Annual evolution of consumer prices

The annual change of the overall Consumer Price Index (CPI) in July was 1.9%, four tenths higher than that registered in June.

The groups which most contributed to this increase were:

- **Transport**, with an annual change standing at **6.2%**, almost one point more than that registered in June. This increase was explained by the prices of *motor cars* increasing this month, as compared with the decrease registered in July of last year.
- **Housing**, whose annual change increased one point, standing at **4.3%**. This behaviour was explained by the increase in the price of *gas*, as compared with the decrease experienced in July of last year.

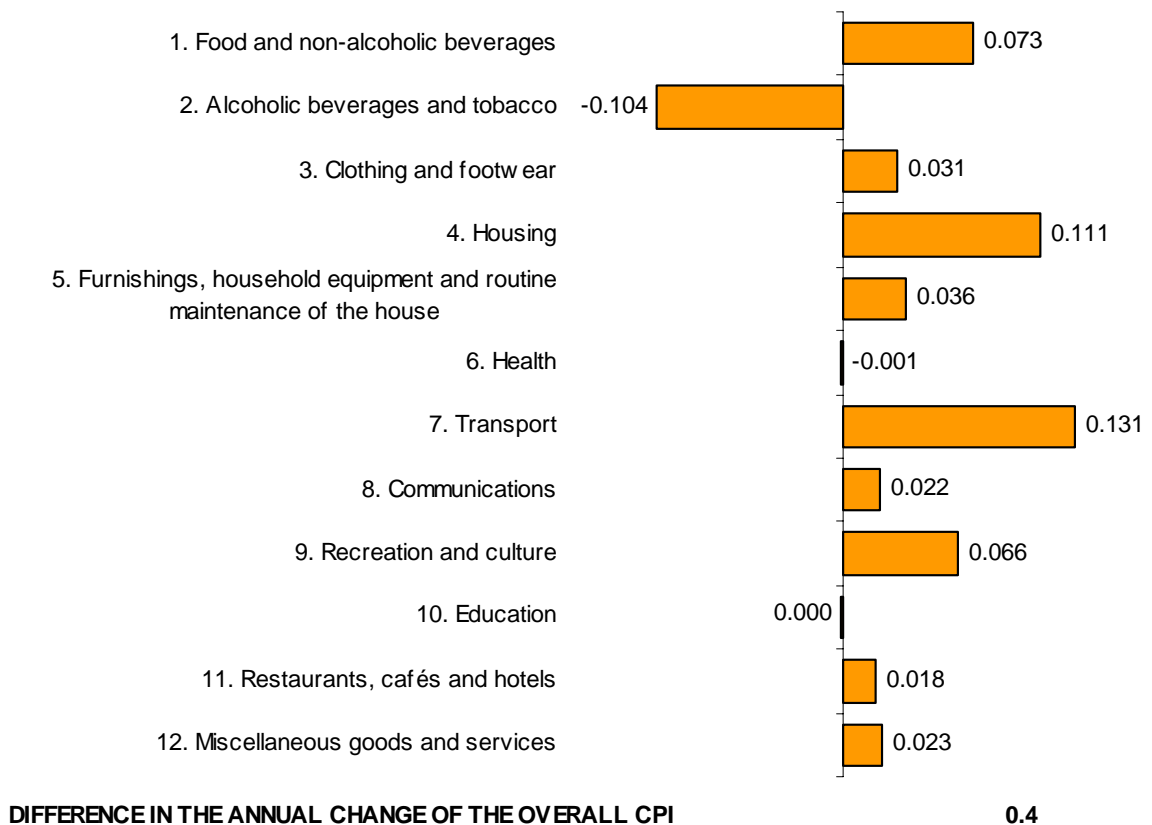

➤ **Food and non-alcoholic beverages**, whose annual change reached **-0.3%**, four tenths higher than that registered the previous month. The divisions that were most noteworthy due to their contribution to this change were *fresh fruit, milk, fresh potatoes and potatoes preparations* and *fresh vegetables*.

➤ **Recreation and culture**, with an annual change standing at **-0.7%**, eight tenths higher than that registered in June. The rise was due to the increase in the prices of *package holidays*, which was greater than in 2009.

Despite the increase in the annual change of the overall index, worth noting was the decrease in the change of the following group:

➤ **Alcoholic beverages and tobacco**, whose annual change reached **8.7%**, more than four tenths lower than that registered the previous month. This decrease was due to the rise in prices of *tobacco* being less this year than last year.

Amongst the groups with the greatest positive contribution to the overall index were the following:
