

24 October 2013

Economically Active Population Survey (EAPS)

Third quarter of 2013

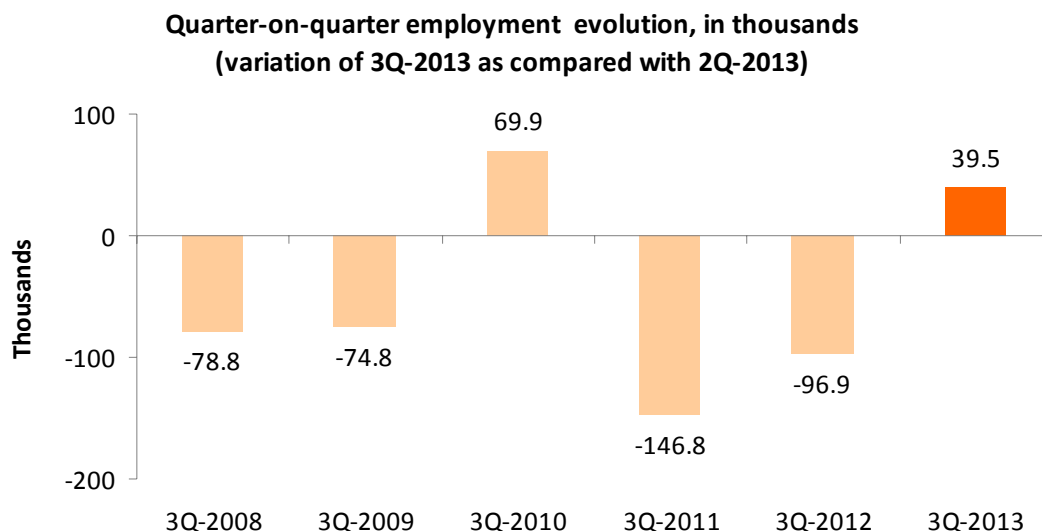

Main results

- Employment in the third quarter of 2013 registers an increase of 39,500 persons, reaching a total of 16,823,200 employed persons. The quarterly employment variation rate stands at 0.24% and the annual rate stands at -2.87%. Employment increases by 52,000 employed persons in the private employment and it decreases by 12,600 in the public employment.
- The number of self-employed workers increases by 15,200 and that of wage earners by 23,200. The number of employers increases by 20,300. The total number of wage earners with a permanent contract decreases by 146,300, and that of wage earners with a temporary contract increase by 169,500.
- Employment increases in *Services* (123,900 more). In turn, it decreases in *Agriculture* (55,000 less), in *Industry* (19,700) and in *Construction* (9,700).
- The Autonomous Communities with the greatest increases in employment, as compared with the previous quarter, are: Cataluña (52,300 more employed persons), Illes Balears (23,900) and Aragón (11,600). The greatest decreases are registered in Andalucía (52,300 less), Comunidad de Madrid (43,800) and País Vasco (17,700).
- Illes Balears registers the greatest increase in the interannual variation rate for employment (1.58%). In turn, the greatest decreases are registered in Comunidad de Madrid (-5.45%), Comunidad Foral de Navarra (-5.30%) and Cantabria (-5.18%).
- The number of unemployed persons decreases by 72,800 and reaches the figure of 5,904,700. The unemployment rate decreases 28 hundredths, standing at 25.98%.
- The greatest decreases in unemployment, as compared with the previous quarter, affect Cataluña (32,500 less unemployed persons), Illes Balears (25,100) and Comunitat Valenciana (22,600). The greatest increases are registered in Canarias (22,000 more unemployed persons) and Comunidad de Madrid (10,900).
- The number of economically active persons decreases by 33,300, indicating a total of 22,728,000 active persons and an activity rate of 59.59%.
- The greatest increase in the number of economically active persons is registered in Cataluña (19,700 more) and Canarias (17,900). The greatest decrease is registered in Andalucía (45,400 less employed persons), Comunidad de Madrid (32,900) and País Vasco (16,600).

Employment

The number of employed persons increased by 39,500 persons in the third quarter of 2013, standing at 16,823,200. The quarterly variation rate of employment stood at 0.24%.

It was the first time that we observed a quarterly increase of the employment in the third quarter since 2010.

The increase in employment was registered among both men (24,700 more) and women (14,800). By nationality, employment increased by 99,500 among the Spaniards, whereas it decreased by 60,000 among foreign nationals.

The increase in employment was registered, essentially, among the younger age group, below 29 years old (99,000 more employed persons). The employment also increased among the group aged over 55 years old (25,600 more). In turn, the number of employed persons decreased by 54,300 among the group aged 30 to 34 years old.

In the last 12 months, employment has dropped by 497,100 persons, (299,300 men and 197,800 women). The annual variation rate of employment was -2.87%, 77 hundredths higher, as compared with the previous quarter.

This quarter, the number of employed persons increased in *Services* by 123,900. In turn, it decreased in *Agriculture* by 55,000, in *Industry* by 19,700 and in *Construction* by 9,700.

Full-time employment increased by 207,700 persons this quarter, whilst part-time employed persons decreased by 168,200. The percentage of persons working part time decreased more than one point, reaching 15.37%.

The total number of self-employed workers increased by 15,200 persons the third quarter of 2013. Employers increased by 20,300, whereas family assistance decreased by 14,700.

The number of wage earners increased by 23,200. Those with a permanent contract decreased by 146,300, and those with a temporary contract increased by 169,500. The temporary employment rate increased more than one point, reaching 24.31%.

The number of wage earners dropped by 485,500 over the last 12 months and the number of self-employed workers did so 12,800.

Private employment¹ increased by 52,000 persons this quarter, and stood at 13,992,600. This increase between the third and second quarter of the year was the first increase registered since 2007. In turn, public employment registered a decrease of 12,600 persons.

Quarter-on-quarter employment evolution by nature of the employer, in thousands (variation of 3Q-2013, as compared with 2Q-2013)

Both public and private employment showed negative annual variations. Public employment registered a -5.38% rate, while employment decreased at a rate of 2.34% in the private sector.

¹ Employment in the private sector includes: wage earners from the private sector, employers, independent workers and businesspersons without wage earners, members of a cooperative, family assistance and other professional situations. Employment in the public sector includes all the wage earners of public enterprises and of the National and Regional Administrations, including both workers contributing to the SS and those attached to an Insurance society.

Employment evolution by nature of the employer, as an annual rate

Unemployment and unemployment rate

Unemployment decreased by 72,800 persons this quarter, standing at 5,904,700. Over the last year, the total figure of unemployed persons increased by 126,700 persons.

Comparing the evolution of unemployment this quarter to the same period in previous five years, it is worth noting that the quarterly decrease of unemployment was the highest of this period. Regarding the EAPS historical series, this is the highest unemployment decrease in the third quarter since 2005.

Quarter-on-quarter unemployment evolution, in thousands (variation of 3Q-2013, as compared with 2Q-2013)

The unemployment rate decreases 28 hundredths, as compared with the second quarter, standing at 25.98%.

By sex, unemployment decreased by 68,700 among women and by 4,100 among men. The women unemployment rate decreased more than a half point, reaching 26.55%, whilst the men rate decreased eight hundredths, and stood at 25.50%. The composition of unemployment observed since the year 2008 remained practically unaltered, with relatively little distance between the male and female rates, and a greater number of unemployed men than unemployed women.

By nationality, unemployment decreased by 94,200 among the Spaniards and increased by 21,400 among the foreign nationals. The unemployment rate for the foreign population was 36.82%, more than 12 points higher than that of persons with Spanish nationality (24.20%).

Unemployment decreased in *Services* (117,500 fewer unemployed persons), *Construction* (28,600) and *Industry* (28,400). In turn, it increased in *Agriculture* by 16,100 persons. Unemployment increased among those persons seeking their first job by 84,300. In turn, the number of unemployed persons who lost their job over a year ago remained practically unaltered.

The number of unemployed persons decreased in *Services* (89,000 less), in *Construction* (83,000) in *Industry* (57,400) and in *Agriculture* (10,200) in the last 12 months. In turn, the number of unemployed persons who lost their job over a year ago increased by 322,800 and by 43,500 among those persons seeking their first job.

Regarding the annual evolution, the rate of increase in unemployment (2.19%) was less than half the rate recorded the previous quarter.

Total evolution of unemployed persons, as an annual rate

Economically active population and activity rate

The economically active population experienced a decrease of 33,300 persons in the third quarter of 2013, standing at 22,728,000 persons. In annual terms the number of economically active persons was reduced by 370,400.

The decrease in the number of economically active persons in the third quarter of 2013 highlighted the downward trend observed since 2008.

Quarter-on-quarter activity evolution, in thousands
(variation of 3Q-2013, as compared with 2Q-2013)

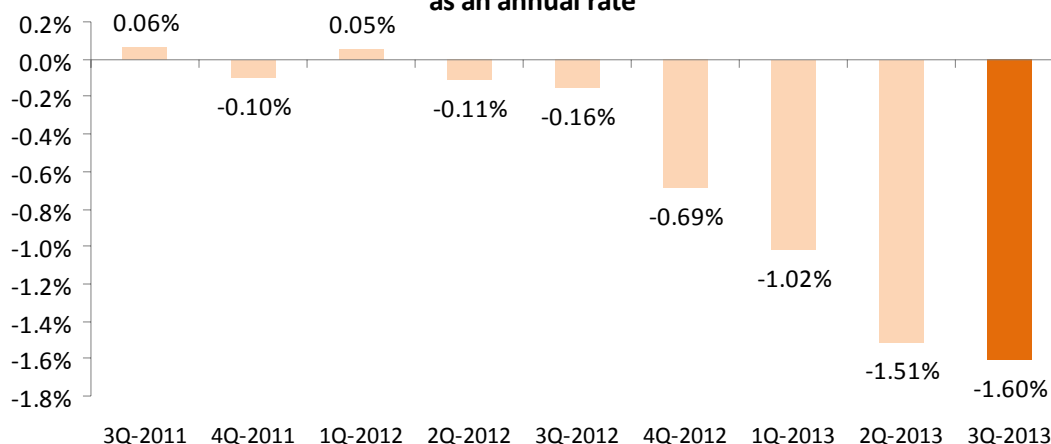

The economic activity rate increased five hundredths, reaching 59.59%. The female activity rate decreased 19 hundredths (53.13%), while the male rate increased 31 hundredths and stood at 66.42%.

The activity rate of Spaniards increased four hundredths this quarter, reaching 57.75%. That of foreign nationals increased three tenths, standing at 73.98%. The distance between both rates is more than 16 points in favour of foreign nationals, this circumstance being explained mainly by the different age structures of the two population groups.

The annual variation rate of economically active persons this quarter stood at -1.60%, slightly below that registered the previous quarter.

Total evolution of economically active persons ,
as an annual rate

Mobility as related to economic activity

The percentage of employed persons who were unemployed in the previous quarter was now 5.71%, which was 34 hundredths more than that recorded in the second quarter of 2013.

The proportion of unemployed persons who were employed three months ago increased by 2.2 points, reaching 13.18%. The percentage of unemployed persons who were already

unemployed three months ago decreased 4.26 points, standing at 69.96%. The percentage of unemployed persons who were economically inactive three months ago increased more than two points, reaching 16.86%.

Households

In the third quarter, there were 17,391,900 households in Spain, experiencing a decrease of 48,800, as compared with the second quarter 2012.

The number of households in which all economically active members were unemployed, decreased by 13,400, standing at 1,807,700.

The number of households in which all of the economically active members were employed increased by 26,700, reaching 8,293,100.

In an interannual comparison, the number of households in which all economically active persons were unemployed increased by 69,800, and the number of those in which all economically active members were employed decreased by 228,500.

Results by Autonomous Community

Most part of the Autonomous Communities registered increases in employment this quarter. Those registering the greatest increases were Cataluña (52,300 more employed persons), Illes Balears (23,900) and Aragón (11,600). In turn, the greatest decreases were registered in Andalucía (52,300 less), Comunidad de Madrid (43,800) and País Vasco (17,700).

In relative terms, the Autonomous Communities with a favourable quarterly employment evolution were Cantabria (5.21% more), Illes Balears (4.88%) and La Rioja (3.84%). Conversely, those registering a greater decrease in employment were País Vasco (-2.09%), Andalucía (-2.02%) and Comunidad de Madrid (-1.65%).

Quarter-on-quarter employment variation rate by Autonomous Community (%)

During the last year, Illes Balears registered an increase of 8,000 in the number of employed persons. In turn, the greatest decreases in employment were registered in Comunidad de Madrid (150,100 fewer employed persons), Andalucía (64,700) and Castilla y León (46,400).

Illes Balears (1.58%) and La Rioja (0.14%) are the only Autonomous Communities with a positive employment interannual variation rate. In turn, Comunidad de Madrid (–5.45%), Comunidad Foral de Navarra (–5.30%) and Cantabria (–5.18%) registered the greatest decreases.

Annual variation rate of employment by Autonomous Community (%)

The greatest decreases in the number of unemployed persons this quarter were registered in Cataluña (32,500 less unemployed persons), Illes Balears (25,100) and Comunitat Valenciana (22,600). In turn, the greatest increases in unemployment were registered in Canarias (22,000 unemployed persons more), Comunidad de Madrid (10,900) and Andalucía (6,900).

As for the annual variation rate, unemployment decreases in Illes Balears by 17,000 persons. The greatest increases of unemployment were registered in Comunidad de Madrid (25,400 unemployed persons more) and Andalucía (23,100).

País Vasco maintained the lowest unemployment rate in Spain (15.84%). At the other end of the spectrum, Andalucía registered a 36.37% rate.

The greatest increases of economically active persons in the third quarter were registered in Cataluña (19,700 more), Canarias (17,900) and Región de Murcia (11,900). In turn, the greatest decreases were registered in Andalucía (45,400 less), Comunidad de Madrid (32,900) and País Vasco (16,600).

In the last 12 months, the number of economically active persons decreased almost in all the Autonomous Communities. The greatest decreases were registered in Comunidad de Madrid (124,800 less), Cataluña (44,700) and Andalucía (41,700).

The economic activity rates this quarter ranged between the 67,25% recorded in Illes Balears, and the 52,62% registered in Principado de Asturias.

Results by province

The provincial results summary of the EAPS may be accessed via the following link:

http://www.ine.es/en/daco/daco42/daco4211/epapro0313_en.pdf

Seasonally adjusted series

In order to contribute to a better interpretation of the EAPS results from a short-term point of view, in line with the rest of short-term statistics, it is available for the labour market analysts the quarterly evolution of the main seasonally adjusted variables.

Methodological note

General features

The Economically Active Population Survey (EAPS) is a continuous sample-based study aimed at family dwellings, and which has been conducted since 1964.

The additional sample collected by the *Galician Statistics Institute* (IGE) has been incorporated as of the third quarter of 2009, using the same fieldwork system and identical methodology to that of the INE. Therefore, apart from the 3,588 census sections that have made up the sample for the whole of Spain since 2005, we must take into account the 234 additional sections in the Autonomous Community of Galicia. Since the third quarter of 2009, the EAPS sample is made up of 3,822 census sections from the more than 30,000 census sections into which Spain is divided. An average of 18 households are surveyed in each one, except in the provinces of Barcelona, Madrid, Sevilla, Valencia and Zaragoza, where the number of households surveyed is 22. Thus, the sample size is approximately 65,000 dwellings, providing information on some 180,000 persons. The data is collected via personal and telephone interviews. The information is carefully filtered and computer-processed. Results are obtained within the month following the end of the reference quarter for the data.

Main definitions

(Economically) Active persons: persons aged 16 years old and over who, during the reference week (the week prior to that when the interview is held), supplied labour for the production of goods and services, or were available to do so and in conditions to incorporate themselves into said production. They are divided into employed and unemployed persons.

Employed persons: persons aged 16 years old and over who, during the reference week, worked for at least one hour in exchange for payment (salary, wage, business benefit, etc.) in cash or in kind. Persons who, being employed, had been temporarily absent from their job due to illness, holidays, etc., are also considered employed persons.

Employed persons are classified, considering their professional status, as non-wage earners (employers, businesspersons without wage earners and independent workers, cooperative members, family assistance) and wage earners (public or private).

Considering the length of the working day, employed persons are classified as full-time and part-time employed persons. The usual working week may not be shorter than 30 hours in the first case, nor exceed 35 hours in the second.

Wage earners are classified as permanent and temporary. For the latter, the end of their contract or work relationship is set by means of objective conditions, such as the expiry of a certain period of time, the completion of a specific task, etc.

A significant category within employment is that of **time-related underemployment**, defined in the 16th International Labour Statisticians Conference (Geneva, 1998). The EAPS considers persons suffering time-related underemployment as employed persons who would like to work more hours, who are available to work more hours and whose effective working hours in the reference week are less than the number of hours usually worked by employed persons working full-time in the same branch of activity as that in which the underemployed person develops his/her main job.

Unemployed persons: persons aged 16 years old and over who, during the reference week, were jobless, available for work, and actively looking for a job. Persons who might have already found a job and are waiting to start are also considered to be unemployed, provided that they meet the first two conditions.

According to European Commission Regulation 1897/2000, the following are considered to be active search methods, in the four weeks prior to the interview:

- Being in contact with a public employment office for the purpose of finding work, whatever part they play in the initiative (the renewal of registration due to purely administrative reasons does not constitute active planning).
- Being in contact with a private office (temporary employment agency, specialised hiring agency, etc.) with the objective of finding work.
- Having sent an application directly to employers.
- Having searched via personal relations and trade unions, etc.
- Having advertised oneself or responded to newspaper advertisements.
- Having studied job vacancies.
- Having taken part in a test, public exam or interview in the framework of a contracting procedure.
- Having looked for land, premises or material.
- Having taken steps to obtain permits, licences or financial resources.

(Economically) Inactive persons: persons aged 16 years old and over not included in any of the above categories.
