Nature, characteristics and purpose

These statistics are within the framework of the General plan for statistics on science and technology promoted by the Statistics Office of the European Union (Eurostat). They have the main objective of ascertaining the resources that universities spend on R&D, for the purpose of estimating the national effort in research.

They are conducted following recommendations of the OECD (Frascati Manual).

Statistical Legislation of compulsory compliance

Statistical Secrecy

The personal information obtained by the statistical services, both directly from the informants and from administrative sources, shall be subject to protection, and covered by **statistical secrecy** (article 13.1 of the Law on Public Statistical Services, of 9 May 1989, (LFEP)). All statistical staff will be obliged to maintain statistical secrecy (article 17.1 of the LFEP).

Obligation to provide data

Laws 4/1990 and 13/1996 establish the obligation to provide the data that is requested for the compilation of these Statistics.

The statistical services may request data from all individuals and companies, regardless of whether they are Spanish or foreign, resident in Spain (Article 10.1 of the LFEP).

All individuals and legal entities that provide data, regardless of whether their collaboration is compulsory or voluntary, must respond in a true, exact and comprehensive manner within the stipulated deadline to the questions outlined in due form by the statistical services (art. 10.2 of the LFEP).

In order to monitor compliance with these regulation, the LFEP (art. 48) grants the INE sanctioning capacity.

Failure to comply with the obligations envisaged in this Law, as related to statistics for state purposes, shall be sanctioned in accordance with the terms established in the regulations contained in this Heading (art. 48.1 of the LFEP).

Very serious infringements shall be sanctioned with fines ranging from 3,005.07 to 30,050.61 euros€. Serious infringements shall be sanctioned with fines ranging from 300.52 to 3,005.06 euros€. Minor infringements shall be sanctioned with fines ranging from 60.10 to 300.51 euros€ (art. 51.1, 51.2 and 51.3 of the LFEP).

General considerations

For the purposes of these statistics, **the following are regarded as R&D activities**: "the group of creative activities undertaken systematically, in order to increase the flow of scientific and technical knowledge and use them to introduce new applications. This activity comprises basic research, applied research and experimental development. The latter leads to new devices, products, materials, processes, services or systems".

The following are not included as R&D activities: education, scientific and technical information, collection of data of a general nature, routine trials, everyday standardisation work or other technological activities relating to production or use of known products or processes. Mineral exploration is not included either, when it is aimed at discovering exploitable reserves and not essentially an increase in basic geological knowledge.

The criterion distinguishing R&D from other activities is the presence or lack of a notable degree of creativity or innovation.

General instructions

Information unit: The information that is requested in this questionnaire refers to the university whose identification data appears on the front cover. The data requested refers to all of the schools, institutes, etc., of the university in Spain, which shall be included in a single questionnaire.

Reference period: The data must refer to the target year of the statistics, otherwise to the 2009-2010 academic year.

Structure of the questionnaire: the questionnaire consists of six sections:

- 1. General data for the university
- 2. Staff employed in internal R&D activities in 2011
- 3. Expenditure on R&D activities in 2011
- 4. Activities based on biological sciences and technologies in 2011
- 5. In 2011, did the organisation carry out any internal R&D activity using or containing free software?
- 6. How long did it take to complete this questionnaire?

Form of recording the data: Write down the data clearly. Please do not write in the shaded areas. The financial data is requested in euros with no decimals

Consignment term: This questionnaire, duly completed with the required information, must be returned within a term not exceeding 15 days from time of receipt.

1. General data for the university

1.1 Please list the research centres, foundations and university institutes (their own, attached, mixed or interuniversity) whose research data is in this questionnaire
