union refers to the flash estimate.

Consumer Price Index at Constant Taxes

In January, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **0.6%**, remaining the same as that of the general CPI.

The monthly rate of the CPI-CT was **-1.1%**.

In turn, the HICP at Constant Taxes (HICP-CT) registered an annual rate of **0.7%**, remaining the same as that of the HICP.

The monthly variation rate of the HICP-CT was **-1.5%**.

Informative Annex

Weighting update, CPI base 2016

The National Statistics Institute has carried out the annual update of the weightings used for the calculation of the Consumer Price Index (CPI), in accordance with the CPI System, base 2016.

The CPI, base 2016, is characterised by its dynamism and adaptability to changing consumer behaviour, through the analysis of expenditure developments. With this objective, a detailed study of market changes is carried out every year.

As a result of this study, the CPI weighting structure has been updated in 2018. The information used for this update comes from the Household Budget Survey (HBS) and other sources. In this manner, the CPI reflects changes in consumer habits over the past year.

The changes introduced do not affect the continuity of the CPI series, base 2016, since the formula for calculating the 2016 System consists of linking the indices so that there is no break-up. Therefore, updating weightings does not influence the published variation rates.

The following table shows the weightings used during 2017, and those which will be used during 2018 for the calculation of the general CPI and the groups:

Weightings. General and by group

Group	CPI, base 2016 Weightings, year 2017	CPI, base 2016 Weightings, year 2018
1. Food and non-alcoholic beverages	19.77	19.42
2. Alcoholic beverages and tobacco	3.02	2.98
3. Clothing and footwear	6.73	6.66
4. Housing	13.30	13.38
5. Home furnishings	5.88	5.85
6. Health	3.96	3.95
7. Transport	14.67	14.74
8. Communication	3.60	3.64
9. Leisure and culture	8.52	8.60
10. Education	1.68	1.67
11. Hotels, cafés and restaurants	12.12	12.34
12. Other goods and services	6.75	6.78
