

Press Release

13 July 2011

### Consumer Price Index (CPI). Base 2006 June 2011

### Overall index

	Monthly change	Change over last December	Annual change	
June	-0.1	1.2	2	3.2

#### Main results

- The **annual change** of the CPI for the month of June decreases three tenths and stands at **3.2%**.

- The **annual** change of **core** inflation is **1.7%**, four tenths lower than that registered in May.

- The **monthly change** of the overall index is **-0.1%**.

– The **Harmonised Index of Consumer Prices** (HICP) **annual change** stands at **3.0%**, four tenths less than the previous month.

#### Annual evolution of consumer prices

The annual change for the overall Consumer Price Index (CPI) in June was **3.2%**, three tenths lower than that registered in May. This change was the same as that anticipated by the CPI flash estimate, published last 30 June.

The groups which most contributed to this decrease were:

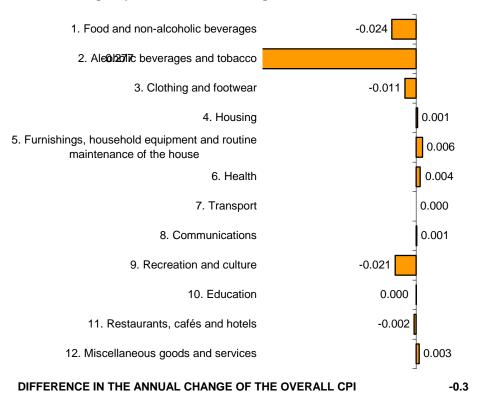

• Alcoholic beverages and tobacco, whose annual change decreased more than 10 points, and stood at **4.0%**, due to the decrease in prices of *tobacco*, compared to the increase registered one year ago.

• **Food and non-alcoholic beverages**, with an annual change of **2.4%**, one tenth lower than for last month. This change was largely explained by the decrease in prices of *fresh potatoes and potatoes preparations, fresh fruit* and *fresh vegetables*, as compared with the increase experienced in June 2010.

• **Recreation and culture**, with an annual change of **-0.8%**, two tenths lower than that registered in May. This change was largely explained by the decrease in prices of *cultural services*.

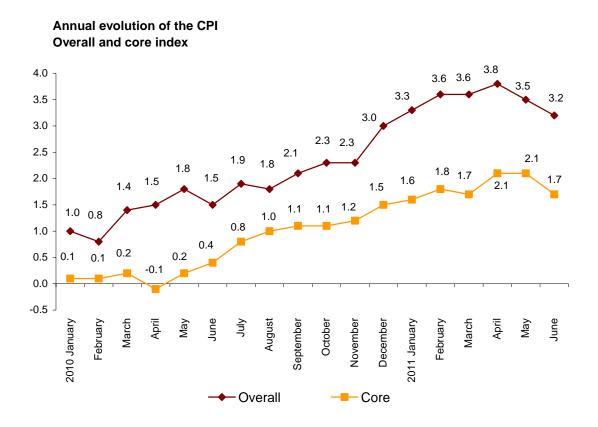

• *Clothing and footwear*, with an annual change of **0.4%**, thus decreasing one tenth, as compared with the previous month.

#### Contribution of the groups to the annual change of the CPI

The annual change of **core inflation** (overall index excluding energy and unprocessed food) decreased four tenths to **1.7%**, and its difference from the overall index change stood at less than one-and-a-half points.

# Press Reliand • Instituto Nacional de Estadística

#### Monthly evolution of consumer prices

In June, the monthly change of the overall CPI was -0.1%.

The groups with the greatest positive monthly contribution to the overall index were the following:

• **Restaurants, cafés and hotels**, with a monthly change of **0.3%**, contributed **0.033** to the overall index, due to the increase in prices of *accommodation services* and *restaurants, cafés and the like*.

• **Recreation and culture**, whose monthly change of **0.4%** contributed **0.027** to the overall index, and was largely due to the increase in prices of *package holidays*. Conversely, worth noting in this group was the decrease in prices of *cultural services*.

• *Miscellaneous goods and services*, with a change of **0.2%**, which contributed **0.021** to the overall CPI in June. This change was largely explained by the increase in prices of *insurance*.

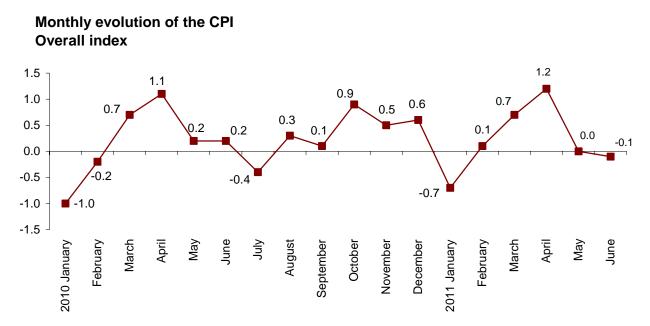

Likewise, the groups with the greatest negative monthly contribution in the month of June were the following:

• Alcoholic beverages and tobacco, with a monthly change of -4.7%, due to the decrease in prices of tobacco. This was the greatest drop in prices for this group since the beginning of this publication in 1993. Its contribution to the overall CPI was -0.137.

• *Clothing and footwear*, with a monthly change of **-0.8%**, covering the effects of the drops in prices prior to the summer sales campaign. Its contribution to the overall CPI was **-0.065**.

• **Transport**, with a monthly change of **–0.3%** and a contribution of **–0.039**. This change was explained by the decrease in prices of *fuels and lubricants for personal transport equipment*.

#### **Results by Autonomous Community. Annual changes**

All Autonomous Communities experienced a decrease of at least two tenths in their annual change, as compared with last month. The greatest decrease was five tenths, in Región de Murcia (3.0%).

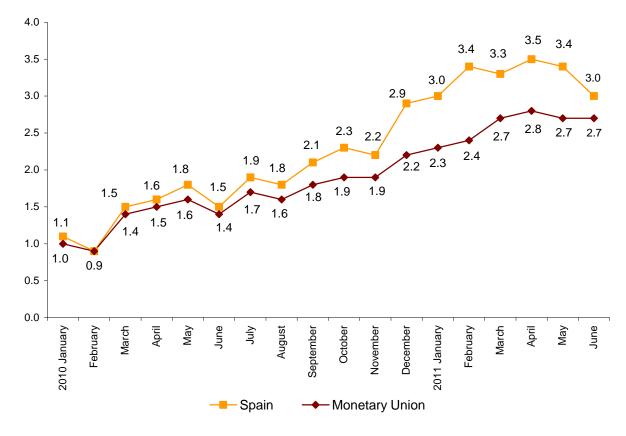

### Harmonised Index of Consumer Prices (HICP)

In June, the annual change of the HICP decreased four tenths, standing at 3.0%. This change coincided with that anticipated by the HICP flash estimate, published last 30 June.

The monthly change of the HICP was -0.2%.

## Annual evolution of the HICP<sup>1</sup>, base 2005 Overall index for Spain and the Monetary Union<sup>2</sup>

<sup>1</sup> The data for the year 2010 does not include changes in the treatment of seasonal items

<sup>2</sup> The latest data from the Monetary Union refers to the flash estimate

In turn, the Harmonised Index of Consumer Prices at Constant Taxes (HICP-CT) registered an annual change of 2.2% in May 2011, more than one point below that recorded by the HICP in said month (3.4%). The difference between the two indicators remained the same, with regard to the difference registered in April.

The monthly change of the HICP-CT was -0.1%.

#### Informative annex

## New methodological treatment of the HICP

The Harmonised Index of Consumer Prices (HICP) is an indicator whose objective is to measure the evolution of consumer prices, using the harmonised methodology of the European Union. Its importance therefore lies in the high degree of comparability between EU countries, which increases as the harmonisation process begun in the year 1995 advances.

The new treatment that is applied in the HICP, in order to take a step further in this process, refers to the methodology used for seasonal items. Its main characteristics are contained in an EU Regulation<sup>1</sup> that makes its application compulsory in all countries.

#### Characteristics of the new methodology

The Regulation considers seasonal items to be those that are no longer available for sale during certain periods of the year, and this situation repeats itself cyclically. The Spanish HICP considers *fresh fruit*, *fresh vegetables* and *clothing and footwear* to be seasonal items.

The methodology that the EU Regulation proposes is based on the estimate of the price in the months in which the seasonal product is not found on the market. This estimate is carried out using the evolution of the prices of those products, in the same category, that are found on the market.

The new methodology implies a significant change, with regard to that which had been applied previously, and therefore, the implementation of the Regulation as of January 2011 has caused a break in the HICP series. For this reason, the data published for this indicator in 2010 has been revised, applying this new methodology, pursuant to the advice of European regulations, and the annual changes published in 2011 are calculated with this revised data. This information available INE is on the website (http://www.ine.es/en/welcome en.htm).

#### Change in the consumption classification

As of January 2011, in order to adapt the classification of HICP products to the international consumption classification, COICOP/HICP, *Real rents of other dwellings*, which were previously located in division *11.2. Accommodation services*, pass on to form part of division *04.1. Gross housing rents*.

The revised series for the year 2010 incorporates this change in classification, in order for annual changes not to be affected.

<sup>&</sup>lt;sup>1</sup> Commission Regulation (EC) no. 330/2009, of 22 April 2009, establishing the detailed norms for the implementation of Council Regulation (EC) no. 2494/95 regarding the minimum norms for the treatment of seasonal products in the HICP.
