

3 June 2015

Export and Import Price Indices of Industrial Products. Base 2010 April 2015. Provisional data

The annual variation rate of the IPRIX stands at 1.5%, five tenths higher than in March

The annual variation rate of the IPRIM is -2.4%, five tenths over that registered the previous month

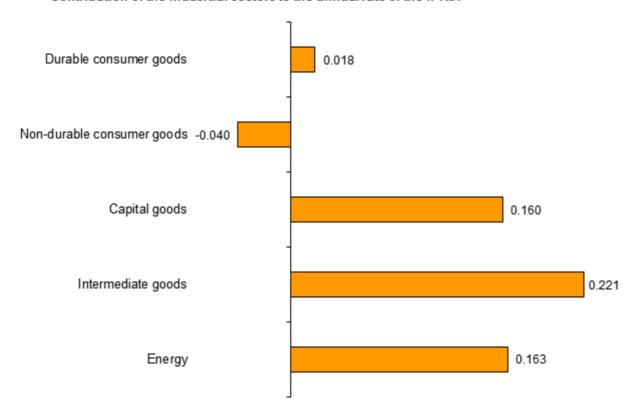

Annual evolution of export prices

The annual rate of the Export Price Index (IPRIX) was **1.5%** in the month of April, five tenths over that registered in March.

By economic destination of the goods, among the industrial sectors with an effect on the increase in the annual rate of the IPRIX, worth noting were:

- Intermediate goods, with a variation of 1.9%, six tenths over that registered in March. This was mainly due to the increase in the prices of Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms and Manufacture of precious metals and other non-ferrous metals as compared to the stability in April 2014. The latter activity registered its highest rate since July 2011.
- *Energy*, which presented a rate of **-4.2%**, almost than 3 points higher than that registered in March. In this behaviour, it was worth noting the increase in the prices of *Electric power generation, transmission and distribution,* which decreased in 2014, and of *Manufacture of refined petroleum products*, which remained stable in the previous year.
- *Capital goods*, which increased by four tenths its annual rate to **1.3%**, due to the increase in the prices of *Manufacture of motor vehicles*, which registered its highest rate since December 2012.

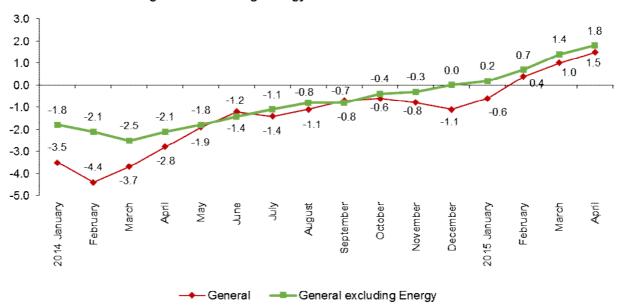

Contribution of the industrial sectors to the annual rate of the IPRIX

DIFFERENCE OF THE ANNUAL RATE OF THE GENERAL IPRIX 0.5

The annual variation rate of the general index excluding *Energy* increased up to 1.8%, standing three tenths over that of the general IPRIX.

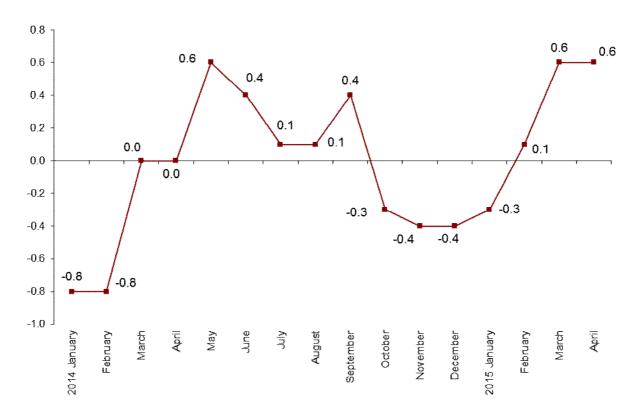

Annual evolution of the IPRIX
General index and general excluding Energy

Monthly evolution of export prices

In April 2015, industrial export prices registered a monthly rate of **0.6%**, as compared to the month of March.

Monthly evolution of the IPRIX General INDEX

By economic destination of the goods, all the industrial sectors had a positive monthly effect on the general index. Among them, worth noting were:

- *Intermediate goods*, whose rate stood at **0.7%**, with a contribution of **0.253**, due to the increase in the prices of the *Manufacture of basic chemicals*, *fertilisers and nitrogen compounds*, *plastics and synthetic rubber in primary forms* and *Manufacture of precious metals and other non-ferrous metals*.
- *Energy*, whose variation stood at **2.7%**, due to the raise in the prices of the *Manufacture of refined petroleum products* and *Electric power generation, transmission and distribution*. Its effect on the IPRIX was **0.139**.
- *Capital goods*, whose rate stood at **0.4%** and had a contribution of **0.129** to the general IPRIX, due to the increase in the prices of *Manufacture of motor vehicles*.

A more detailed analysis showed the activities that most affected the monthly rate of the IPRIX in the month of April.

Activities with the greatest positive effect on the monthly rate of the IPRIX

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Manufacture of motor vehicles Manufacture of basic chemicals, fertilisers and nitrogen, compounds, plastics and synthetic rubber in primary	0.7	0.129
forms Manufacture of basic precious and other non-ferrous	2.1	0.127
metals	2.6	0.085
Manufacture of refined petroleum products	2.1	0.079
Electric power generation, transmission and distribution	4.1	0.060
Manufacture of other chemical products	1.4	0.016
Manufacture of electric motors, generators, transformers		
and electricity distribution and control apparatus	0.8	0.015
Manufacture of pulp, paper and paperboard	0.7	0.012

Activities with the greatest negative effect on the monthly rate of the IPRIX

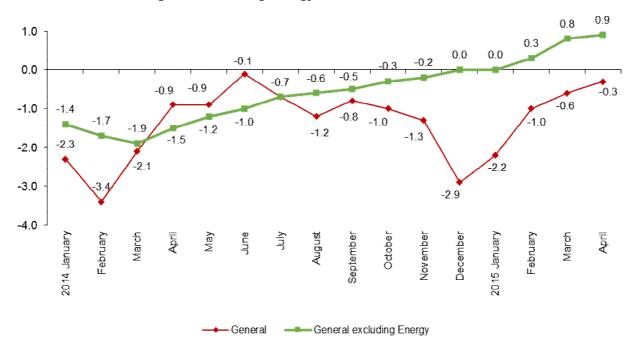

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Manufacture of basic iron and steel and of ferro-alloys	-0.4	-0.015
Cutting, shaping and finishing of stone	-1.9	-0.009
Manufacture of structural metal products	-0.6	-0.005

Annual evolution of industrial prices, aggregating the domestic and foreign markets

In April, the Industrial Price Index of the domestic and foreign markets, as the aggregation of the IPRI and the IPRIX, presented an annual rate of **–0.3%**, three tenths over that registered in March.

In turn, the annual variation rate of the **general index excluding** *Energy* stood at **0.9%**, that is, more than one point over that of the general IPRI+IPRIX.

Annual evolution of the IPRI-IPRIX General index and general excluding Energy

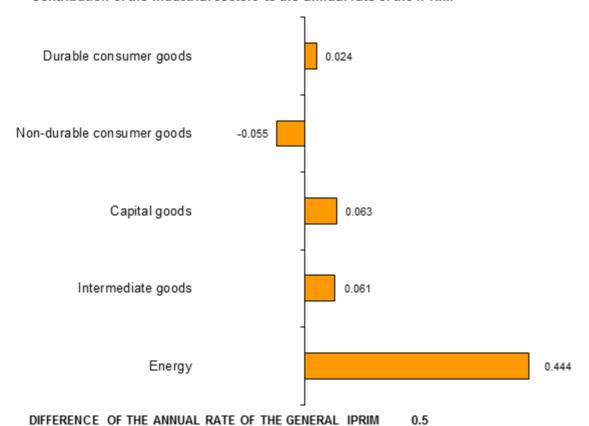

Annual evolution of import prices

The Import Price Index (IPRIM) registered an annual rate of **-2.4%** in April, five tenths higher than that of March.

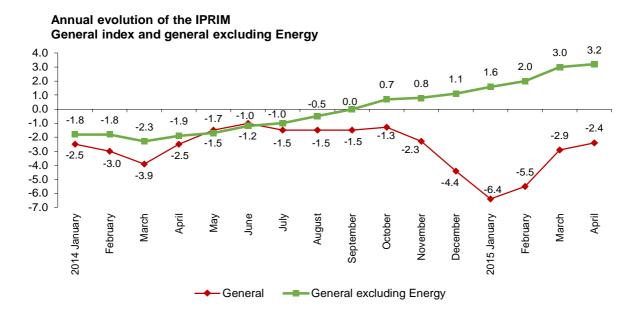

By economic destination of the goods, among the industrial sectors contributing to the increase in the annual rate of the IPRIM, worth noting:

- **Energy**, whose variation rose more than one and a half points, reaching **-20.1%**. This behaviour was mainly due to the increase in the prices of the *Manufacture of coke and refined petroleum products*, as compared to the decrease registered in 2014, and to the increase in the prices of *Extraction of crude petroleum and natural gas*.
- Capital goods, whose annual rate stood at 2.2%, three tenths higher than that of the previous month.
- *Intermediate goods*, with a variation of **2.8%**, three tenths higher than that of the previous month.

Contribution of the industrial sectors to the annual rate of the IPRIM

The annual variation rate of the **general index excluding** *Energy* increased up to **3.2%**, standing 5.6 points over that of the general IPRIM.

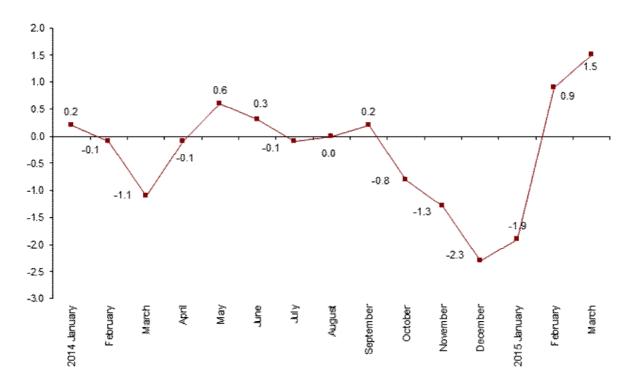

A more detailed analysis showed that, among the divisions recording an increase in their annual rates, worth noting were:

- Manufacture of coke and refined petroleum products, whose rate increased more than four points as compared with the previous month, reaching –12.9%. This behaviour is due to the increase in the prices of this industry, which decreased in April 2014.
- Extraction of crude petroleum and natural gas, whose rate increased seven tenths, reaching -23.6%. This evolution was due to the raise in the prices of this activity this month.
- Manufacture of computer, electronic and optical products, with a 5.7% variation rate, more than one point higher than that registered in March and the greatest one since the beginning of the series in January 2006.

Monthly evolution of import prices

In April, the monthly variation of the Import Price Index was **0.4%**.

Monthly evolution of the IPRIM General index

By economic destination of the goods, all the sectors had a positive effect on the general index. Among them, worth noting:

- *Energy*, with a variation of **1.4%** and an effect of **0.299**, due to the increase in the prices of *Manufacture of coke and refined petroleum products* and *Extraction of crude petroleum and natural gas*.
- *Intermediate goods*, with a variation of **0.3%** and an effect of **0.087**. It is worth noting the increase in prices of *Manufacture of wearing apparel*
- *Capital goods*, whose variation stood at **0.2%** and an effect of **0.048** on the general IPRIM. In turn, the only industrial sector with a negative contribution to the general index was:
- **Non-durable consumer goods**, whose variation stood at **0.0%** and had an effect of **-0.008** on the general IPRIM.

A more detailed analysis showed the activities that most affected the monthly rate of the IPRIM in the month of April.

Activities with the greatest positive effect on the monthly rate of the IPRIM

Activity (CNAE-09 divisions)	Monthly rate (%)	Effect
Manufacture of coke and refined petroleum products	3.0	0.170
Extraction of crude petroleum and natural gas	0.7	0.112
Manufacture of chemicals and chemical products	0.3	0.034
Manufacture of computer, electronic and optical products	0.4	0.028
Mining of metal ores	1.9	0.026
Manufacture of electrical equipment	0.4	0.017
Mining of coal and lignite	3.4	0.016
Manufacture of basic pharmaceutical products and		
pharmaceutical preparations	0.3	0.014
Other manufacturing	0.3	0.008

Activities with the greatest negative effect on the monthly rate of the IPRIM

Activity (CNAE-09 divisions)	Monthly rate (%)	Effect	
Manufacture of food products	-0.4		-0.030
Manufacture of rubber and plastic products	-0.3		-0.008
Manufacture of wearing apparel	-0.0		-0.001
Manufacture of paper and paper products	-0.0		-0.001

Export and Import Price Indices of Industrial Products. Base 2010 **April 2015**
