

25 May 2018

Industrial Price Index. Base 2015

April 2019. Provisional data

La variación anual del Índice de Precios Industriales se sitúa en el 2,3%, una décima por debajo de la registrada en marzo

La tasa mensual de los precios industriales es del 0,6%

Evolución anual de los precios industriales

La tasa anual del Índice de Precios Industriales (IPRI) general en el mes de abril es del 2,3%, una décima por debajo de la registrada en marzo.

Por destino económico de los bienes, entre los sectores industriales con influencia negativa en la evolución de la tasa anual del IPRI general destaca:

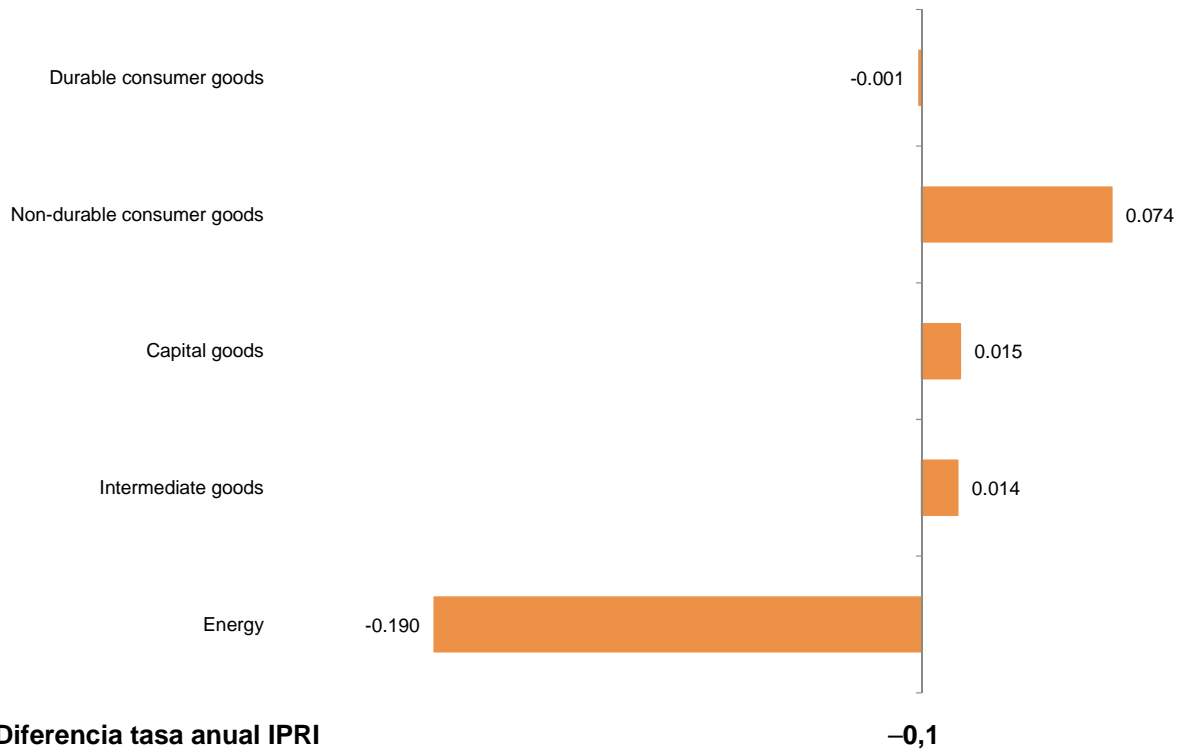

- **Energía**, que disminuye su variación anual siete décimas y la sitúa en el 7,0%. Este comportamiento se debe a que los precios del *Refino de petróleo* suben este mes menos que en abril de 2018, y a que los precios de la *Producción de gas; distribución por tubería de combustibles gaseosos* bajan este mes, mientras que subieron el año pasado.

Cabe reseñar también, aunque en sentido contrario, el aumento de los precios de la *Producción, transporte y distribución de energía eléctrica*, frente a la estabilidad de los mismos el año anterior.

Por su parte, el sector industrial con mayor influencia positiva es:

- **Bienes de consumo no duradero**, que presenta una tasa del -0,6%, tres décimas superior a la de marzo, causada, fundamentalmente, por la subida de los precios del *Procesado y conservación de carne y elaboración de productos cárnicos*, que se mantuvieron estables en abril de 2018.

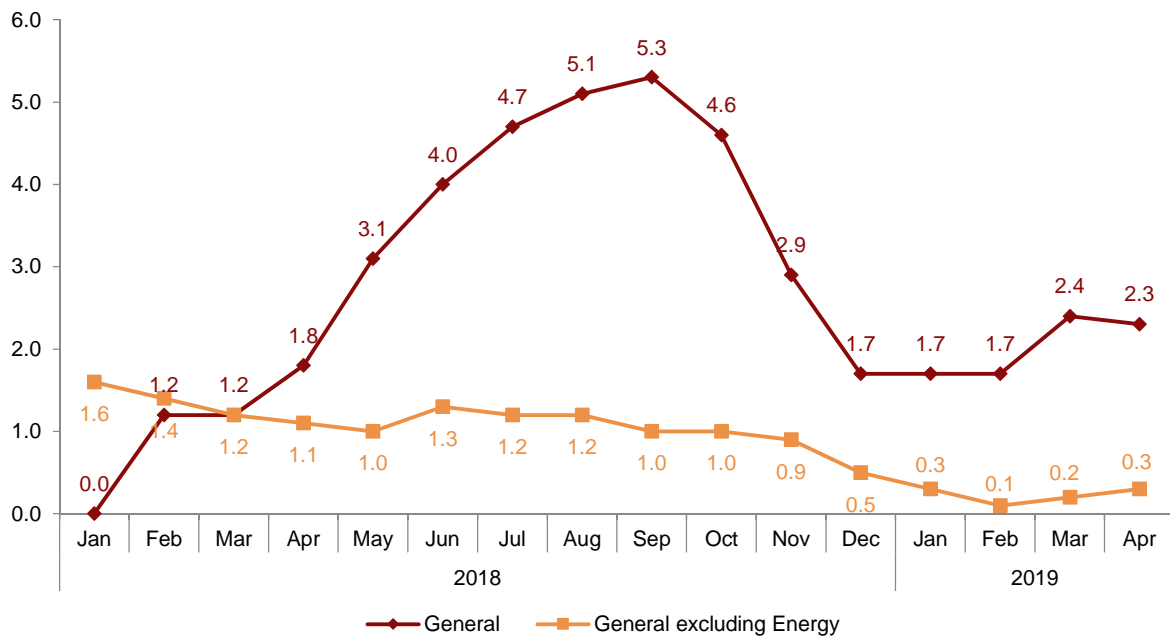

Influencia de los sectores industriales en la tasa anual del IPRI

La tasa de variación anual del índice general sin Energía sube una décima hasta el 0,3%, con lo que se sitúa dos puntos por debajo de la del IPRI general.

Evolución anual del IPRI

Índice general y general sin Energía. Porcentaje

Evolución mensual de los precios industriales

En abril la tasa de variación mensual del IPRI general es del 0,6%.

Por destino económico de los bienes, los sectores industriales con mayor repercusión mensual positiva en el índice general son:

- **Energía**, cuya tasa del 1,4%, que repercute 0,457, es consecuencia del aumento de los precios de la *Refino de petróleo* y, en menor medida, de la *Producción, transporte y distribución de energía eléctrica*.

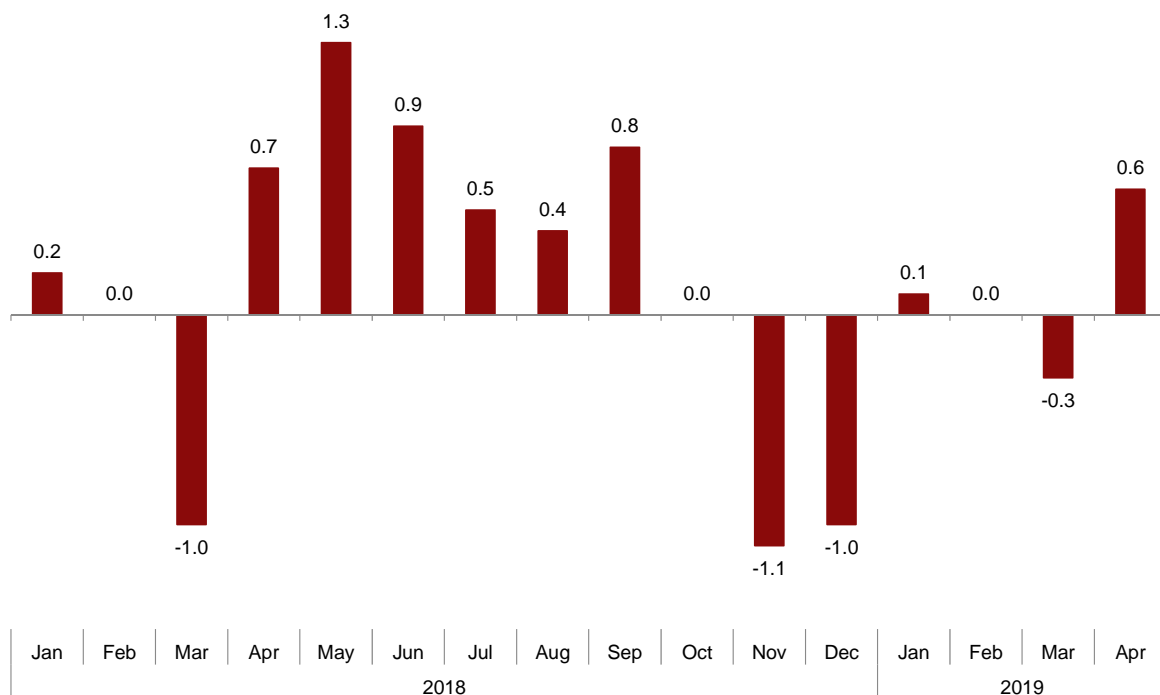

También influye, aunque en sentido contrario, la bajada de los precios de la *Producción de gas; distribución por tubería de combustibles gaseosos*.

- **Bienes de consumo no duradero**, con una variación del 0,3% causada, fundamentalmente, por la subida de los precios del *Procesado y conservación de carne y elaboración de productos cárnicos*. La repercusión de este sector en el índice general es de 0,068.

- **Bienes intermedios**, que presenta una tasa del 0,2% y una repercusión de 0,068. Destaca en esta evolución el incremento de los precios de la *Fabricación de productos químicos básicos, compuestos nitrogenados, fertilizantes, plásticos y caucho sintético en formas primarias*.

Evolución mensual del IPRI

Índice general. Porcentaje

En un análisis más detallado, se pueden observar las actividades que más han afectado a la tasa mensual del IPRI en el mes de abril.

Actividades con mayor repercusión positiva en la tasa mensual del IPRI

| Activity (CNAE-09 groups) | Monthly rate (%) | Contribution |
|--|-------------------------|---------------------|
| Manufacture of refined petroleum products | 4.2 | 0.385 |
| Electric power generation, transmission and distribution | 0.8 | 0.124 |
| Processing and preserving of meat and production of meat products | 2.4 | 0.120 |
| Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms | 1.4 | 0.048 |
| Manufacture of basic iron and steel and of ferro-alloys | 0.9 | 0.016 |
| Manufacture of basic precious and other non-ferrous metals | 1.0 | 0.015 |

Actividades con mayor repercusión negativa en la tasa mensual del IPRI

| Activity (CNAE-09 groups) | Monthly rate (%) | Contribution |
|---|-------------------------|---------------------|
| Manufacture of gas; distribution of gaseous fuels through mains | -1.0 | -0.052 |
| Manufacture of vegetable and animal oils and fats | -1.7 | -0.034 |
| Manufacture of electric motors, generators, transformers and electricity distribution and control apparatus | -2.0 | -0.015 |

Resultados por comunidades autónomas. Tasas de variación anual

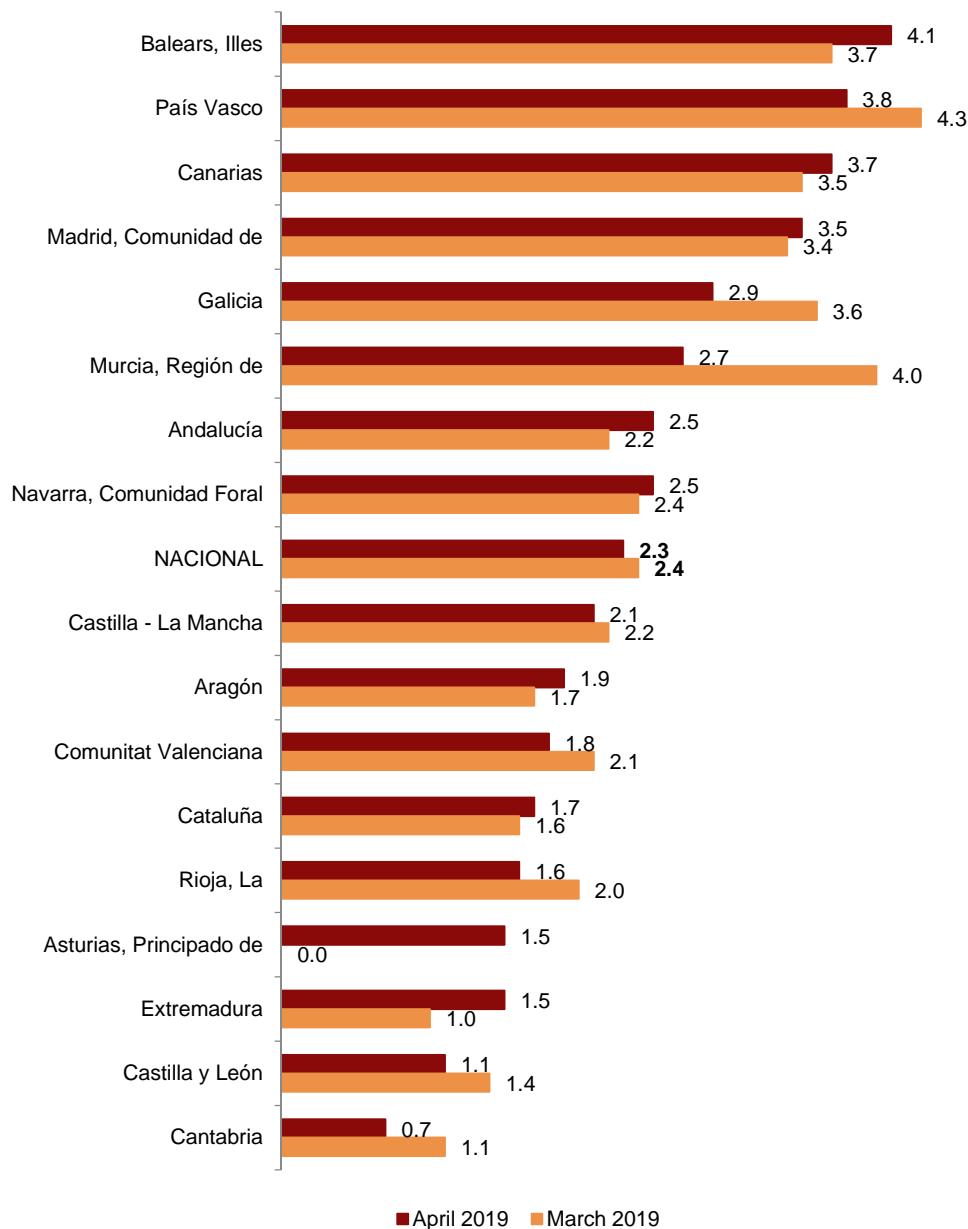

La tasa anual del IPRI aumenta en nueve comunidades autónomas y disminuye en las ocho restantes.

Los mayores incrementos se producen en Principado de Asturias, Extremadura e Illes Balears, con subidas de 1,5 puntos, cinco y cuatro décimas, respectivamente.

Por su parte, Región de Murcia, Galicia y País Vasco, registran los mayores descensos en sus tasas anuales, con bajadas de 1,3 puntos, siete y cinco décimas, respectivamente.

Tasas de variación anual del IPRI

Revisiones y actualización de datos

Coincidiendo con la publicación de hoy, el INE ha actualizado los datos de la serie del IPRI correspondiente a los tres últimos meses, haciéndose definitivo el mes de enero de 2019. Los resultados están disponibles en INEBase.

Nota metodológica

El Índice de precios industriales (IPRI) es un indicador coyuntural que mide la evolución mensual de los precios de los productos industriales fabricados y vendidos en el mercado interior, en el primer paso de su comercialización, es decir, los precios de venta a salida de fábrica, excluyendo los gastos de transporte y comercialización y el IVA facturado.

Tipo de encuesta: continua de periodicidad mensual.

Año base: 2015.

Periodo de referencia de las ponderaciones: año anterior al corriente.

Ámbito poblacional: establecimientos industriales.

Tamaño muestral: 9.000 establecimientos industriales y 1.500 artículos.

Número de observaciones: aproximadamente 28.000 precios mensuales.

Método general de cálculo: Laspeyres encadenado.

Método de recogida: internet (sistema IRIA), correo electrónico, fax, teléfono o vía postal.
