

11 October 2017

Consumer Price Index (CPI). Base 2016
September 2017

Overall index

	Monthly variation	Accumulated variation	Annual variation
September	0.2	-0.3	1.8

Main results

- The **annual variation** of the CPI for the month of September stands at **1.8%**, two tenths higher than that registered in the previous month.
- The **annual** rate of **core** inflation remains at **1.2%**.
- The **monthly** variation in the overall index is **0.2%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **1.8%**, thus decreasing two tenths as compared with August.

Annual evolution of consumer prices

The annual rate for the overall Consumer Price Index (CPI) in September was **1.8%**, two tenths higher than that registered in the previous month.

The groups with the greatest positive influence in this annual rate increase were:

- **Food and non-alcoholic beverages**, with a rate of **1.2%**, more than one point above that of August, caused by the increase in fruit prices, which fell in September of last year.

This was also influenced, although to a lesser extent, by the increase in the price of *fresh vegetables*, against the stability reflected in 2016.

- **Leisure and culture**, which increases its annual change by over one point to **1.8%**, essentially due to the fact that the decrease in the price of tourist packages this month is lower than that registered last year.

In turn, the group with a negative contribution that stands out is:

• **Dwellings**, the rate of which decreases by four tenths, to **2.9%**, due to the fact that the prices for *electricity* and *gas for heating* fell less this month than in September last year, and that the prices of *gas* fell this month, while they increased in 2016.

Contribution of the groups to the annual change of the CPI

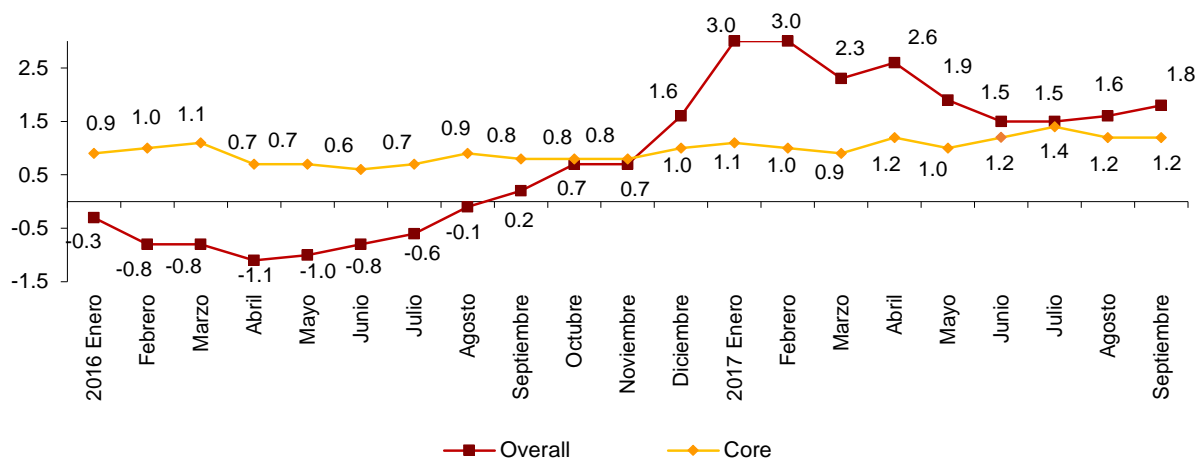

DIFFERENCE IN THE ANNUAL CHANGE OF THE OVERALL CPI

0.2

The annual change for *core inflation* (overall index excluding unprocessed food and energy products) remained at **1.2%**, standing six tenths below the overall CPI rate.

**Annual evolution of the CPI
Overall and core**

Monthly evolution of consumer prices

In September, the monthly variation rate of the overall CPI was **0.2%**.

Among the groups with positive contribution to the overall index, worth noting were:

- **Clothing and footwear**, with a rate of **5.3%**, which reflects the behaviour of prices after the end of the sales period and the start of the winter season. The contribution of this group to the overall CPI was **0.297**.
- **Transport**, which registered a variation rate of **0.6%** and a contribution of **0.091**, mainly due to the increase in the prices of *fuels*.

Although in the opposite direction, the fall in *passenger air transport* prices should also be noted.

- Food and non-alcoholic beverages, whose rate of **0.3%** contributes **0.053** due to the increase in the prices of *fresh vegetables* and *fruits*.

In turn, the groups with a negative contribution to the overall index were:

- **Leisure and culture**, whose rate of **-3.1%**, contributing **-0.273**, is mainly due to the decrease in the prices of *tourist packages*, which is normal after the holiday season.
- **Hotels, cafés and restaurants**, with a change of **-0.2%**, and a contribution of **-0.028**, due to the decrease in the prices for accommodation services.

Also noteworthy in this group, although in the opposite direction, is the drop in the prices for *catering*.

Monthly evolution of the CPI
Overall index

A more detailed analysis showed the divisions that had the greatest contribution to the monthly CPI change during the month of September.

Divisions with the greatest positive contribution to the monthly change of the CPI

	Monthly rate (%)	Repercussion
Food products		
Fresh vegetables	2.8	0.051
Fruit	1.9	0.035
Other divisions		
Clothes	5.6	0.225
Fuels and lubricants for personal vehicles	1.8	0.099
Footwear	4.0	0.058
Catering	0.1	0.014
Other clothing and haberdashery articles	11.9	0.013
Books	1.8	0.011
Electricity	0.3	0.011

Activities with the greatest negative contribution to the monthly rate of the CPI

	Monthly rate (%)	Repercussion
Food products		
Bread and Cereals	-0.4	-0.011
Other divisions		
Tourist packages	-14.5	-0.270
Accommodation services	-3.7	-0.044
Passenger air transport	-3.1	-0.016

Results by Autonomous Communities Annual variation rates

The annual CPI rate increases in 12 Autonomous Communities in September compared to August, and remains the same in the other five. The greatest increases are seen in the Comunidad de Madrid, whose rate increased by four tenths, and in Andalucía and Comunitat Valenciana, with an increase of three tenths each.

Principado de Asturias, Canarias, Cantabria, Castilla y León and Galicia are the communities that maintain their rate compared to the previous month.

Annual CPI rates Autonomous cities and Communities

Harmonised Index of Consumer Prices (HICP)

In September, the annual variation rate of the HICP stood at **1.8%**, two tenths below that registered in the previous month.

The monthly change of the HICP was **0.6%**.

¹ The latest data from the Monetary Union refers to the flash estimate

Consumer Price Index at Constant Taxes

In September, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **1.8%**, remaining the same as that of the overall index.

The monthly change of the CPI-CT was **0.2%**.

In turn, the annual rate of HICP-CT registered an annual change of **1.8%**, remaining the same as that of the HICP.

The monthly variation rate of the CPI-CT was **0.6%**.
