

Advance estimate of the Quarterly National Accounts - Base 2000.
Fourth Quarter 2007

The interannual growth rate of the Gross Domestic Product increased 3.5% in the fourth quarter of 2007

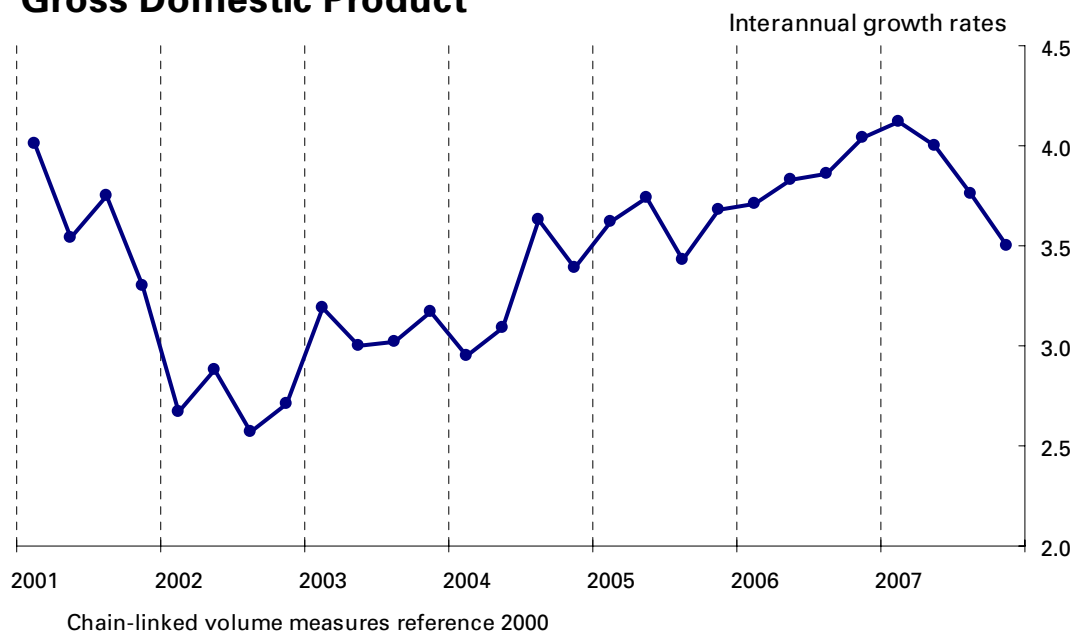

According to the quarterly GDP advance estimate, during the fourth quarter of 2007, the Gross Domestic Product (GDP)¹ generated by the Spanish economy registered a real growth rate of 3.5%, as compared to the same period of the previous year².

In this way, the Spanish economy slowed its rate of progress by three points, as a result of a slow-down in national demand, which was partially compensated by the less negative contribution of the foreign sector.

Moreover, the **quarter-on-quarter GDP growth rate stood at 0.8%**, one tenth more than in the previous quarter.

By temporary aggregation of the four quarters, **real growth of GDP for the entire year 2007 was estimated at 3.8%**, one tenth less than in 2006.

Gross Domestic Product

Gross Domestic Product

Rates	2005				2006				2007			
	Q. I	Q. II	Q. III	Q. IV	Q. I	Q. II	Q. III	Q. IV	Q. I	Q. II	Q. III	Q. IV
Interannual	3.6	3.7	3.4	3.7	3.7	3.8	3.9	4.0	4.1	4.0	3.8	3.5
Quarter-on-quarter	0.9	0.9	0.9	0.9	0.9	1.1	0.9	1.1	0.9	1.0	0.7	0.8

¹Chain-linked volume measures.

² Seasonally and calendar adjusted data.

Methodological note

The quarterly GDP advance estimate uses the same methodology as that used when compiling the complete estimate, although in a simplified framework. Additionally, advanced time series modelling techniques are used, both to complete the data of the reference period and to validate estimates.

Based on the quarterly GDP estimate in seasonal and calendar adjusted terms of some countries of the European Union (EU), including Spain, the Statistical Office of the European Communities (Eurostat) computes a first GDP growth estimate for the EU and the Economic and Monetary Union. The calculation of this advance estimate is part of the Eurostat and Central European Bank policy of offering data comparable, in terms of time and quality, to the data produced in the United States.

The quarterly GDP advance estimate provides exclusively trend information, and therefore could differ from the data provided by the Quarterly Spanish National Accounts, published a few days later.

In this regard, by 20 February the INE will have published the complete tables and charts of the Quarterly Spanish National Accounts, corresponding to the fourth quarter of 2007.
