Consumer Price Index (CPI). Base 2016
May 2018

General index

	Monthly variation	Accumulated variation	Annual variation
May	0.9	0.9	2.1

Main results

- The **annual variation** rate of the CPI in May is **2.1%**, one percentage point higher than that registered the previous month.
- The **annual** rate of **core** inflation increases three tenths, up to **1.1%**.
- The **monthly** variation of the general index is **0.9%**.
- The **annual rate** of the **Harmonised Index of Consumer Prices** (HICP) stands at **2.1%**, representing an increase of one percentage point over April.

Annual evolution of consumer prices

The annual rate of the general Consumer Price Index (CPI) in May was **2.1%**, one percentage point higher than the previous month.

The groups with the greatest positive influence in this annual rate increase were:

- **Transport**, with an annual variation rate of **5.1%**, more than three points above that of the previous month. This increase was due to the fact that the prices of *fuels and lubricants* and, to a lesser extent *Passenger air transport*, rose this month, while they fell in May last year.
- **Housing**, whose rate increased by one and a half percentage points and stood at **2.3%**, due to the higher increase in the prices of *electricity*, compared to 2017. Another reason for this variation—though to a lesser extent—was the increase in the prices of *heating gas oil*, which decreased last year.

It is also noteworthy, although in the opposite direction, the decrease in the prices of *gas* this month, as compared with the increase in 2017.

- **Leisure and culture**, with a variation of more than two points to **0.8%**. This behaviour was mainly due to the stability in the prices of *tourist packages*, compared with the decrease recorded in 2017.

• **Food and non-alcoholic beverages**, which presented a variation of **2.0%**, four tenths higher than the previous month. Worth noting in this evolution were the stability in the prices of *fresh vegetables*, compared to the decrease last year, and the increase in the prices of *fresh fruits*, higher than that recorded in 2017.

It should also be noted the negative influence of *meat* prices, which increased less this month than in May last year, and the fall in the prices of *oils and fats*, which increased in 2017.

• **Hotels, cafés and restaurants**, whose rate increased by four tenths of a percentage point to **2.0%**, mainly due to the fact that the prices of *accommodation services* rose this month, while they fell in the same month of the previous year.

In turn, the only group with a negative contribution that stands out was:

• **Communications**, which presented an annual variation of **2.4%**, four tenths lower than the previous month, mostly due to the fact that the prices of *telephone and fax services* increased less this month than in May 2017.

Influencia de los grupos en la tasa anual del IPC

DIFERENCIA TASA ANUAL IPC GENERAL 1,0

The annual variation rate of **core inflation** (general index excluding unprocessed food and energy products) increased by three tenths to **1.1%**, standing one point below that of the general CPI.

Evolución anual del IPC Índice general y subyacente

Monthly evolution of consumer prices

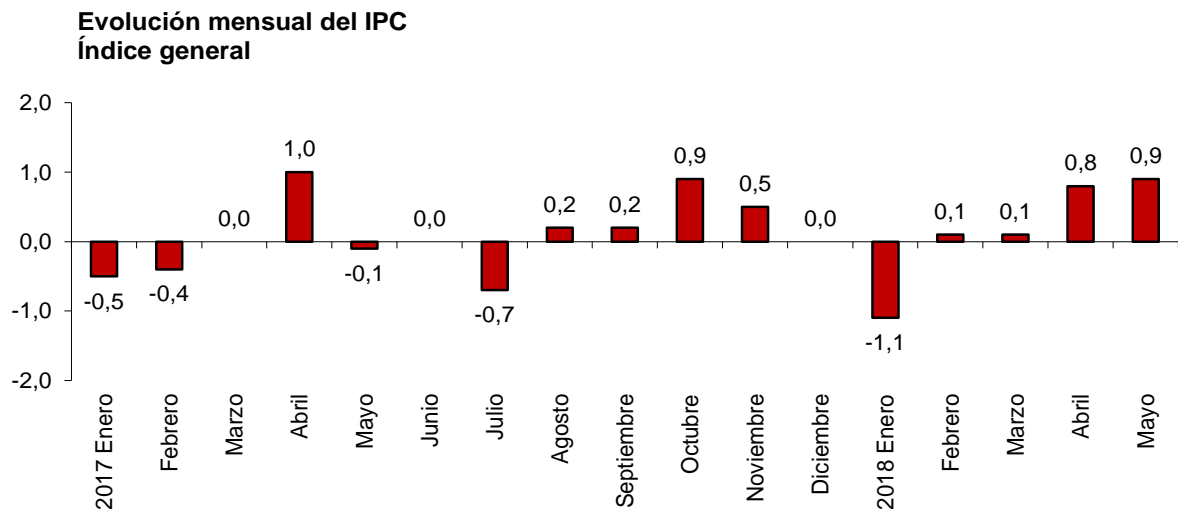

In May, the monthly variation rate of the general CPI was **0.9%**.

The groups with the greatest positive contribution to the general index were:

- **Transport**, whose variation rate of **1.8%**, was almost entirely explained by the increase in the prices of *fuels and lubricants*. Another reason for this variation—though to a lesser extent—was the increase in the prices of *Air transport*. The contribution of this group to the general CPI was **0.274**.
- **Housing**, with a variation of **1.8%** and a contribution of **0.234**, due to the increase in the prices of *electricity* and, to a lesser extent, *heating gas oil*.
- **Clothing and footwear**, with a variation rate of **2.6%**, which reflects the behaviour of prices in the spring-summer season. The contribution of this group to the general CPI was **0.163**.
- **Food and non-alcoholic beverages**, which showed a variation rate of **0.7%** and a contribution of **0.136**. Worth noting in this evolution was the increase in the prices of *fresh fruits*.

It is also worth noting, although in the opposite direction, the fall in the prices of *fish and seafood* and *milk, cheese and eggs*.

- **Hotels, cafés and restaurants**, with a rate of **0.4%** due to the increase in the prices of *accommodation services* and, to a lesser extent *catering*. The contribution of this group to the CPI was **0.056**.

A more detailed analysis shows the divisions that had the greatest contribution to the monthly CPI change during the month of May.

Divisions with the greatest positive contribution to the monthly rate of the CPI

	Monthly rate (%)	Contribution
Food products		
Fruit	8.0	0.149
Bread and cereals	0.4	0.011
Other divisions		
Fuels and lubricants for personal vehicles	4.1	0.249
Electricity	6.4	0.207
Clothes	2.6	0.121
Footwear	2.6	0.041
Accommodation services	3.5	0.038
Liquid fuels	5.2	0.027
Passenger air transport	5.8	0.026
Catering	0.2	0.018

Divisions with the greatest negative contribution to the monthly rate of the CPI

	Monthly rate (%)	Contribution
Food products		
Fish and seafood	-1.0	-0.025
Milk, cheese and eggs	-0.6	-0.014
Other divisions		
Gas	-0.7	-0.010

Results by Autonomous Community. Annual variation rates

The annual rate of the CPI increased in all Autonomous Communities in May, as compared with April. The greatest increases were recorded in Principado de Asturias, Comunidad Foral de Navarra and Castilla–La Mancha, with increases of 1.3, 1.2 and 1.2 points, respectively.

On the other hand, Canarias, Galicia and Extremadura were the Autonomous Communities where the annual rate increased the least, with increases of six, eight and eight tenths, respectively.

Tasas anuales del IPC Comunidades y ciudades autónomas

Harmonised Index of Consumer Prices (HICP)

In May, the annual variation rate of the HICP stood at **2.1%**, one percentage point above that registered in the previous month.

The monthly variation of the HICP was **0.9%**.

¹ The latest data from the Monetary Union refers to the flash estimate

Consumer Price Index at Constant Taxes

In May, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **2.1%**, remaining the same as that of the general CPI.

The monthly variation rate of the CPI-CT was **0.9%**.

In turn, the HICP at Constant Taxes (HICP-CT) registered an annual variation of **2.1%**, the same as that of the HICP.

The monthly variation rate of the HICP-CT was **0.9%**.
