

Press Release

4 September 2017

Export and Import Price Indices of Industrial Products. Base 2010 July 2017. Provisional data

The annual variation rate of the IPRIX stands at 2.9%, four tenths lower than that registered in June

The annual variation rate of the IPRIM is 4.0%, six tenths below that registered the previous month

Annual evolution of the export prices

The annual rate of the Export Price Index (IPRIX) was **2.9%** in the month of July, four tenths lower than that registered in June.

By economic destination of the goods, among the industrial sectors with negative influence in this decreases worth noting were:

• Intermediate goods, whose annual variation stood at 3.7%, almost one percent below that registered in June. In this behaviour the stability of the prices of *The production of nob ferrous precious metals* which increased in July 2016, is highlightable, as well as the decreases in the prices of *Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary forms* and the *Manufacture of basic iron and steel and of ferro-alloys,* as compared to the increases registered in 2016.

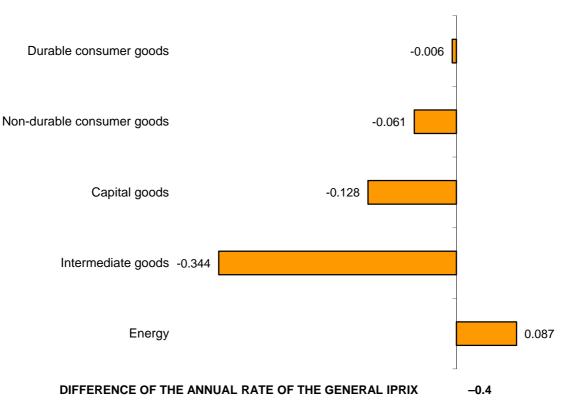

• **Capital goods**, with a rate of **0.7%**, four tenths lower than that of the previous month. This was mainly due to the decrease in the prices of *Manufacture of motor vehicles* in this month, while they grew in 2016.

On the other hand, the only industrial sector with a positive influence was:

• *Energy*, which increases almost two points its annual variation rate to **14.7%**. This behaviour is due to the stability of the prices of *Petroleum Refinement*, versus the decrease in the past year.

It is noteworthy, although in the opposite direction, the decrease in the prices of *Electric power* generation, transmission and distribution, which increased in the June 2016.

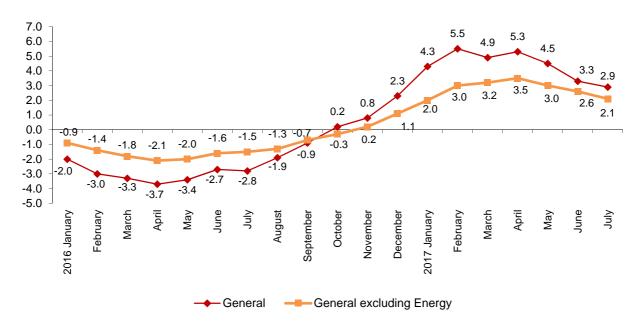

Contribution of the industrial sectors to the annual rate of the IPRIX

The annual variation rate of the **general index excluding** *Energy* decreased five tenths, to **2.1%** standing eight tenths below that of the general IPRIX.

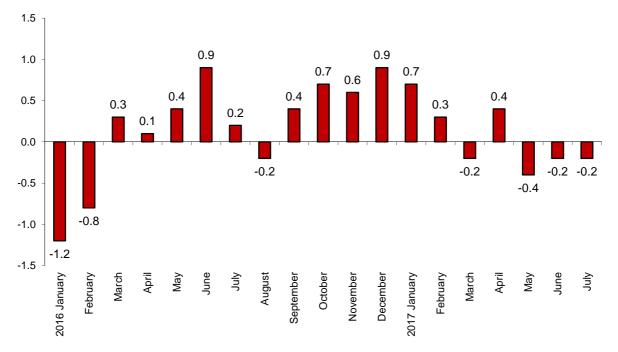

Annual evolution of the IPRIX General index and general excluding Energy

Press Release . Instituto Nacional de Estadística

Monthly evolution of the export prices

In June, industrial export prices registered a monthly rate of -**0.2%**, as compared to the month of July.

Monthly evolution of the IPRIX General index

By economic destination of the goods, all the industrial sectors presented a negative monthly effect on the general index. Among them worth noting were:

• Intermediate goods, whose rate of -0.3% affects in -0.122, because of the decrease in the prices of *Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary forms*, and in a lesser degree to the *Manufacture of basic iron and steel and of ferro-alloys.*

• *Capital goods*, with a variation rate of -**0.2**, as a consequence of the decrease of the prices of the *Manufacture of motor vehicles*. Its contribution to the general IPRIX was **@**,069.

• **Non-durable consumer goods,** whose rate stands at -0.1% and has a repercussion of 0,023. In this evolution out stands the decrease in prices of *Processing and preserving of meat and production of meat products* and *vegetables*.

It is also noteworthy in this sector, although in the opposite direction, the increase in the prices of the *Manufacture of dairy products*.

A more detailed analysis shows the activities that most affected the monthly rate of the IPRIX in the month of July.

Activities with the greatest positive effect on the monthly rate of the IPRIX					
Activities (CNAE-09 groups)	Monthly rate (%)	Contribution			
Manufacture of pulp, paper and paperboard	1.5	0.028			
Manufacture of dairy products	2.2	0.013			
Petroleum Refinement	0.4	0.010			

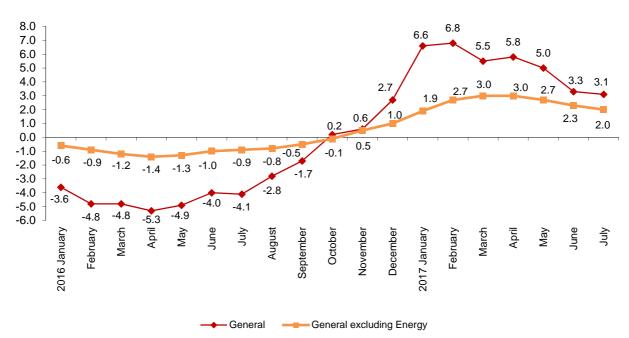

Activities with the greatest negative effect on the monthly rate of the IPRIX

Activities (CNAE-09 groups)	Monthly rate (%)	Contribution
Manufacture of basic chemical products, nitrogen compounds,		
fertilisers, plastics and synthetic rubber in primary forms	-1.7	-0.107
Manufacture of motor vehicles	-0.4	-0.061
Manufacture of basic iron and steel and of ferro-alloys	-1.0	-0.040
Production, transport and distribution of electrical energy	-1.7	-0.025
Processing and preserving of fruit and vegetables	-0.7	-0.014

Annual evolution of industrial prices, aggregating the domestic and international markets

The Industrial Price Index of the domestic and foreign markets, obtained as by the aggregation of the IPRI and the IPRIX, showed an annual rate of **3.1%**, in July, two tenths lower than that registered in June.

On the other hand, the annual variation rate of the *general index excluding Energy* decreased three tenths, up to **2.0%**, standing more than one point below the general IPRI+IPRIX.

Annual evolution of the IPRI and IPRIX General index and general excluding Energy

Press Relean - Instituto Nacional de Estadística

Annual evolution of the import prices

The Import Price Index (IPRIM) registered an annual rate of **4.0%** in July, six tenths lower than that of the previous month.

By economic destination of the goods, among the industrial sectors that presented a negative effect in this decrease worth noting were:

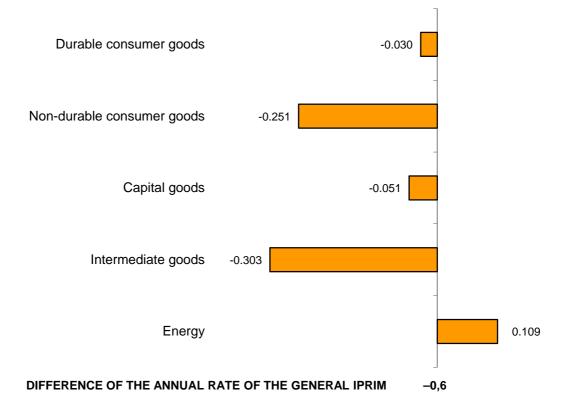

• Intermediate goods, whose rate decreased more than a point to 4.1%, due to the decrease in the prices of *Metallurgy; manufacture of iron, steel and of ferro-alloys,* as compared with the increase registered in July 2016.

• **Non durable consumption goods**, had a variation **0.3%**, more than one point lower than that registered in June. In this evolution the decrease of the prices of *Food industry* outstand, as compared with the increase in July of the previous year.

On the other hand, the only industrial sector with a positive influence was:

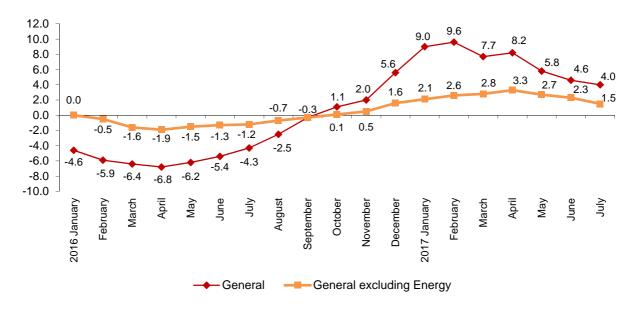

• Energy, that has an increase in the rate of **13.0%**, six tenths higher than that registered in the previous month, as a consequence of an increase in the prices *Manufacture of coke and refined petroleum products*, as compared with the decrease registered in 2016.

Delease Press Instituto Nacional de Estadística

The annual variation rate of the **general index excluding** *Energy* decreased eight tenths, to **1.5%** standing at more than two points and a half below that of the general IPRIM.

Annual evolution of the IPRIM General index and general excluding Energy

A more detailed analysis showed that, among the activities that most affected the decrease in the annual rate of the IPRIM, worth noting were:

• Manufacture of basic metals; manufacture of basic iron and steel and of ferro-alloys, which decreased its rate by three points, standing at **12.3%**. This behaviour is due to the decrease in the prices of the industry, as compared with the increase registered the previous year.

• *Manufacture of food products,* which reached a rate of **2.4%**, more than one point and a half below that of June, as a consequence of the decrease of its prices in this month, which increased in 2016.

• **Chemical industry**, whose variation rate decreased almost one point up to **3.9%**, due to the decrease in its prices, as compared to the increase in the previous year.

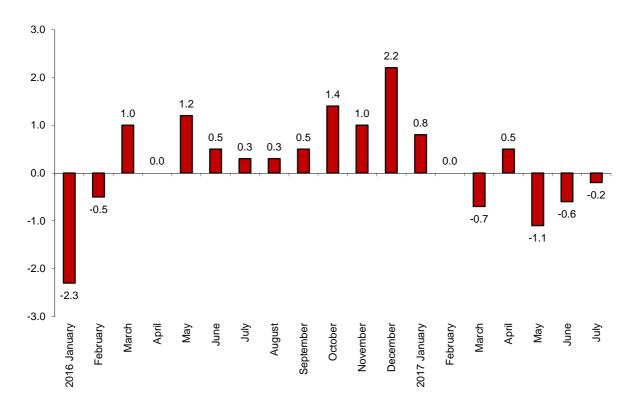

In turn, among the divisions with a positive influence are worth noting:

• *Manufacture of coke and refined petroleum products*, with a rate that stands at **6.8%**, more than two points above that of the previous month. This evolution is the result of the increase in the prices in this month, which decreased in July 2016.

Press Relan . Instituto Nacional de Estadística

Monthly evolution of the import prices

In July, the monthly variation of the Import Price Index was -0.2.

Monthly evolution of the IPRIM General Index

By economic destination of the goods, among the industrial sectors that had negative monthly effect on the general index worth noting were:

• Intermediate goods, with a monthly variation rate of -0.6%, due to the decrease in the prices of *Chemical industry* and, to a lesser extent, of *Metallurgy; manufacture of iron, steel and ferro-alloy products*. Its contribution to the general IPRIM was -0,165.

• **Non-durable consumption goods**, with a variation rate of **-0.3%** which impacts **-0.074**. In this evolution the decrease in the prices of *Food industry* outstand.

On the other hand, the only industrial sector with a monthly positive influence is:

• *Energy*, with a monthly variation of **0.5%** and an impact of **0.096**, due to the increase in the prices of *Extraction of crude petroleum and natural gas* and, to a lesser extent, of *Manufacture of coke and refined petroleum products*.

A more detailed analysis shows the activities that most affected the monthly rate of the IPRIM in the month of June.

Activities with the greatest positive effect on the monthly rate of the IPRIM					
Activity (divisions CNAE-09)	Monthly rate (%)	Contribution			
Extraction of crude petroleum and natural gas	0.6	0.090			
Manufacture of coke and refined petroleum products	0.4	0.022			
Mining of metal ores	1.4	0.017			

Activities with the greatest negative effect on the monthly rate of the IPRIM						
Activity (divisions CNAE-09)	Monthly rate (%)	Contribution				
Chemical industry	-0.8	-0.085				
Manufacture of basic metals; manufacture of basic iron						
and steel and of ferro-alloys	-1.4	-0.062
