## Flash estimate of the Consumer Price Index (CPI) and of the Harmonised Index of Consumer Prices (HICP) October 2016

# The annual change of the flash estimate of the CPI stands at 0.7% in October, five tenths higher than that registered in September

## The annual change of the HICP flash estimate is 0.5%

According to the flash estimate published by the INE, the annual inflation of the CPI in October 2016 is 0.7%.

This indicator provides a preview of the CPI that, if confirmed, would imply an increase of five tenths in its annual rate, given that in September this change was 0.2%.

This increase is mainly explained by the increase in the prices of electricity and fuels (diesel and gasoline/petrol), compared to the decrease of prices of 2015.

<sup>(1)</sup> The last data refers to the flash estimate

In turn, the annual change of the HICP flash estimate in October stands at 0.5%. If confirmed, the annual change of the HICP would increase five tenths as compared to the previous month.

### Evolution of the monthly change

According to the flash estimate of the CPI, consumer prices register a 1.1% variation in October, as compared to the month of September.

#### Evolution of the monthly change of the CPI in October

In turn, the monthly change of the HICP flash estimate in October stands at 0.8%.
