

10 October 2017

Business Confidence Indicators (BCI)
Fourth quarter of 2017

The Harmonised Business Confidence Index (HBCI) decreases 1.1% in the fourth quarter of 2017 as compared with the third quarter

21.1% of the business establishments foresee a favourable quarter and 15.9% are pessimistic about the performance of their business

Evolution of the Harmonised Business Confidence Index

The Harmonised Business Confidence Index (HBCI) decreases by 1.1% in the fourth quarter of 2017 as compared with the third quarter. This index had six consecutive quarters with positive rates.

Harmonised Business Confidence Index (HBCI)
Quarter-on-quarter rate

Opinions regarding the coming quarter (Expectations)

21.1% of the establishments' managers thought that the performance of their business during the fourth quarter of 2017 will be favourable, whereas 15.9% thought that it will be unfavourable. The remaining 63.0% thought that it will be normal.

The difference between the percentages of favourable and unfavourable responses, known as *Expectations Balance*, stood at 5.2 points for Spain as a whole, as compared with 7.7 for the previous quarter.

Opinions regarding the coming quarter (Expectations)

Period	Favourable (%) (optimistic)	Normal (%)	Unfavourable (%) (pessimistic)	Balance (optimistic - pessimistic)
2015 Quarter IV	19.5	59.7	20.8	-1.3
2016 Quarter I	16.1	61.3	22.6	-6.5
Quarter II	20.1	61.7	18.2	1.9
Quarter III	20.3	58.3	21.4	-1.1
Quarter IV	18.9	60.5	20.6	-1.7
2017 Quarter I	17.0	62.9	20.1	-3.1
Quarter II	24.1	61.1	14.8	9.3
Quarter III	24.4	58.9	16.7	7.7
Quarter IV	21.1	63.0	15.9	5.2

Evolution of the Expectations Balance

Opinions regarding the last quarter (Situation)

22.4% of the establishments' managers expressed a favourable opinion regarding the performance of their business in the third quarter 2017. In turn, 17.1% had an unfavourable opinion.

The difference between the percentages of favourable and unfavourable responses referring to the last quarter, known as *Situation Balance*, stood at 5.3 points. This figure did not reach the *Expectations* previously expressed for that quarter, which stood at 7.7 points.

Opinions regarding the last quarter (Situation)

Period	Favourable (%) (optimistic)	Normal (%)	Unfavourable (%) (pessimistic)	Balance (optimistic - pessimistic)
2015 Quarter IV	21.0	57.7	21.3	-0.3
2016 Quarter I	20.8	58.3	20.9	-0.1
Quarter II	17.2	59.4	23.4	-6.2
Quarter III	19.6	59.6	20.8	-1.2
Quarter IV	20.8	58.5	20.7	0.1
2017 Quarter I	21.6	59.5	18.9	2.7
Quarter II	18.5	60.7	20.8	-2.3
Quarter III	23.5	60.5	16.0	7.5
Quarter IV	22.4	60.5	17.1	5.3

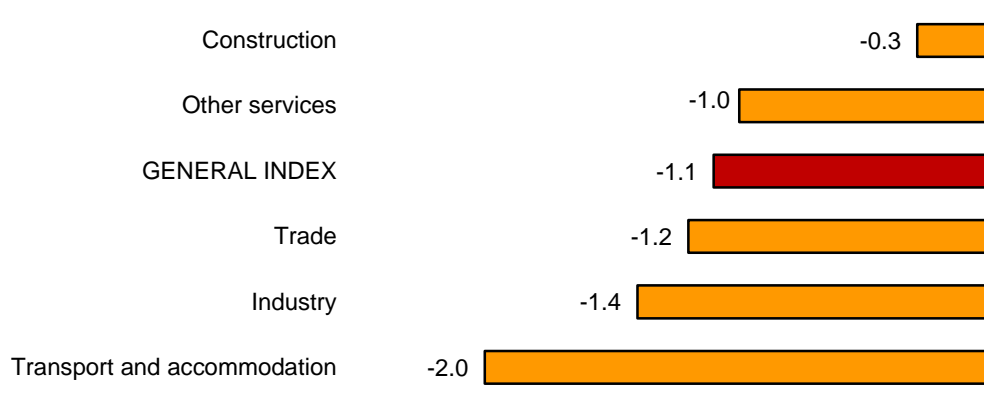

Evolution of the Situation Balance

Harmonised Business Confidence Index by activity sector

All the sectors analysed presented an improvement in confidence, as compared with the previous quarter. *Transport and Accommodation* (-2.0%) and *Construction* (-1.4%) registered the greatest decreases.

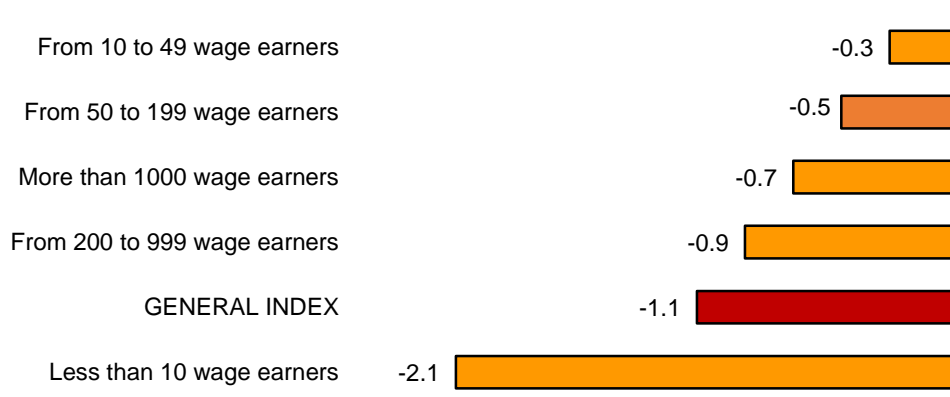

Quarter-on-quarter rate of the HBCI General Index and by activity sector

Harmonised Business Confidence Index by size of the establishments

All the sectors analysed presented an improvement on the confidence, as compared with the previous quarter. The *Less than 10 wage earning employees* bracket registered the largest decrease (-2.1%) and *From 10 to 49 wage earning employees* registered the lowest (-0.3%).

Quarter-on-quarter rate of the HBCI General Index and by size of the establishment

Harmonised Business Confidence Index. Results by Autonomous Communities

Business Confidence decreased in the fourth quarter of 2017 in 13 Autonomous Communities, as compared to the previous quarter and increased in the other four Autonomous Communities.

Illes Balears (-5.6%), Cantabria (-4.0%) and País Vasco (-2.5%) registered the greatest decreases. In turn, Canarias (3.1%) and Comunitat Valenciana (0.8%) registered the greatest increases.

**Quarter-on-quarter rate of the HBCI
National Index and by Autonomous Community**

Methodological note

The survey on which the Business Confidence Indexes (BCIs) are based is the first opinion poll conducted by the INE, and it is prepared based on a representative sample of establishments, whose opinions began to be collected since the first quarter of 2012.

The methodology of the survey enables the integration of the analogous data compiled by the statistics services of the Autonomous Communities, once their consistency is checked so they can be incorporated into the general process of the survey and according to the relevant agreements subscribed for this purpose.

The data from Andalucía, Illes Balears, Canarias, Castilla y León and Cataluña were integrated during the first quarter of 2013. Those for La Rioja in the third trimester of 2013, and since the third quarter of 2017 those of Extremadura.

The population scope of the survey is comprised of all those establishments whose main activity is included in the following sections of CNAE-2009: B to N (inclusive, except division 70), R (only divisions 92 and 93) and S (only divisions 95 and 96).

The BCIs gather the opinions of the establishment's managers regarding the performance of their business for each past quarter, and regarding their expectations for each coming quarter. The methodology is based on the Japanese **TANKAN** index i.e. there is no weighting or elevation depending on the characteristics of the establishment since the opinion of each informant is valued the same.

The BCIs are compiled and published quarterly. Three indicators are based on the following question from the questionnaire:

1. ¿Cómo valoraría la marcha del negocio en su establecimiento?

	<u>Favorable</u>	<u>Normal</u>	<u>Desfavorable</u>
1. En el trimestre que está acabando _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Para el trimestre que va a comenzar _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The **Harmonised Expectation Indicator** (known as **Expectations**) includes the difference or balance between the percentages of favourable and unfavourable responses with regards to the following quarter. It can fluctuate between -100 (all of the respondents are pessimistic - that is, they have marked the *Unfavourable* box - regarding the coming quarter) and +100 (all of the respondents are optimistic - that is, they have marked the *Favourable* box-).

An intuitive interpretation thereof is simple and direct. If the *Expectations* are positive, the optimists exceed the pessimists about the coming quarter.

The **Harmonised Situation Indicator** (known as **Situation**) is the difference or balance between the percentages of favourable and unfavourable responses with regard to the quarter that is ending.

The **Harmonised Business Confidence Index** (HBCI) is built using the *Situation* and the *Expectations*. The base for this index is the first quarter of 2013, and whose value for that first quarter is, therefore, equal to 100.

Information about the three indicators is disseminated for the national total and each activity¹ sectors and size of the establishments. Also for each Autonomous Community.

¹ For *Industry* and *Construction*, there is more information available about the climate indicators on the Business Tendency Survey, carried out by the Ministry of Industry, Energy and Tourism.

Business Confidence Indicators Fourth quarter of 2017

Provisional data

10 October 2017

1. Harmonized Business Confidence Index by sectors

Period	TOTAL	Industry	Construction	Trade	Transport and accomodation	Other Services
2015 Quarter IV	131.4	127.0	133.5	137.2	139.7	127.1
2016 Quarter I	129.7	126.3	132.2	135.5	133.7	126.3
Quarter II	130.5	126.7	128.9	135.3	140.7	126.8
Quarter III	131.2	126.8	132.2	137.2	140.8	126.5
Quarter IV	131.4	125.6	133.5	138.4	141.0	126.7
2017 Quarter I	131.8	128.2	136.6	137.0	136.7	127.7
Quarter II	134.2	129.1	140.7	138.0	141.7	130.2
