## Nature, characteristics and purpose

The Survey is included in the General plan for statistics on science and technology promoted by the Statistical Office of the European Communities (Eurostat). The objective of the survey is to quantify the **innovative activities** of companies, among which, of particular note is **the performance of R&D**, and to evaluate the results (innovations) and effects of such activities.

### Legislation

#### Statistical Secrecy

The personal information obtained by the statistical services, both directly from the informants and from administrative sources, will be subject to protection, and are covered by **statistical secrecy** (art. 13.1 of the Law on Public Statistical Services, of 9 May 1989, LFEP). All statistical personnel will be obliged to maintain statistical secrecy (art. 17.1 of the LFEP).

#### Obligation to provide data

Laws 4/1990 and 13/1996 establish the **obligation to provide the data** that is requested for the compilation of these Statistics.

The statistical services may request data from all individuals and legal entities, both Spanish and foreign, resident in Spain (Article 10.1 of the LFEP).

All individuals and legal entities that provide data, regardless of whether their collaboration is compulsory or voluntary, **must respond in a true, exact and comprehensive manner within the stipulated deadline** to the questions outlined in due form by the statistical services (art. 10.2 of the LFEP).

**Failure to comply** with the obligations envisaged in this Law, as related to statistics for state purposes, **will be sanctioned** in compliance with the terms established in the regulations contained in this Heading (art 48.1 of the LFEP).

Very serious infringements will be sanctioned with fines ranging from **3,005.07 to 30,050.61 €**. Serious infringements will be sanctioned with fines of **300.52 to 3,005.06 €**. Minor infringements will be sanctioned with fines from **60.10 to 300.51 €** (art. 51.1, 51.2 and 51.3 of the LFEP).

**Note:** This questionnaire is available in the different co-official languages of the Autonomous Communities.

### Compulsory statistics

## General instructions

**Information unit:** the information that is requested in this questionnaire refers to the **company**. A company is considered to be any legal entity that constitutes an organisational unit that produces goods and services, and that enjoys a certain autonomy in decision-making, mainly at the time of using the available current resources. From a practical point of view, and in its more general definition, the concept of company is defined as a legal or juridical unit, that is, all individuals or legal entities (companies, cooperatives, etc. ) whose activity is recognised by Law, and which are identified by their corresponding Fiscal Identification Number (NIF).

**Reference period:** the data must refer to the year **2011**, except in the question that requests information regarding a different period.

**Structure of the questionnaire:** the questionnaire is comprised of ten sections:

- A. General company information.
- B. Internal R&D activities in 2011.
- C. Purchase of R&D services in 2011.
- D. Activities for technological innovation performed by the company in 2011.
- E. Innovation of products and processes during the 2009-2011 period.
- F. Factors that hinder the innovation activities during the 2009-2011 period.
- G. Intellectual and industrial property rights.
- H. Income from and payments for eliminated technology in 2011.
- I. Organisational innovations during the 2009-2011 period.
- J. Commercialisation innovations during the 2009-2011 period.
- K. Tax deductions for R&D and innovation.

**Form of recording the data:** write down data clearly. Do not write in the shaded areas. The financial data is requested in **euros**, without including VAT.

**Consignment term:** this questionnaire, duly completed with the required information, must be returned within a period **not exceeding 15 days**.

In this questionnaire, the term **product** is used to designate both **goods** and **services**.

## A. General company information

### A.1 Main economic activity

**Main activity:** that which generates the greatest added value, or failing this, the greatest turnover.

Description: \_\_\_\_\_

--	--	--	--

Indicate, in order of importance, the main products resulting from this activity:

CNAE-2009

1. \_\_\_\_\_
2. \_\_\_\_\_

### A.2 Incidents during the 2009-2011 period

During the 2009-2011 period, have any of the following changes taken place in the company?

	YES	NO
1. The company was newly created _____	<input type="checkbox"/>	<input type="checkbox"/>
2. Turnover increased by at least 10%, due to a merger with another company _____	<input type="checkbox"/>	<input type="checkbox"/>
3. Turnover decreased by at least 10%, due to the sale or closing of the company _____	<input type="checkbox"/>	<input type="checkbox"/>

### A.3 Type of company (Mark the corresponding box with an "X")

- |   |                          |
|---|--------------------------|
| 1. Public _____   | <input type="checkbox"/> |
| 2. Private without foreign participation _____                            | <input type="checkbox"/> |
| 3. Private with a participation of <10% of foreign capital _____          | <input type="checkbox"/> |
| 4. Private with a participation of ≥10% and <50% of foreign capital _____ | <input type="checkbox"/> |
| 5. Private with a participation of ≥50% of foreign capital _____          | <input type="checkbox"/> |
| 6. Research association and other research institutions _____             | <input type="checkbox"/> |

### A.4 Is the company a part of a group of companies?

YES ☐

NO ☐

⇒ Go to question **A.5**

- What is the complete name of the group, or failing this, of the parent company?

- What is the central headquarters of the group? (Write down the name of the country)

- What is the relationship of the company with the group?

--	--	--	--

1. Parent company ☐ 2. Affiliate ☐ 3. Joint company ☐ 4. Associate company ☐

## A.5 Year of creation of the company

1. Please indicate the year of creation of the

## A.6 Is the company located in a Scientific or Technological Estate?

YES ☐ NO ☐ ⇒ Go to question A.7

1. What is the complete name of the Scientific or Technological Estate?
2. What date did the company join the Scientific or Technological Estate?

## A.7 Economic results

The total commercial sales of goods and services, including exports and taxes, **except** the Value Added Tax (VAT). In the case of credit institutions, the interest to be charged and similar income. For insurance companies, the gross insurance policies signed.

	Year 2011 (€ without decimals)	Year 2009 (€ without decimals)
1. Turnover		
1.1 Of turnover, indicate the total sales to European Union, EFTA or EU candidate countries		
1.2 Of turnover, indicate the total exports (excluding 1.1)		
2. Gross investment in material goods		

## A.8 Average number of employees

	Year 2011	Year 2009
1. Paid staff		
1.1. Of the previous figure, indicate how many of them have higher education		
2. Unpaid staff		
<b>TOTAL (1+2)</b>		
3. Of the total staff, indicate the % of women	<input type="text"/> %	<input type="text"/> %
4. Would you consider it necessary to increase the staff of the company?		
NO <input type="checkbox"/> YES <input type="checkbox"/> ⇒ Indicate by how many persons		

## A.9 In what geographic market did the company sell goods or services during the 2009-2011 period? (Mark all of the markets in which the company operates)

	YES	NO
1. Local / Autonomous market	<input type="checkbox"/>	<input type="checkbox"/>
2. National market	<input type="checkbox"/>	<input type="checkbox"/>
3. Other countries of the European Union (EU), EFTA countries or EU* candidate	<input type="checkbox"/>	<input type="checkbox"/>
4. All remaining countries	<input type="checkbox"/>	<input type="checkbox"/>

\* This includes the following countries: Germany, Austria, Belgium, Bulgaria, Croatia, Cyprus, Denmark, Slovakia, Slovenia, Estonia, Finland, France, Greece, Hungary, Ireland, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Montenegro, Norway, Netherlands, Poland, Portugal, United Kingdom, Czech Republic, Romania, Sweden, Switzerland and Turkey.

## A.10 Activities based on biological sciences and technologies in 2011

Biotechnology is the application of science and technology to living organisms, as well as to their parts, products or models, in order to alter living or inert material, for the purpose of producing knowledge, goods and/or services.

1. YES ☐ NO ☐ ⇒ Go to section

Does the company perform any activity based on sciences and technologies applied to living organisms or to compounds obtained from these, in order to acquire knowledge or products of value? (This includes bio-computing and nano/micro-manufacturing)

A.11

## 2. Indicate the resources dedicated to activities based on biological sciences and technologies

The full-time equivalent (FTE) is the sum of the staff that works full-time and the fractions of time that the part-time staff works on activities based on biological sciences and technologies (see 1.3 of the Annex)

Resources used:	Staff		Staff on FTE (1 decimal)		Total expenses (€ without decimals)
	Total	Women	Total	Women	

### A.11 Companies in R&D (Only for companies whose main activity is the performance of R&D activities, research associations and technological centres)

Indicate the main activity of the company/companies that benefit from their R&D activities

Description: \_\_\_\_\_ CNAE-2009 

--	--	--	--

## B. Internal R&D activities in 2011

Internal R&D activities are creative work performed **within the company**, undertaken systematically for the purpose of increasing the volume of knowledge in order to conceive new applications, such as new or significantly improved products (goods/services) and processes. (See annex at the end of the questionnaire).

### B.1 Did the company carry out internal R&D activities in 2011?

YES ☐ NO ☐ ⇒ Go to section C  
↓

Continuously 

--

 Occasionally 

--

**Mark only one option**

#### B.1.1 Brief description of the most important R&D project

### B.2 Organisation of internal R&D in the company

Indicate the units of the company that carried out internal R&D activities in 2011.

- |   |   |
|---|---|
| 1. Specific R&D department or laboratory _____ <input type="checkbox"/> | 5. Quality control department _____ <input type="checkbox"/>  |
| 2. Design department _____ <input type="checkbox"/>                     | 6. Marketing department _____ <input type="checkbox"/>        |
| 3. Production department _____ <input type="checkbox"/>                 | 7. IT department _____ <input type="checkbox"/>               |
| 4. Technical department _____ <input type="checkbox"/>                  | 8. Other departments (specify) _____ <input type="checkbox"/> |

### B.3 Staff dedicated to internal R&D activities in 2011, by occupation

The full-time equivalent (FTE) is the sum of the staff that works full-time and the fractions of time that the part-time staff works on R&D activities. (See annex at the end of the questionnaire).

Occupation	Persons		FTE (1 decimal)	
	Total	Women	Total	Women

19. Melilla			.	.			.	.
<b>TOTAL</b> (this should coincide with B.3)			.	.			.	.

## B.6 Expenses on internal R&D activities in 2011

Expenses on remunerations are those corresponding to the business costs of the researchers on FTE and the technicians and assistants on FTE specified in B.3. For the rest of the items in this section, we shall assign the part of expenditure that corresponds to R&D.

	Value (€ without decimals)
1. Remuneration of researchers on FTE (this includes the remuneration of the interns)	
2. Remunerations of technicians and assistants on FTE	
3. Other current expenses (without VAT or amortisations)	

3.1 Of the figure above, please indicate the total expenditure incurred by contracting external consultancy working at the site for carrying out internal R&D activities

<b>A. Total current expenses on R&amp;D (1+2+3)</b>	<b>A</b>
4. Equipment and instruments (without VAT)	
5. Land and buildings (without VAT)	
6. Acquisition of specific software for R&D (including licences)	
<b>B. Total capital expenses on R&amp;D (4+5+6)</b>	<b>B</b>
<b>C. TOTAL (A+B)</b>	<b>C</b>

## B.7 Research grants

Estimate the total value of the grants received during the year 2011 by the research interns listed in section B.3, regardless of the type of grant and of the organisation that granted it. This figure should be included in the remuneration of researchers from question B.6.

	Value (€ without decimals)
1. Research grants	

## B.8 Distribution of current expenditure on internal R&D activities in 2011, by type of research

Breakdown, as a percentage, of the CURRENT internal expenses on R&D from B.6.A, according to the following classification. (Do not write decimals, and check that the sum of the column is 100%). (See annex at the end of the questionnaire).

1. Fundamental or basic research		%
2. Applied research		%
3. Technological development		%

TOTAL \_\_\_\_\_

1	0	0	%
---	---	---	---

## B.9 Financing of the expenses on internal R&D in 2011

Breakdown of the total internal expenses on R&D from question B.6.C, according to the original source of the funds received for R&D. In the case of public funds for carrying out R&D, we must distinguish between subsidies (including non-refundable loans) and contracts (and purchases) with the Administration. Refundable loans for carrying out R&D obtained from both the Administration and other sources, shall be included as their own funds. In the case of research associations and companies in R&D at the service of other company/companies, the institutional quotas received, by which they are financed (and that are not specific R&D orders) must be included in their own funds

Source of the funds	Value (€ without decimals)
<b>A. Financing by the company itself</b>	
- Funds of its own	1
- Loans	2
- Of the loans previously declared, what amount has been lent by the Administration?	3
<b>B. Financing from other Spanish companies</b>	
- From companies in their same group	4
- From other public companies	5
- From other private companies and research associations	6
<b>C. Public financing</b>	
- Subsidies from the State Central Administration	7
- Contracts with the State Central Administration	8
- Subsidies from the Autonomous and Local Administrations	9
- Contracts with the Autonomous and Local Administrations	10
<b>D. Other national sources</b>	
- From universities	11
- From private, non-profit institutions	12
<b>E. Foreign funds</b>	
- From foreign companies in their same group	13
- From other companies	14
- From European Union programmes	15
- From foreign Public Administrations	16
- From foreign universities	17
- From foreign, private, non-profit institutions	18
- From other international organisations	19
<b>TOTAL</b> (this must coincide with B.6.C)	

## B.10 Distribution of expenditure on internal R&D activities in 2011, by socio-economic objective

Breakdown, as a percentage, of the internal expenses on R&D from B.6.C that the company carried out in 2011, according to the socio-economic objective or purpose of the research. (Do not write decimals, and check that the sum of the column is 100%).

1. Exploration and exploitation of the land media and of the atmosphere		%
2. Control and protection of the environment		%
3. Exploration and exploitation of space		%
4.1 Transport and telecommunications systems		%
4.2 Other infrastructure		%
5. Production, distribution and rational use of energy		%
6. Industrial production and technology		%
7. Protection and improvement of human health		%
8. Development of agriculture, livestock breeding, forestry and fishing		%
9. Education		%
10. Culture, leisure, religion and the media		%
11. Political and social systems, structures and processes		%
12. Non-oriented research		%
13. Defence		%
<b>TOTAL</b>	<b>1 0 0</b>	<b>%</b>

## B.11 Internal R&D activities foreseen for 2012

Staff for R&D, on FTE (1 decimal)

Internal expenses on R&D (€ without decimals)

Resources foreseen for 2012 \_\_\_\_\_

## C. Purchase of R&D services in 2011

These are those motivated by the acquisition of R&D services outside the company by means of contract, agreement, etc. . This excludes institutional quotas for financing other companies, research associations, etc. that do not imply a direct purchase of R&D.

	Value (€ without decimals)
<b>A. Purchase of R&amp;D services in Spain (without VAT)</b>	
- From companies in the same group	1 _____
- From other companies	2 _____
- From research associations	3 _____
- From Public Administration bodies	4 _____
- From universities	5 _____
- From private, non-profit institutions	6 _____
<b>B. Purchase of R&amp;D services abroad (without taxes)</b>	
- From foreign companies in the same group	7 _____
- From other foreign companies	8 _____
- From foreign Public Administration bodies	9 _____
- From foreign universities	10 _____
- From foreign, private, non-profit institutions	11 _____
- From other international organisations	12 _____
<b>C. Total purchase of R&amp;D services, (external R&amp;D) (sum from 1 to 12)</b>	_____

## D. Activities for technological innovation performed by the company in 2011

A **technological innovation**, as defined in this survey, as a new or significantly improved product (good or service) introduced on the market, or a new or significantly improved process introduced on the market. Innovation is based on the results of new technological developments, new combinations of existing technologies, or the use of other knowledge acquired by the company. (See annex at the end of the questionnaire).

Changes of an aesthetic nature, the mere sale of innovations produced completely by other companies, and simple changes in organisation or management, must not be included. They shall be specified in section I or in section J.

The innovation (product or process) is always new for the company. It is not necessary for it to be new in the market in which the company operates.

This section requests information regarding those activities conducive to obtaining technological innovations.

### D.1 In 2011, did the company perform any of the following activities, for the purpose of achieving new or significantly improved products (goods or services) or processes, based on science, technology and other areas of knowledge? (In the case of a positive answer, indicate the amount of expenditure)

Activities for technological innovation	NO	YES	Value (€ without decimals)
		S	
<b>A. Internal R&amp;D (This must coincide with question B.6.C)</b>	<input type="checkbox"/>	<input type="checkbox"/>	→ A. _____
<b>B. Acquisition of R&amp;D (external R&amp;D) (This must coincide with the total from section C)</b> The same activities as those indicated above, but carried out by other organisations (including those from the same group) or public or private research bodies, and purchased by the company.	<input type="checkbox"/>	<input type="checkbox"/>	→ B. _____
<b>C. Acquisition of machinery, equipment and advanced hardware or software aimed at the production of new or significantly improved products or processes (not included in R&amp;D question B.6.B).</b>	<input type="checkbox"/>	<input type="checkbox"/>	→ C. _____
<b>D. Acquisition of other external knowledge for innovation (not included in R&amp;D)</b> Purchase or use, under licence, of patents or of non-patented inventions and technical or other knowledge, from other companies or organisations, to use in the innovations of the company.	<input type="checkbox"/>	<input type="checkbox"/>	→ D. _____
<b>E. Training for innovation activities</b> Internal or external training of staff, specifically aimed at the development or introduction of new or significantly improved products or processes.	<input type="checkbox"/>	<input type="checkbox"/>	→ E. _____
<b>F. Introduction of innovations in the market</b> Activities for introducing, in the market, its new or significantly improved goods or services, including the prospecting of the market and the launch advertising.	<input type="checkbox"/>	<input type="checkbox"/>	→ F. _____
<b>G. Design, other preparations for production and/or distribution (not included in R&amp;D)</b> Technical procedures and preparations for carrying out new or significantly improved products or processes, not included in other sections (for example, viability tests and studies, development of routine software).	<input type="checkbox"/>	<input type="checkbox"/>	→ G. _____
<b>H. (A+B+C+D+E+F+G) TOTAL</b>			→ H. _____

If you have answered NO to all of the questions, go to section D.3.

## D.2 Expenses on internal R&D and other innovation activities, by Autonomous Community, in 2011

Distribute expenditure on R&D activities and on technological innovation activities, indicating in questions D.1.A and D.1.H, among the Autonomous Communities where the company performs said activities. Check that the expenses on R&D are less than or equal to the expense on technological innovation in each Autonomous Community.

	Value (€ without decimals)			Value (€ without decimals)	
	Expenses on Internal R&D	Expenses on Innovation		Expenses on Internal R&D	Expenses on Innovation
1. Andalucía			10. Comunitat Valenciana

			19. Melilla		
TOTAL (coincide with B.6.C and D.1.H, respectively)					

## D.3 During the 2009-2011 period, did the company receive public financial support (loans, subsidies, etc.) for technological innovation activities, from the following administrations?

Include the financing through tax credits or deductions, subsidies, subsidised loans and loan guarantees. This excludes the research and other innovation activities that are carried out completely by **contract** for the public sector.

	YES	NO	Subsidies received in 2011 (€ without decimals)	Loans received in 2011 (€ without decimals)
Local or Autonomous administrations	<input type="checkbox"/>	<input type="checkbox"/>		
State Administration (including central public bodies and ministries)	<input type="checkbox"/>	<input type="checkbox"/>		
The European Union (EU)	<input type="checkbox"/>	<input type="checkbox"/>		
In case of a positive answer, did the company participate in the Seventh framework programme (2007-2013) for technological research and development of the European Union	<input type="checkbox"/>	<input type="checkbox"/>		

## D.4. In 2011, did the company carry out any technological innovation activities that use or contain free software?

YES ☐

NO ☐

→ Go to section E

### D.4.1 Does the company use the free software for internal R&D activities?

YES ☐

NO ☐

## E. Innovation of products and processes during the 2009-2011 period

### E.1 Innovation of products (goods or services)

The innovation of products consists of the introduction, in the market, of **new** or **significantly** improved goods or services, referring to basic characteristics, technical specifications, incorporated software or other intangible components, desired purposes or provisions. (See examples in the annex). Changes of a merely aesthetic nature should not be considered, as well as the sale of innovations that are completed produced and developed by other companies. Innovation (novelty or improvement) must be such for the company, but not necessarily for the sector or market. It does not matter whether the innovation was initially developed by the company or by other companies.

#### E.1.1 During the 2009-2011 period, did the company introduce ...

YES

NO

... new or significantly improved *goods*? (This excludes the mere resale of new goods purchased

from other companies, and the modifications solely for aesthetic purposes) \_\_\_\_\_  
... *new or significantly improved services?* \_\_\_\_\_

☐☐☐☐

If the answer was NO to both questions, go to **section E.2.**

### **E.1.2 Who developed these product innovations?** (Select the most adequate option)

Mainly the company or group of companies \_\_\_\_\_

☐

Mainly the company, together with other companies or institutions

☐

Mainly other companies or institutions \_\_\_\_\_

☐

### **E.1.3 Brief description of the most important product innovation**

\_\_\_\_\_

## E.1.4 Regarding the product innovations introduced during the 2009-2011 period, were they

...

		YES	NO
... <b>an innovation only for the company?</b>	The company introduced a new or significantly improved good or service of which the competitors already had one in the market	<input type="checkbox"/>	<input type="checkbox"/>
... <b>an innovation in the market?</b>	The company introduced a new or significantly improved good or service in the market before the competitors (it may already have been offered in other markets)	<input type="checkbox"/>	<input type="checkbox"/>

## E.1.5 Economic impact of the innovations of products on turnover in 2011

Breakdown, as a percentage, of **total turnover for 2011** (listed in section A.7), according to the following classification. Write the figure with one decimal and check that the sum of the column is 100.0%.

1. % due to innovations on goods and services introduced during the 2009-2011 period, that were only an innovation for the company	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	.	<input type="text"/>	%
2. % due to innovations on goods and services introduced during the 2009-2011 period, that represented an innovation for the market in which the company operates	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	.	<input type="text"/>	%
3. % due to goods and services that remained unchanged or experienced only small changes in the 2009-2011 period (including the resale of goods and services acquired from other companies)	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	.	<input type="text"/>	%
<b>Total turnover in 2011</b> (1+2+3)	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	.	<input type="text"/>	%

## E.2 Innovation of processes

Process innovation consists of the implementation of production processes, distribution methods or support activities for the goods and services that are **new** or provide a **significant** improvement. Innovation (novelty or improvement) must be such for the company, but not necessarily for the sector or market. It does not matter whether the innovation was initially developed by the company or by other companies. This excludes merely organisational innovations.

### E.2.1 During the 2009-2011 period, did the company introduce ...

	YES	NO
... new or significantly improved methods for the manufacture or production of goods or services?	<input type="checkbox"/>	<input type="checkbox"/>
... new or significantly improved logistics systems or delivery or distribution methods for its supplies, goods or services?	<input type="checkbox"/>	<input type="checkbox"/>
... support activities for its processes, such as systems of maintenance or IT operations, of purchases or of accounting, being new or significantly improved?	<input type="checkbox"/>	<input type="checkbox"/>

If the answer has been NO to all of the options, go to section E.3.

### E.2.2 Who developed these process innovations? (Select only the most adequate option)

Mainly the company or group of companies	<input type="checkbox"/>
Mainly the company, together with other companies or institutions	<input type="checkbox"/>
Mainly other companies or institutions	<input type="checkbox"/>

## E.2.3 Brief description of the most important process innovation

### E.3 Technological Innovation activities in progress or abandoned during the 2009-2011 period

Remember that, among the innovation activities, we include the acquisition of machinery, equipment, software and licences, engineering and development tasks, industrial design, training, commercialisation and research and development when it is carried out *specifically* for the purpose of developing or applying a product or process innovation. It also includes the basic R&D as an innovative activity, even when it is not related to a product and/or process innovation.

	YES	NO
1. Does the company have an innovation activity for developing product innovations or process innovations, still in progress at the end of 2011?	<input type="checkbox"/>	<input type="checkbox"/>
1.1 Of the activities still in progress at the end of 2011, did any suffer an important delay? _____	<input type="checkbox"/>	<input type="checkbox"/>
2. During the 2009-2011 period, were any of the innovation activities or projects abandoned during the conception stage?	<input type="checkbox"/>	<input type="checkbox"/>
3. During the 2009-2011 period, were any of the innovation activities or projects abandoned once the activity or project had begun? _____	<input type="checkbox"/>	<input type="checkbox"/>

If the answer has been NO to all of questions E.1.1, E.2.1 and E.3, go to section F.

### E.4. Sources of information for technological innovation activities during the 2009-2011 period

During the 2009-2011 period, **what importance did each of the following information sources have for the innovation activities of the company?**

(Indicate the sources from which information was taken for new innovation projects or that contributed to completing innovation projects in progress)

Source of information		Degree of importance			
		High	Medium	Low	It was not used
<b>Internal Sources from the</b>	Within the company or group of companies (departments, employees, etc.) _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Suppliers of equipment, material, components or software _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Clients _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Competitors or other companies from the same branch of activity _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Consultants, commercial laboratories or private R&D institutes _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Institutional sources</b>	Universities or other centres of higher education _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Public research bodies _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Technological centres _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Other sources</b>	Conferences, trade fairs, exhibitions, etc. _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Scientific magazines and commercial/technical publications _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Professional and sectoral associations _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### E.5 Cooperation for technological innovation activities during the 2009-2011 period

During the 2009-2011 period, **did the company cooperate in any of its innovation activities with other companies or bodies?**

Cooperation for innovation consists of the active participation, with other companies or non-commercial bodies, in innovation activities. It is not necessary for the two parties to reap a trade benefit. This excludes the mere subcontracting of work without active cooperation.

YES ☐

NO ☐ ⇒ Go to question E.6

### E.5.1 Indicate the type of partner with which they cooperated, and the country in which it is located (mark the applicable answers)

Type of partner with which they cooperated	Their country	Another European* country	United States	China and India	Other countries
A. Other companies from the same group	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
B. Suppliers of equipment, material, components or software	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
C. Clients	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
D. Competitors or other companies from the same branch of activity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
E. Consultants, commercial laboratories or private R&D institutes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
F. Universities or other centres of higher education	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
G. Public research bodies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
H. Technological centres	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

\* This includes the following countries from the European Union, EFTA countries or EU candidate countries: Germany, Austria, Belgium, Bulgaria, Croatia, Cyprus, Denmark, Slovakia, Slovenia, Estonia, Finland, France, Greece, Hungary, Ireland, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Montenegro, Norway, Netherlands, Poland, Portugal, United Kingdom, Czech Republic, Romania, Sweden, Switzerland and Turkey.

### E.5.2 What type of cooperation partner would you consider the most valuable for the innovation activities of the company?

Indicate the letter that corresponds to section E.5.1 ☐

Indicate the name of the most valuable cooperation partner \_\_\_\_\_

### E.6 Objectives of technological innovation during the 2009-2011 period

The innovative activity carried out in the company may have been oriented towards different objectives. Indicate the degree of importance of the following objectives:

		Degree of importance			
		High	Medium	Low	Not applicable
<b>Objectives for the products</b>	Broader range of goods or services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Substitution of old products or processes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Penetration in new markets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<b>Greater market quota</b>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Better quality of the goods or services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Objectives for the processes</b>	Greater flexibility in the production or provision of services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Greater capacity for the production or provision of services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Lower labour costs per unit produced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Fewer materials per unit produced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Less energy per unit produced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Objectives for employment</b>	Increase in total	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Increase in qualified employment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Maintenance of	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Other objectives</b>	Less environmental impact	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<b>Improvement in health and safety of employees</b>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Compliance with the environmental, health or safety legal requirements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

QUESTIONS THAT MUST BE ANSWERED BY ALL COMPANIES

## F. Factors that hinder the technological innovation activities during the 2009-2011 period

During the 2009-2011 period, what importance did the following factors have on hindering the innovation activities or projects or influencing the decision not to innovate?

		Degree of importance			
		High	Medium	Low	Not applicable
<b>Factors regarding cost</b>	Lack of funds in the company or group of companies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Lack of financing from foreign sources to the company	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Innovation has too high a cost	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Factors regarding knowledge</b>	Lack of qualified staff	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Lack of information regarding technology	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Lack of information regarding the markets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Difficulty in finding cooperation partners for the innovation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Factors regarding the market</b>	Market dominated by established companies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Uncertainty with regard to the demand for goods and services that are innovative	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>Reasons not to innovate</b>	It is not necessary, due to previous innovations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	It is not necessary because there is no demand for innovations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## G. Intellectual and industrial property rights

### G.1. Application and use of patents and other protection methods during the 2009-2011 period

During the 2009-2011 period, did the company apply for any patents to protect its inventions or innovations?

YES ☐

NO ☐ → Go to section G.2

• Indicate the number of patents requested in 2009-2011 (the same patent presented in different offices shall only be counted once)

• Indicate the number of patents requested in 2009-2011, according to the type of patent

SPTO patent \_\_\_\_\_ EPO patent \_\_\_\_\_ USPTO patent \_\_\_\_\_ PCT patent \_\_\_\_\_

SPTO: Spanish Patent and Trademark Office. EPO: European Patent Office. USPTO: U.S. Patent and Trademark Office. PCT: Patent Cooperation Treaty

### G.2 Other intellectual and industrial property rights during the 2009-2011 period

During the 2009-2011 period, did the company ...

... register any industrial drawing or model? YES ☐ NO ☐

... register any trademark? YES ☐ NO ☐

... claim royalties? YES ☐ NO ☐

## H. Income from and payments for eliminated technology in 2011

Eliminated technology includes those technical services with technological content, patents, trademarks, models and inventions and R&D activities. **This excludes machinery and products**, be they with high, medium or low technology. Exchanges with foreign countries must meet these characteristics: a) the operation must have an explicitly technological content; b) it must place a Spanish company in contact with foreign countries; c) the property or right to use the technology must be transmitted under commercial conditions.

### H.1 Has the company carried out any exchange (income or payment) of eliminated technology, with companies from other countries?

YES ☐

NO ☐ → Go to section I

## H.2 Value of the income and/or payments of eliminated technology with other countries, according to the nature of the transaction

Nature of the transaction	Income (€ without decimals)	Payments (€ without decimals)
<i>Technical services with technological content</i>		
1. Hardware services (set-up, maintenance, etc.)		
2. Technical architecture and engineering services (excluding construction and civil labour)		
3. Technical services provided to industrial, agricultural, livestock breeding or mining companies		
<i>Patents, trademarks, models and inventions</i>		
4. Transfer of patents, trademarks, models and inventions		
5. Purchase/sale of patents, trademarks, models and inventions		
<i>R&amp;D activities</i>		
6. Basic and applied research; technological development		
<b>TOTAL (1+2+3+4+5+6)</b>		

## Non-technological innovations

### I . Organisational innovations during the 2009-2011 period

An organisational innovation consists of the implementation of new organisational methods in the internal functioning of the company (including knowledge management methods/systems), in the organisation of the workplace or in the external relations that have not previously been used by the company. It must be the result of strategic decisions made by the management of the company. **It excludes** mergers or acquisitions, although they may imply an organisational innovation for the company.

#### I.1 During the 2009-2011 period, did the company introduce ...

	YES	NO
... new business practices in the organisation of the work or of the company procedures? (For example, the management of the supply chain, knowledge management systems, re-engineering or business, efficient production, quality management, education and training systems, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
... new organisation methods for the workplaces in the company, for the purpose of a better distribution of responsibilities and decision-making? (For example, use for the first time of a new system for distributing responsibilities among employees, managing working teams, decentralisation, restructuring departments, education/training systems, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
... new management models for external relations with other companies or public institutions? (For example, creation for the first time of alliances, associations, externalisation or subcontracting)	<input type="checkbox"/>	<input type="checkbox"/>

If the answer has been NO to all questions in section I.1, go to section J

#### I.2 Who developed these organisational innovations? (Select only the most adequate option)

Mainly the company or group of companies	<input type="checkbox"/>
Mainly the company, together with other companies or institutions (including consultants)	<input type="checkbox"/>
Mainly other companies or institutions (including consultants)	<input type="checkbox"/>

#### I.3 Indicate the degree of importance of the objectives of the organisational innovations introduced by the company during the 2009-2011 period

	Degree of importance			
	High	Medium	Low	Not applicable
Reduction of the response period as per the needs of a client or supplier	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Improvement in the ability to develop new products or processes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Better quality of the goods or services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Lower costs per unit produced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Improvement in the exchange of information or in the communication within the company or with other companies or institutions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## J. Commercialisation innovations during the 2009-2011 period

A commercialisation innovation is the implementation of new trade strategies or concepts that differ significantly from those prior, or that have not previously been used. This must imply a significant change in the design or packaging of the product, in the positioning of the same, as well as in its promotion and/or price. **It excludes** seasonal, regular and other similar changes in the commercialisation methods. These innovations imply a search for new markets, but not changes in the use of the product.

### J.1 During the 2009-2011 period, did the company introduce ...

	YES	NO
... significant modifications in the design of the product or in the packaging of the goods or services? (This excludes the changes that affect the functionality of the product or the characteristics of the user. Said changes in the functionality of the product would be product innovation)	<input type="checkbox"/>	<input type="checkbox"/>
... new techniques or channels for the promotion of the product? (For example, use for the first time of a new advertising channel, fundamentally new trademarks with the objective of introducing them in new markets, introduction of loyalty cards, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
... new methods for the positioning of the product in the market or sales channels? (For example, use for the first time of franchises or distribution licences, direct sale, exclusive retail, new concepts for the presentation of the product, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
... new methods for establishing the prices of the goods or services? (For example, use for the first time of a system of prices that vary by demand, discount systems, etc.)	<input type="checkbox"/>	<input type="checkbox"/>

If the answer has been NO to all questions from section J.1 → Go to section K

## J.2 Who developed these commercialisation innovations?

(Select only the most adequate option)

Mainly the company or group of companies ☐

Mainly the company, together with other companies or institutions (including consultants) ☐

Mainly other companies or institutions (including consultants) ☐

## J.3 Indicate the degree of importance of the objectives of the commercialisation innovations introduced by the company during the 2009-2011 period

	Degree of importance			
	High	Medium	Low	Not applicable
Increase or improvement in the market	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Introduction of products in new groups of clients	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Introduction of products in new geographic markets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## K. Tax deductions for R&D and innovation

### K.1 Is the company aware of the regulations on deductions for R&D and innovation activities?

YES ☐

NO ☐

### K.2 Use of information services regarding tax incentives for R&D and innovation

1. Has the company requested information or clarifications of the Treasury, regarding the tax incentives for R&D and innovation?
2. Has the company ever conducted a linked consultation with the Treasury, prior assessment agreements, or obtained motivated reports?
3. Has the company attended information sessions regarding tax incentives, organised by business associations?
4. Has the company attended information sessions regarding tax incentives, organised by a public institution?
5. Has the company used external and private legal and/or tax consultancy services regarding this matter?

### K.3 When the company plans its investment in R&D, does it consider the possible tax deduction that would arise?

YES

☐☐

### K.4 Has the company applied tax deductions for R&D or innovation in the year...

	YES	NO	Value (@ without decimals)
...2010?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
...2009?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
...2008?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
...2007?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>
...2006 or previous years?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="text"/>

## K.5 The deduction received allows for:

	<u>Y</u>	<u>N</u>
1. Maintaining or increasing the budget dedicated to R&D and innovation	<input type="checkbox"/>	<input type="checkbox"/>
2. Undertaking new R&D and innovation projects, or riskier projects	<input type="checkbox"/>	<input type="checkbox"/>
3. Beginning the R&D activities at the most opportune time	<input type="checkbox"/>	<input type="checkbox"/>
4. Having greater freedom in planning	<input type="checkbox"/>	<input type="checkbox"/>
5. Including new lines of business in the business strategy	<input type="checkbox"/>	<input type="checkbox"/>
6. Other (specify)	<input type="checkbox"/>	<input type="checkbox"/>

## K.6 If the company has not applied tax deductions for R&D or innovation, indicate the importance that each one of the following reasons has had for the company

Degree of importance	High	Medium	Low	Not applicable
The company has very little R&D expenditure	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The taxable base of the company is usually small or null	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The regulations have ambiguities that cause the fear that an application of them will provoke an inspection	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The application procedure requires too much time and is not worth it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The concept of R&D expenditure considered in the regulations does not adjust to the Innovation activities performed in the company	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Difficulty in identifying and accounting for the R&D and innovation activities in the company	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Difficulty in providing justification documentation to the Treasury for the projects and expenses made	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other reasons	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Observations:

---

---

---

---

**Thank you for your collaboration**

# Annex

## 1. Scientific Research and Experimental Development Activities (R&D)

### 1.1 Basic definitions

**Scientific research and experimental development (R&D)** is comprised of the creative work carried out systematically in order to increase the volume of knowledge, including the knowledge of man, culture and society, and the use of this knowledge to create new applications.

The criterion referring to *creative work carried out systematically* is satisfied by **projects with specific objectives and a budget**.

The term R&D comprises three activities: basic research, applied research and experimental development:

- **Basic research** consists of experimental or theoretical work that is mainly undertaken to obtain new knowledge on the essentials of observable phenomena and facts, without considering giving them any particular application or use whatsoever.

- **Applied research** also consists of the original work carried out to acquire new knowledge; however, it is mainly directed towards a specific practical objective.

- **Experimental development** consists of systematic work based on existing knowledge, obtained from the research and/or practical experience, aimed at the production of new materials, products or devices; at the establishment of new processes, systems and services, or at the substantial improvement of those already existing.

A **criterion** that allows R&D to be distinguished from other related activities is the existence, within the core of R&D, of an appreciable element of innovation, and the resolution of a scientific and/or technological uncertainty; in other words, R&D appears when the solution to a problem is not evident to someone who is perfectly aware of the set of knowledge and basic techniques customarily used in the sector at hand.

**Not constituting R&D** are those activities that do not contain an appreciable element of innovation, nor those routine activities that do not imply the resolution of a scientific or technological uncertainty.

### 1.2 Staff in R&D

All staff directly employed in R&D must be accounted for, as well as those persons who provide services directly related to R&D activities, for example, executives, administrators and office staff.

**Researchers** are professionals working in the conception or creation of new knowledge, products, processes, methods and systems, and in the management of the respective projects. (This includes graduate students who develop R&D activities).

**Technicians** and similar staff are persons whose main tasks require technical knowledge and experience in one or various fields of engineering, physical and life sciences, or social sciences and humanities. They participate in R&D, carrying out scientific and technical tasks that require the application of operational methods and principles, generally under the supervision of researchers.

**Auxiliary staff** (remaining staff) includes workers, both qualified and unqualified, and secretaries and office staff, who participate in the execution of R&D projects, or who are directly related to the execution of said projects.

The following is an indicative (not comprehensive) list of professionals from each of the categories of the staff employed in R&D.

#### • RESEARCHERS

##### **Physics, mathematics and engineering professionals**

Physicists, chemists and related professionals

Mathematicians, statisticians and related professionals

IT professionals

Architects, engineers and related professionals

##### **Life and health sciences professionals**

Life sciences professionals

Health sciences professionals

##### **Teaching professionals**

Professional teachers in Universities and Higher Education Institutions

##### **Other professionals**

Business professionals

Legal sciences professionals

Archivists, librarians, documentation and information professionals

Social sciences and related professionals

Research and development department managers

#### • TECHNICIANS AND EQUIVALENT STAFF

##### **Professionals related to physics and engineering**

Physics and engineering technicians

IT-related professionals

Operators of optical and electronic equipment

Naval and air technicians and controllers

Security and quality control inspectors

##### **Security and quality of life professionals and associated health professionals**

Life sciences technicians and associated related professionals

New associated health professionals (except nursing)

##### **Other**

Professionals in statistics and mathematics and other related associated professionals

#### • OTHER SUPPORT STAFF

##### **Office staff**

##### **Workers skilled in agriculture and fishing**

##### **Plant and machinery operators and assemblers**

##### **Associated administrative professionals**

##### **Legislators, civil servants and management executives n.e.c.**

### 1.3 Staff in R&D on FTE

The staff on a full-time equivalent (FTE) is the sum of the staff that works full-time, and the fractions of time of the staff that works part-time, in R&D activities. Therefore, a person dedicated full-time to R&D shall be counted as 1, and a person who dedicates 20% of their time to R&D shall be counted as 0.2. If someone works for three months full-time during the year, s/he will be counted as 0.25, as this is a quarter of the year. If a person works for part of the year full-time, and part of the year part-time, an estimation of the annual dedication to R&D will be calculated with a weighting (if s/he is, for example, 3 months full-time and 9 months 20% dedicated to R&D, then we calculate:  $0.25 \times 1 + 0.75 \times 0.2 = 0.4$ ).

### 1.4 R&D in software development

In order to classify a software development project as R&D, it is necessary for its undertaking to produce scientific and/or technical progress, and for its objective to be that of systematically solving a scientific and/or technological uncertainty.

Classified in R&D must be the software that forms a part of an R&D project, as well as the research and development activities associated with a software, if it constitutes a finished product.

The following examples illustrate R&D activities in software:

a) The production of new theorems or algorithms in the theoretical field of Computational Sciences

b) The development of Information Technologies at a level of operating systems, programming languages, data processing, communication software and software development tools

c) The development of Internet technology

d) The research on methods for the design, development, effective use and maintenance of the software

e) The development of software that produces advances in general approximations of the collection, transmission, storage, recovery, manipulation or visualisation of information

f) The experimental development aimed at bridging gaps in knowledge technology, necessary for developing software systems or programmes

g) The R&D on tools or technologies in specific computation areas (image processing, geographical representation of data, character recognition, artificial intelligence and other areas).

Not constituting R&D are those activities of a routine nature that do not imply scientific or technological advances. For example, not considered to be R&D are:

- a) The development of software or business information systems applications, using known methods or pre-existing software tools
- b) The support for existing systems
- c) The conversion and/or translation of IT languages
- d) The adaptation of programs to specific users
- e) The filtering of systems errors
- f) The adaptation of existing software
- g) The preparation of user documentation

### 1.5 R&D in construction

- a) Research in new concepts based on the sustainability and the quality of life in:
  - a. Planning and design
  - b. Undertaking the job
  - c. Use patterns
  - d. Maintenance and repair
- b) Research in materials: properties and applications
- c) Development of new constructive techniques
- d) Development of calculation and design tools
- e) Development of validation standards and procedures
- f) Development of applications based on information and communication technologies
- g) Development of equipment, advanced machinery and auxiliary elements of support for the constructive process

### 1.6 R&D in services activities

The following criteria must be considered at the time of identifying R&D projects:

- a) Links with public research laboratories
- b) Employment of staff with a doctorate
- c) Publication of results in scientific magazines or conferences
- d) Construction of a prototype or pilot factory

#### A) Examples of R&D in banking and insurance:

- a) Mathematical research related to financial risk analysis
- b) Development of risk models for credit policies
- c) Experimental development of new software for *home banking*
- d) Development of techniques for researching consumer behaviour, for the purpose of creating new types of accounts or banking services
- e) Research to identify new risks or other characteristics of risks that must be considered in insurance contracts
- f) Research in social phenomena that have an impact on new types of insurance (health, retirement, etc.), such as insurance that covers *non-smokers*
- g) R&D related to electronic banking and insurance, Internet services and electronic commerce applications
- h) R&D related to new or significantly improved services from the financial sector (new concepts of accounts, loans, insurance or savings instruments)

#### B) Examples of R&D in other services activities:

- a) Analysis of the effects of economic and social changes on free time consumption and activities
- b) Development of new methods for measuring the expectations and preferences of consumers
- c) Development of new methods and instruments for surveys
- d) Development of procedures for the drawing and follow-up of trajectories (logistics)
- e) Research on new concepts of travel and holidays

## 2 Innovation Activities

### 2.1 Basic definitions

**Activities for technological innovation** are comprised of all those scientific, technological, organisational, financial and commercial stages, including the investment in new knowledge, **aimed at the introduction of new or significantly improved products (goods or services) or processes.**

**R&D constitutes only one of these activities**, and may be carried out in different stages of the innovation process, not only as an original source of creative ideas, but also as a means of solving problems that might arise at any stage until its completion.

The following activities should be considered for technological innovation:

1. Internal R&D activities
2. Acquisition of R&D (external R&D)
3. Acquisition of machinery and equipment (not included in previous sections)
4. Acquisition of other external knowledge (not included in previous sections)
5. Training
6. Introduction of innovations in the market
7. Design, other preparations for production or distribution

### 2.2 Innovations

Innovation, as defined in this survey, may be identified from the following points of view:

#### 2.2.1 INNOVATION IN PRODUCTS (GOODS OR SERVICES)

- New technology allows for a better performance of the good or service
- A broadening is achieved of the level of products or services

*Examples: substitution of existing materials by materials with improved characteristics (breathable materials, light but resistant compounds, ecological plastics), incorporation of software that improves accessibility or commodities, as well as the broadening of new functions in already existing products (mobile phones with cameras, two-size printing in photocopiers, etc.) introduction of ecological products, use of cards with microchips, customer card systems, DIAL-IN services, electronic banking and insurance, services related to the Net and electronic commerce (except the creation of a website of information without online services).*

#### 2.2.2 INNOVATION OF PROCESSES

##### 2.2.2.1 Processes with the following characteristics:

- greater automation or integration
- greater flexibility
- improvement in quality
- improvement in security or the environment

*Examples: automatic selection of orders, automatic follow-up of shipments, communication of data, connection of transport systems, barcode systems, optical data process, expert systems, software for system integration, use or development of software tools, implementation of CAD/CAE systems. The ISO certification is innovative only if it is directly related to the introduction of new or improved processes.*

##### 2.2.2.2 Logistics and control of the following characteristics:

- greater efficiency and better planning, due to new technologies
- greater flexibility in distribution
- improvement in stock control

*Examples: management information systems, total quality management, orders systems, stock minimisation systems, product exchange systems, transport logistics, computer-assisted logistics.*

#### 2.2.3 ORGANISATIONAL INNOVATIONS

An organisational innovation consists of the implementation of new organisational methods, in the internal functioning of the company (including knowledge management methods/systems), in the organisation of the workplace, or in the external relations that have not previously been used by the company. It must be the result of strategic decisions made by the management of the company. **It excludes** mergers or acquisitions, although they may imply an organisational innovation for the company.

## 2.2.4 COMMERCIALISATION INNOVATIONS

A commercialisation innovation is the implementation of new trade strategies or concepts that differ significantly from those prior, or that have not previously been used. This must imply a significant change in the design or packaging of the product, in the positioning of the same, as well as in its promotion and price. **It excludes** seasonal, regular and other similar changes in the commercialisation methods. These innovations imply a search for new markets, but not changes in the use of the product.

## 2.3 Examples of specific innovations by sector

### 2.3.1 MANUFACTURING INDUSTRY

#### Product-oriented innovations:

- a) inclusion of ecological products
- b) lifetime guarantee of new or used products
- c) inclusion of services:
  - combined solutions, for example, the sale of the product including maintenance
  - tests, exams and certification of services
  - provision of financial services for the clients (for example, loans, insurance)
- c) change of materials in the production of goods (such as, for example, *breathable* water-resistance mountaineering equipment)
- e) modules for the life sciences area, produced by bioengineering
- f) introduction of cards with microchips
- g) use of telematics in motor vehicles
- h) motor vehicles with pollutant reduction (for example, buses that run on natural gas)
- i) electronic stabilisation programmes in motor vehicles
- j) new types of paper for specific printers
- k) new types of propellant for boats
- l) high voltage lines that are isolated with gas
- m) remote maintenance
- n) microwave ceramics and surface wave filters for mobile communication

A change in the name or packaging of existing goods as a means of penetrating another market is not considered innovation

#### Process-oriented innovations:

- a) digitalisation of printing processes
- b) new type of blade for the production of wood products
- c) new type of unit for water removal
- d) application in series of polishes or varnishes in powder for varnishing metal
- e) new processes in the production of acids
- f) electronic hiring systems
- g) new CAD systems
- h) information distribution systems
- i) interconnected data processing systems, computational networks
- j) introduction of simulation programmes by finite elements, for component optimisation
- k) use of electronic commerce in manufacturing
- l) direct product-client feedback
- m) Internet-based route follow-up systems in real time

### 2.3.2 CONSTRUCTION

#### Product-oriented innovations

Design and assessment techniques, materials, construction techniques, specialised services and applications of information and communication technologies that enable:

- a) the inclusion of ecological products
- b) energy savings and efficiency
- c) the increase in the life cycle of the product
- d) the improvement in the use and comfort conditions (heating/air-conditioning, insulation, soundproofing, etc.)
- e) the interaction with persons and environmental conditions (domotics, environmental intelligence, etc.)
- f) the follow-up and/or control of the conditions of use, maintenance and conservation
- g) the remote control and or assistance
- h) the increase in the security conditions of use and/or maintenance

#### Process-oriented innovations

Design and assessment techniques, materials, construction materials, constructive elements and processes, acquisition of advanced machinery, applications of information, communication and automation technologies and systems for inspection, assessment and repair that enable:

- a) recycling and valuation of waste
- b) savings in materials and their reuse
- c) the reduction of the effects on the environment (noise, visual contamination, occupation of space, etc.)
- d) the significant improvement of the structural and functional properties of the materials
- e) the automation and mechanisation of processes
- f) the design, fabrication and testing of new systems and auxiliary elements to improve the constructive processes
- g) systems for the most efficient management and planning (control of jobs and deadlines, management of suppliers, etc.)
- h) the increase in on-the-job security conditions
- i) construction in unique conditions

### 2.3.3 WHOLESALE TRADE

#### Product-oriented innovations:

- a) inclusion of ecological products in the product catalogue
- b) lifetime guarantee of new or used products
- c) new types of certification services
- d) inclusion of additional services:
  - combined solutions of technical services and consultancy
  - services for checking, examination and certification
- e) adoption of financial services:
  - payment by teletex
  - electronic banking
  - use of cards with microchips or SMART CARDS that allow for payment without money
- f) adoption of tasks from the manufacturing sector
- g) consultancy and orders from the point of sale
- h) remote maintenance
- i) electronic commerce
- j) electronic hiring systems
- k) direct sale to the final consumer

#### Process-oriented innovations:

- a) check-out counters with scanners
- b) 24-hour services, extension of opening hours and admission
- c) development and introduction of digital distribution channels
- d) laptop computers for salespersons as support for direct purchases
- e) electronic hiring systems
- f) digital product labelling, for example, barcodes
- g) reconstruction or reorganisation of sales rooms, if this enables consumer purchases
- h) receipt of orders by computer, with information regarding invoicing
- i) electronic catalogues, for example, on CD-ROM

- j) solutions based on call-centres
- k) service workshop or own garage
- l) training of qualified human resources to offer consultancy services to consumers
- m) new CAD systems
- n) information distribution systems
- o) interconnected data processing systems, computational network software
- p) establishment of direct feedback channels between the consumer and the producer
- q) customer service centre to coordinate consumer requests

### 2.3.4 FINANCIAL SERVICES

#### Product-oriented innovations:

- a) new or significantly improved financial services:
  - online banking
  - telephone banking
- b) new or significantly improved insurance services:
  - introduction of concepts of life insurance by modules
  - new professional disability insurance
- c) adoption of insurance services by banking companies and vice-versa
- d) adoption of real estate intermediation services:
  - real estate merchanting services
  - real estate valuation services
  - real estate property management
- e) introduction of direct payment card systems in hospitals

#### Process-oriented innovations:

- a) online banking
- b) control tools by telephone
- c) new or improved software or computer networks
- d) application of new risk diversification methods
- e) document archive by optical-electronic means
- f) management of an office without paper
- g) improved payment systems with payment
- h) introduction of point of sale trade policy
- i) introduction of new ranking methods (rating or scoring)

### 2.3.5 OTHER SERVICES

#### Product-oriented innovations:

- a) automation of transactions with credit cards or debit cards
- b) adoption of tasks from the manufacturing sector
- c) remote maintenance of software, long-distance consultancy
- d) new statistical analysis methods
- e) development of flexible software to order
- f) hiring of environmental or energy services
- g) provision of new multimedia applications
- h) new logistics services
- i) voice response systems
- j) dial-in services

#### Process-oriented innovations:

- a) electronic data exchange
- b) undertaking of CAD/CAM projects
- c) electronic banking
- d) CASE tools for the creation of software to order
- e) automatic document creation
- f) improvement of the computer networks
- g) network management systems
- h) call management systems
- i) application of thermographic methods to evaluate technical systems
- j) Internet-based route follow-up systems in real time
- k) satellite navigation systems
- l) new software systems for the management of the chain of supply
- m) introduction of buses run on natural gas
- n) introduction of buses with a lowered floor

### 2.3.6 ORGANISATIONAL INNOVATIONS

- new organisational methods of routines and processes in work development.
- introduction of new practices in order to improve learning and knowledge. One example of this might be the creation of a Manual of Good Practices accessible to the entire company. Another example is the implementation of systems to improve the development and loyalty of workers in the company via continuous training courses.
- introduction of integrated engineering and development, or production and sales, systems
- introduction of a High Performance Work System (HPWS), characterised by an integral organisation, and worth noting flat hierarchical structures, task rotation, teams with their own responsibility, multitasks, a greater participation of employees at lower levels in decision-making and the substitution of vertical communication channels by other horizontal channels.
- establishment of new paths of relations with other companies or public institutions, such as, for example, partnership agreements with research institutes, as well as new types of relations with clients and suppliers, or subcontracting some activities of the company: production, distribution and support services.
- implementation of strategies through the use of a new software, aimed at encouraging knowledge, with different company departments participating.
- creation of a new department as a result of the union or separation of other existing departments

### 2.3.7 COMMERCIALISATION INNOVATIONS

- actions aimed at a better response to client needs, at the opening of new markets or at a new positioning of its products in the market, all with the final objective of increasing sales. These must be new actions, that is, not used previously in the company.
- significant changes in product design as a part of a new concept of commercialisation.
- introduction of new sales channels: franchising systems, direct sales or the concession of distribution licences.
- use for the first time of new means for the promotion or advertising of its products: inclusion of advertising within TV programmes, use of celebrities as the image of the company, etc.
- significant changes in the logos of the company, aimed at achieving a new corporate image
- issue of "client cards", with advantages to award the loyalty of company clients.
- introduction of different final presentations of a product, according to the target market (different covers and font types for children or adults, for the same book)
- introduction of price strategies, in accordance with the demand for the products, for example, strategies for lowering the prices of the least-demanded items in order to thus boost their sales. Those price strategies whose only objective is to differentiate prices according to client brackets, for example, the application of different fees, depending on the amount of the product requested by the client, **is not** considered a commercialisation innovation.

#### Differentiations necessary between organisational innovations and process innovations.

The changes implied by organisational innovations affect the organisation of the work and the distribution of human resources of a company, whereas process innovations imply the implementation of new, specific equipment, machinery and software.

#### Differentiations necessary between commercialisation innovations and product innovations.

Commercialisation innovations imply changes in the image or the final finish of a product, whereas product innovations imply substantial changes the composition of the product itself. Example: a mere change in the flavour of a yoghurt would be a commercialisation innovation, but if we add some vitamin compound to the yoghurt, enriching its composition, this would

be a clear product innovation, by changing its use. If the objective is only to seek the broadening of the market, it is a commercialisation innovation.
