## Revisions and data update

On the press release day, INE has updated BTI data series corresponding to the last 13 months. In the case of calendar adjusted and seasonally and calendar adjusted series, according to INE standard, the series are revised since its beginning. The results are available at INEBase.

## Methodological note

The Business Turnover Index (BTI) is a short-term synthesis statistical operation aiming at obtaining an indicator to measure the short-term evolution of turnover, as a whole, for non-financial economic sectors: Extractive and manufacturing industries, Electrical energy and water, Trade and Non-financial services.

In order to obtain this indicator, the information from three surveys carried out by INE is being used. These surveys are the following: Industrial Turnover Indices (ITI), Services Sector Activity Indicators (SSAI) and Retail Trade Indices (RTI). For the rest of sectors not researched by INE, the information will be completed with data provided by the Tax Agency.

**Survey Type:** ongoing monthly.

**Base year:** 2015.

**Population scope:** the business turnover Index provides a comprehensive and weighted measure of the business turnover for the economic sectors *Extractive and manufacturing industries, the Supplying of electricity and water, Treatment and management of waste, Trade and Non-financial market Services.*

**Geographical scope:** the whole country.

**Results reference period:** calendar month.

**Information sources:** it is compiled using information from three statistical operations carried out by INE: Industry turnover indices (ITI), service sector activity indicators (SSAI) and retail trade indices (RTI). In addition, existing information from administrative registers is utilized: sales declared by large companies in their VAT returns in the sector not covered by the surveys previously mentioned.
