Main results

- The **annual change** of the CPI for the month of December stands at **0.3%**, one tenth over that registered in the previous month.
- The **annual** change of **core** inflation decreases two tenths and stands at **0.2%**.
- The **monthly change** of the overall index is **0.1%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **0.3%**, thus it remains the same, as compared with November.

Annual evolution of consumer prices

The annual rate for the overall Consumer Price Index (CPI) in December was **0.3%**, one tenth higher than that registered in the previous month. This is the lowest rate registered in the CPI for the month of December since the series started in 1961.

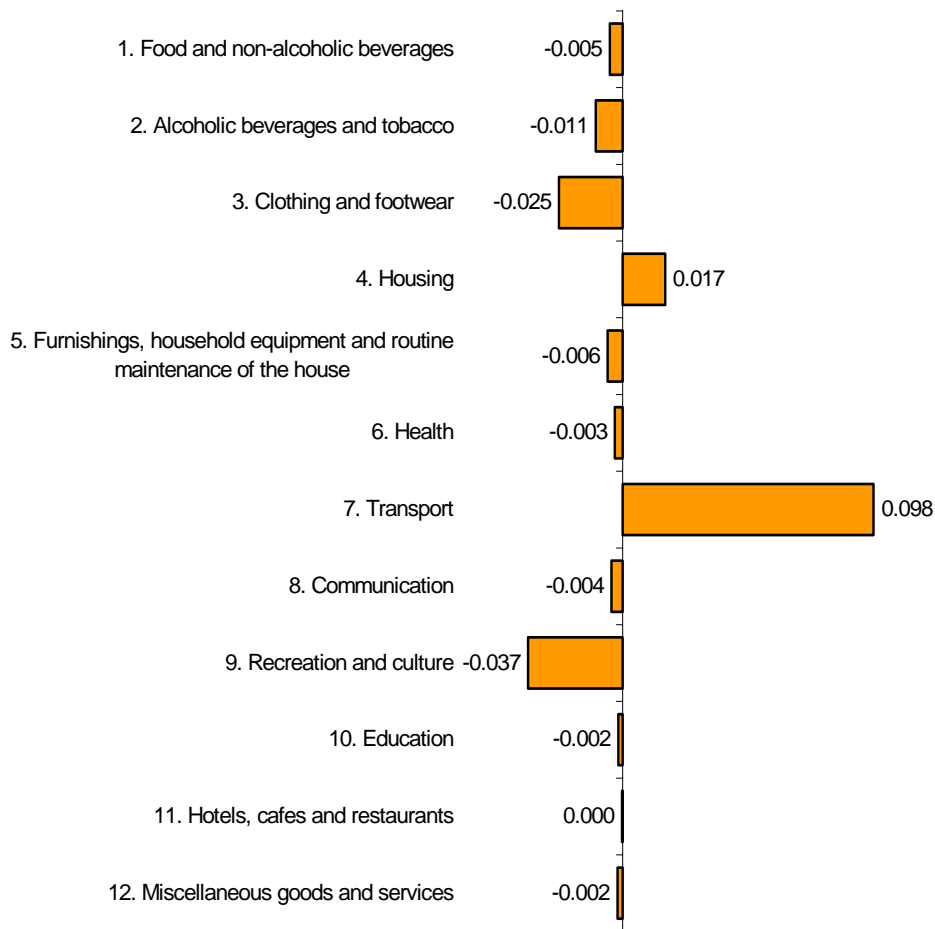

The groups that most contributed to this variation were:

- **Transport**, with an annual variation of **1.0%**, seven tenths higher than that registered the previous month. This behaviour is mainly due to the increase in the prices of *fuels and lubricants* this month, as compared with the decrease registered in 2012.
- **Dwellings**, whose variation increased one tenth, reaching **0.0%**, due to the increase in the prices of *heating fuels*, which registered a decrease in December 2012.

Despite the increase in the annual change for the overall CPI, it is worth noting the decrease in the change of the groups:

- **Recreation and culture**, with an annual change of **-1.2%**, five tenths lower than that registered the last month. This behaviour was due to the lower increase in the prices of *package holidays*, as compared with 2012.
- **Clothing and footwear**, with a monthly change of **0.0%**, three tenths lower than that registered in November, due to a greater intensity in the drop of prices of all its components, as compared with 2012
