Main results

- The **annual change** of the CPI for the month of November stands at **0.2%**, three tenths over that registered in the previous month.
- The **annual** change of **core** inflation increases two tenths and stands at **0.4%**.
- The **monthly change** of the overall index is **0.2%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **0.3%**, thus it increases three tenths, as compared with October.

Annual evolution of consumer prices

The annual change for the overall Consumer Price Index (CPI) in November was **0.2%**, three tenths over that registered in the previous month.

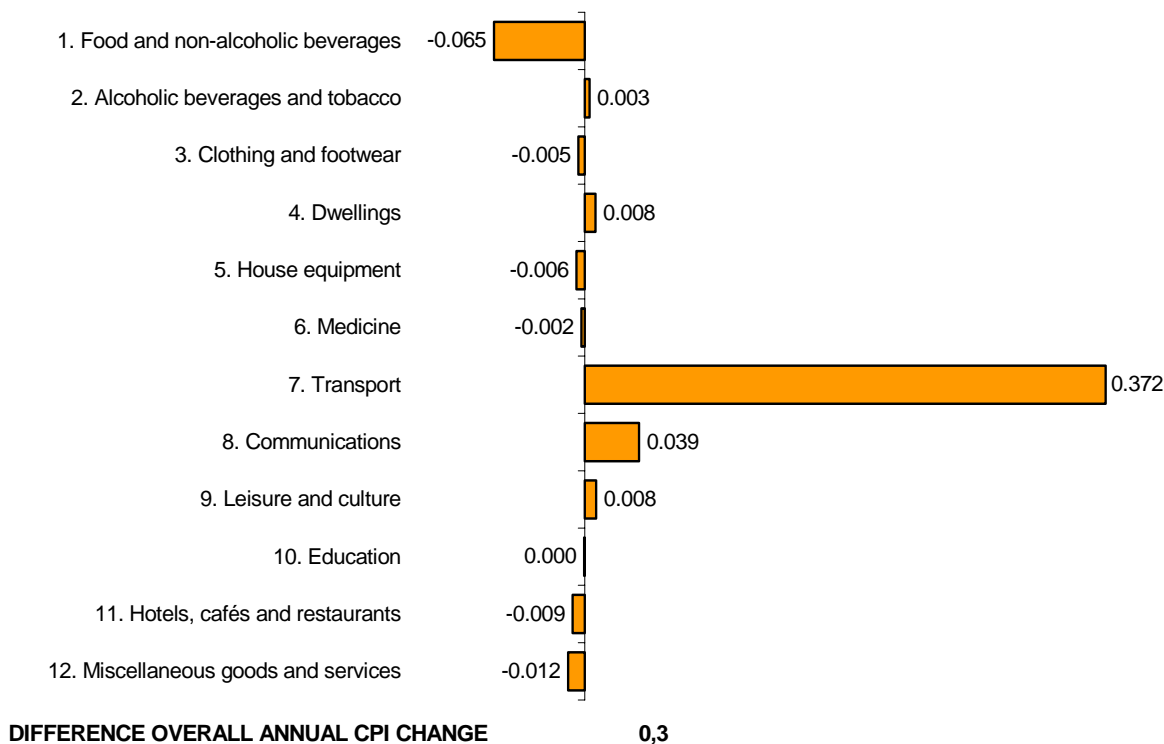

The groups that most contributed to this variation were:

- **Transport**, with an annual variation of **0.3%**, more than two points over that registered during the previous month. This behaviour is mainly due to the decrease in the prices of *fuels and lubricants* this month, which is lower than the decrease registered in the same month of 2012, and the stability in the prices of *Motor cars*, as compared with the decrease registered in the previous year.
- **Communications** whose variation increased one point, reaching **–6.5%**, due to the stability in the prices of *telephone services* this month, that registered a decrease in the same month of the previous year.

Despite the increase in the annual change for the overall CPI, it is worth noting the decrease in the change of the group:

• **Food and alcoholic beverages**, whose variation decreased four tenths, standing at **1.2%**. Worth noting in this variation are the decreases in the prices of *edible oils, fresh fruit, fresh potatoes and potatoes preparations and poultry meat*, as compared with the increases registered in 2012. In turn, it is worth noting the increase in the price of *fresh fish*, greater than that registered in the previous year.

Influence of the groups on the annual CPI change

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) increased two tenths and stood at **0.4%**, two tenths over the overall CPI change.

Annual evolution of the CPI Overall and core index

Monthly evolution of consumer prices

In November, the monthly change of the overall CPI was **0.2%**.

Among the groups with the greatest positive contribution to the overall index, it is worth highlighting:

- **Clothing and footwear**, with a monthly rate of **5.0%**, reflected the last effects of the new winter season. Its contribution to the overall CPI was **0.395**.

- **Food and non-alcoholic beverages**, with a monthly variation of **0.1%**, and a contribution of **0.025**. Worth noting in this behaviour were the increases in the prices of *fresh fish* and *fresh vegetables*.

In turn, among the groups with a negative contribution to the general index it is worth noting:

- **Leisure and culture**, whose variation of **-1.2%**, with a contribution of **-0.090**, was mainly explained by the decrease in the prices of *package holidays*.

- **Transport**, with a monthly change of **-0.5%** and a contribution of **-0.073**, mainly due to the decrease in the prices of *fuels*.

- **Restaurants, cafés and hotels**, with a monthly variation of **-0.5%**, and a contribution of **-0.052**, reflecting the decrease in the prices of *hotels and other accommodations*.
