**Industrial Price Index (IPRI). Base 2005**  
July 2012. *Provisional data*

**Main results**

- The **interannual** rate of the IPRI for the month of July is **2.6%**, one tenth above the rate registered in June.
- The **monthly** variation of the general index is **0.8%**.
- The most **Autonomous Communities** register **positive interannual** rates in July.
- The Autonomous Community that records the greatest interannual variation is **Illes Balears**, with **5.6%**.

**Annual evolution of industrial prices**

The interannual variation of the Industrial Price Index (IPRI) stood at 2.6% in July, one tenth above the rate registered in June.

By economic destination of the goods, the industrial sectors with the highest positive effect on the general index were:

- **Energy**, whose interannual variation increased seven tenths, standing at **7.5%**. This rise was due to the increase in prices of the *Petroleum refinement and Production, transport and distribution of electrical energy* this month was higher than that registered the same month the previous year.

Worth noting the drop of six points in the annual rate of the *Production of gas; distribution of gaseous fuels through pipes*, standing at 9.0%, its lowest level since June 2010.

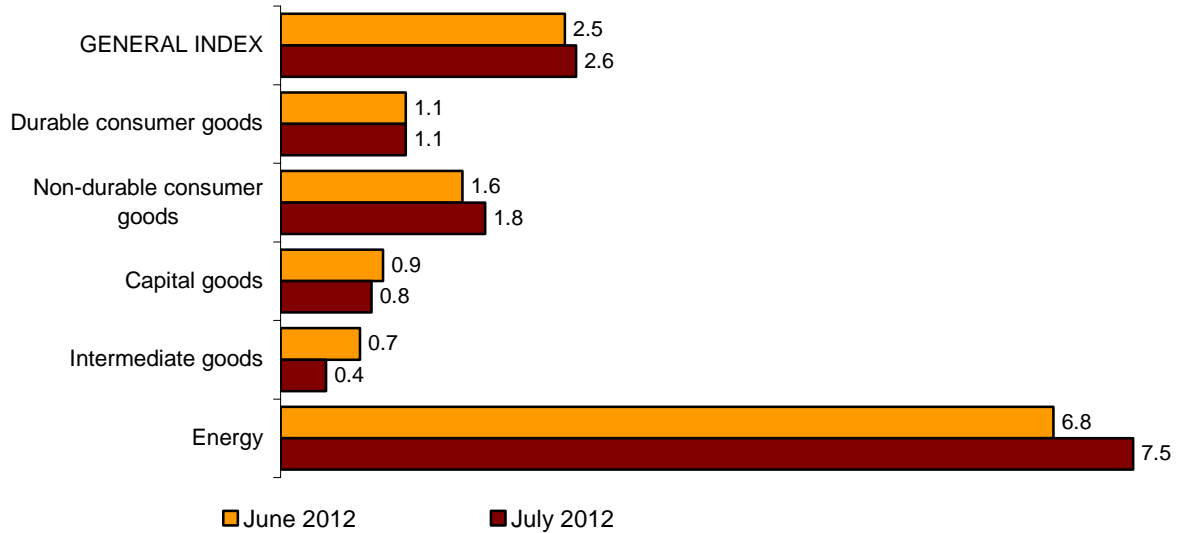

- **Non-durable consumer goods**, whose annual rate increased two tenth and stood at **1.8%**. The *Manufacture of vegetable and animal oils and fats* was the only activity that highlighting by its influence in this variation.

Despite the rise in the annual rate of the general IPRI, worth noting the decrease in the annual rate of the industrial sector:

- **Intermediate goods**, whose annual rate stood at **0.4%**, three tenths below than that registered in June and the lowest since March 2010. The activities that highlighting by its influence in this drop was the *Manufacture of basic iron, steel and ferro-alloy products* and the *Production of precious metals and other non-ferrous metals*. These industries presented the lowest annual rate since February 2010 and October 2009, respectively.

**Annual rates of the IPRI**

**General index and by economic destination**

**Monthly evolution of industrial prices**

In July, the monthly variation of the IPRI was **0.8%**.

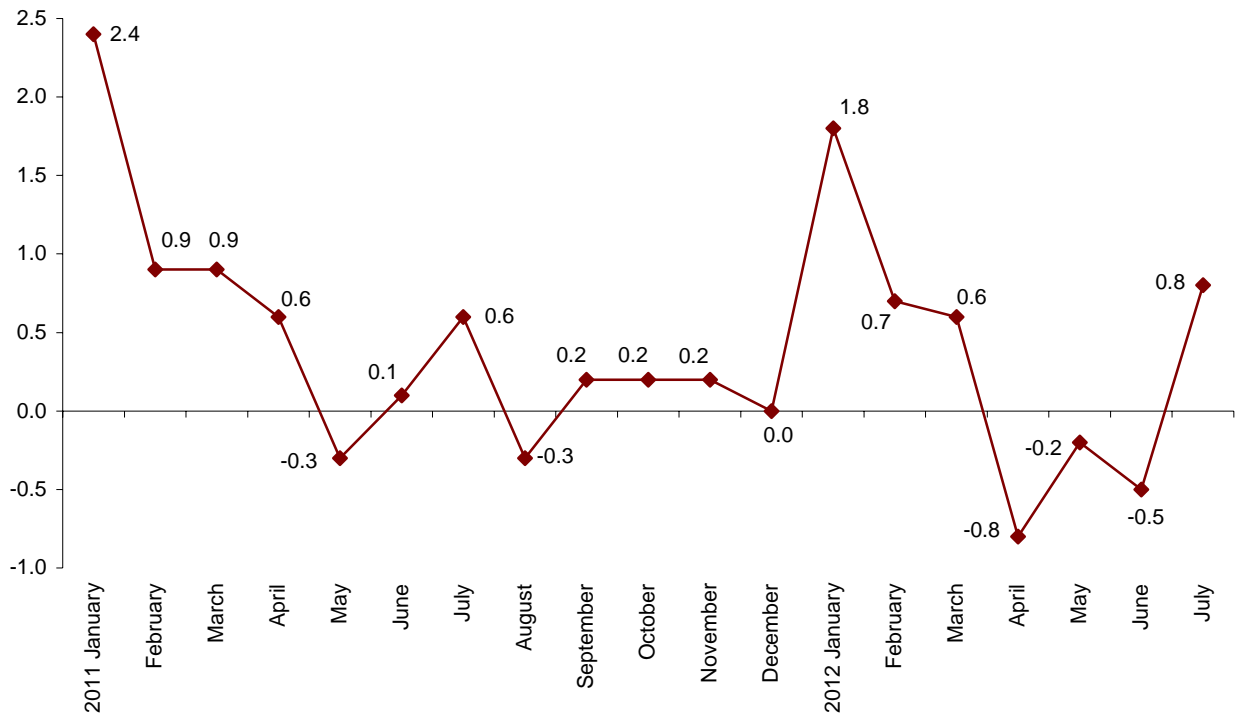

By economic destination of the goods, the sectors that presented the greatest positive monthly effect on the general index were:

- **Energy**, with a monthly variation of **2.8%**, that reflected the increase in prices of the *Production, transport and distribution of electrical energy* and the *Petroleum refinement*. Its effect on the general index was **0.743**.
- **Non-durable consumer goods**, with a monthly variation of **0.4%** contributed **0.078**. In these variation highlighting the increase in prices of the *Manufacture of vegetable and animal oils and fats*, *Processing and preserving of meat and production of meat products* and *Manufacture of other food products*.

In turn, the only sector with a negative effect in general index was:

- **Intermediate goods**, with a monthly variation of **-0.2%** contributed **-0.052**. This was due, mainly, to the decrease in prices of the *Manufacture of basic chemical products*, *nitrogen compounds*, *fertilisers*, *plastics* and *synthetic rubber in primary*.

**Monthly evolution of the IPRI  
General index**

A more detailed analysis showed the activities that most affected the monthly rate of the IPRI in the month of July.

**Activities with the greatest positive effect on the monthly rate of the IPRI**

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Production, transport and distribution of electrical energy	2.7	0.361
Petroleum refinement	3.6	0.331
Production of gas; distribution of gaseous fuels through pipes	2.0	0.035
Manufacture of vegetable and animal oils and fats	3.4	0.035

**Activities with the greatest negative effect on the monthly rate of the IPRI**

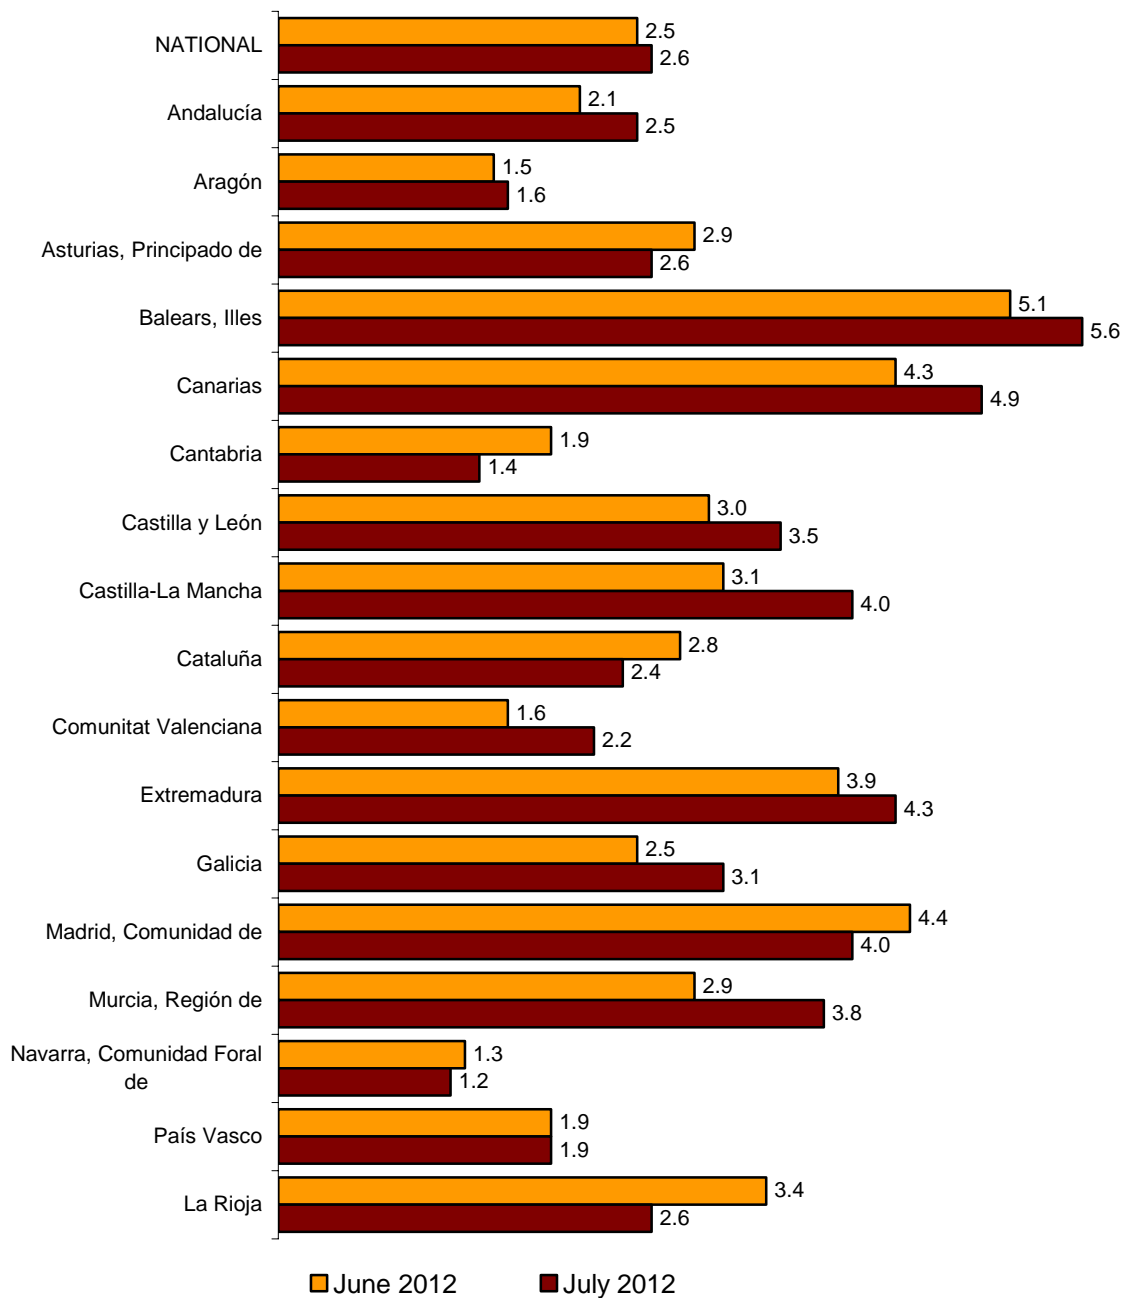

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary	-2.0	-0.058
Manufacture of elements made of concrete, cement and plaster	-0.4	-0.009
Manufacture of basic iron, steel and ferro-alloy products	-0.3	-0.007

**Results by Autonomous Community. Annual variation rates**

In most Autonomous Communities the annual rate increased in July. The greatest increases corresponded to Castilla-La Mancha and Region de Murcia, whose rates increased nine tenths reaching 4.0% and 3.8%, respectively.

In turn, La Rioja was the Autonomous Community with higher decrease of the annual rate (eight points), standing at 2.6%.
