Main results

- The **annual change** of the CPI for the month of August stands at **1.5%**, three tenths below that the one registered the previous month.
- The **annual** change of **core** inflation decreases one tenth and stands at **1.6%**.
- The **monthly change** of the overall index is **0.3%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **1.6%**, thus it decreases three tenths, as compared with July.

Annual evolution of consumer prices

The annual change for the overall Consumer Price Index (CPI) in August was **1.5%**, three tenths below that registered in the previous month.

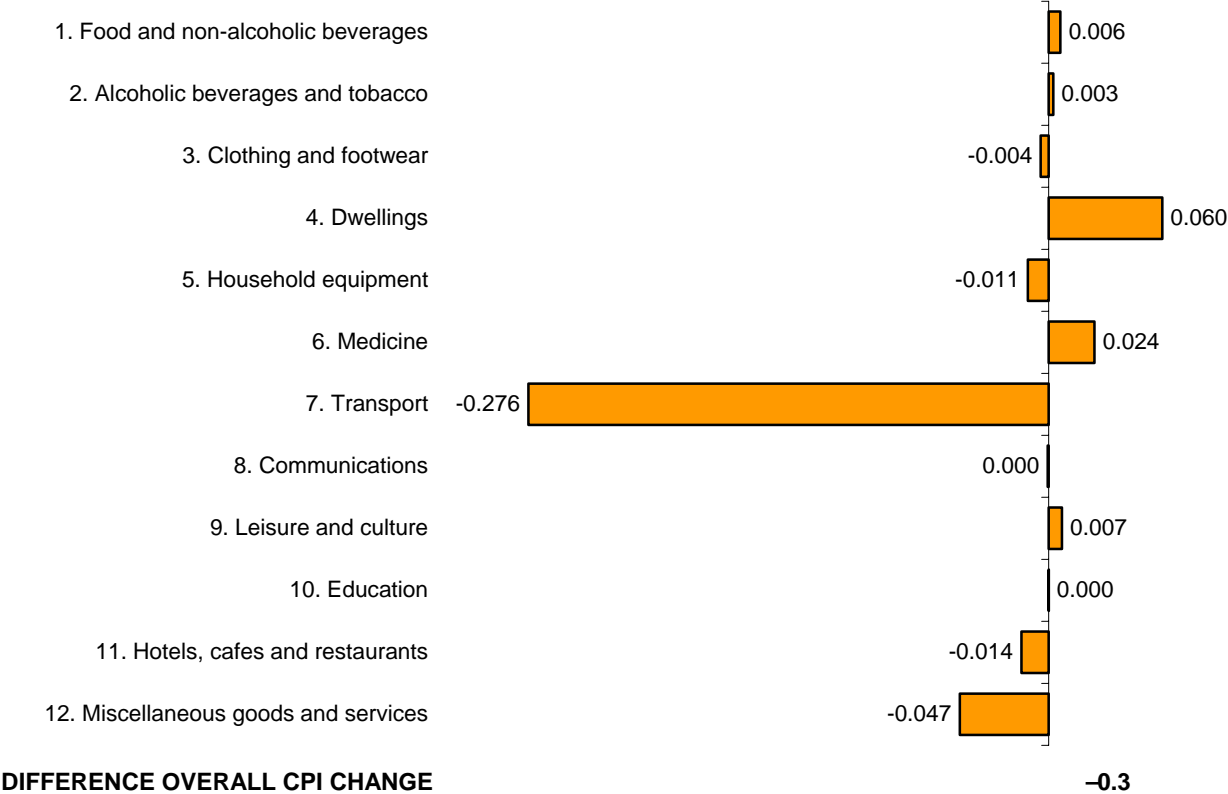

The groups that most contributed in this variation were:

- **Transport**, with an annual change of **-0.4%**, almost two points below that the one registered during the previous month. This decrease was due mostly to a lower increase this month in the prices of *Fuels and lubricants* as compared with 2012.
- **Miscellaneous goods and services**, whose rate decreased five tenths, standing at **2.2%**, since prices in *other services* remained unchanged in August and increased last year.

In spite of the decrease of the annual change of the CPI, it is worth noting the increase in the following group:

• **Dwellings**, which registered an annual change of **-0.3%**, four tenths higher than that of the previous month, due to the increase in the prices of *electricity*. It is also worth noting the stability in the prices of *gas for heating* as compared with the increase registered during August of last year.

Influence of the groups on the annual CPI change

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) decreased one tenth and stood at **1.6%**, standing one-tenth over the overall CPI change.
