Given that in 2017 Holy Week was celebrated in April, while in 2016 it was held in March, it is convenient to analyse both months together. Therefore, during the **first six months of 2017**, trips made by residents increased by 7.9% as compared with the same period of the previous year. This increase was evident for both trips with Spain as the main destination and trips abroad

If we focus on **trips during the Easter holidays**, in 2017 more than 7.5 million were made, with an increase of 13.8% compared to 2016.

¹ Given that in 2017 Holy Week was celebrated in April, while in 2016 it was held in March, it is convenient to analyse both months together

In turn, the lowest average daily expenditure were in Castilla-La Mancha (37 euros), Castilla y León (42) and Extremadura (43 euros).

The highest average daily expenditure by origin was made by residents in Illes Balears (96 euros), Cantabria (75) and Galicia (73).

In turn, the lowest were in Comunitat Valenciana and Extremadura (59 euros) and Castilla–La Mancha (60).

Monthly data

In April there were 18.6 million trips, in May 15.6 million and in June 16.1 million. Trips in April had an average duration of 3.4 overnight stays, exceeding the duration of trips in May and June, which were 2.9 and 3.0 nights, respectively.

April was the month with the lowest percentage of trips within the Autonomous Community of residence (46.2% against 51.1% in June). This is due both to the higher percentage of trips to other Autonomous Communities, which represented 45.6% of monthly trips in April, and abroad (8.2%).

Leisure was the main reason for trips during the quarter, representing 56.2% of the total in June Trips. Trips for professional purpose were higher in May, with 10.6% of the total.

April was the month with the greatest importance for non-market accommodation (64.1%), while, in June, market accommodation registered the greatest weight in the quarter (39.9%), with 25.2% for hotel accommodation and 14.7% from the remaining market accommodation.

Methodological note

The Tourism survey for Spanish residents (ETR/FAMILITUR) is a continuous survey with the main objective of providing monthly, quarterly and annual estimations of the trips made by the resident population in Spain and the main characteristics such as destination, duration, reason, accommodation, transport means, costs and sociodemographic characteristics of the travellers, among others. The diffusion of results and their disaggregation degree, depending on the study variable group, will be made with monthly, quarterly or annual reference.

The information is obtained by personal interviews to people aged 15 or older, selected at random in a sample of resident's houses, that collaborate three times in alternative months during six months, leave the sample for six months, and are interviewed three other times during the next semester. The people selected, provide information on the trips made in the two months before that of the interview. With an expected effective monthly sample of about 8,200 people, the information of a reference month is provided by about 16,400 people. Furthermore, the rotating panel scheme provides the efficient estimation of the annual change.

The full methodology of the survey can be reviewed in the web page of the INE⁶.
