Due to the updating in the establishments directory carried out in Comunidad Foral de Navarra in January 2011, the data to be published for Comunidad Foral de Navarra and the national total from those dates are not directly comparable with the data published last year.

Therefore, data link coefficients have been calculated to allow the comparison of data between different years.

These coefficients are available in INE website (www.ine.es)

¹ Due to the updating in the directory of establishments carried out in Navarra (C. Foral de), the data to be published since January 2011 (for Navarra and the national total) are not directly comparable with the data published last year, therefore, data link coefficients have been calculated to allow the comparison of data between different years. These coefficients are available in INE website (www.ine.es)

³ To facilitate the comparability between data from different Autonomous Communities (and because of the different regulation and different characteristics), a group called rural house has been created, with those accommodations with similar typology (location, capacity, etc...).

The variables included in the previous table have been estimated with that type of establishments.

The variables shown in the table have been estimated with the type of accommodation under rural tourist accommodation.
