

# Applying the GSBPM to the NBR

## The Spanish experience

**Session 10: Business Registers**  
**Date: 1 June 2016**

Luis Esteban Barbado  
National Statistical Office of Spain (Business Register Unit)  
[esteban.barbado.miguel@ine.es](mailto:esteban.barbado.miguel@ine.es)

# General context

- ✓ **Explicit mandate of our NSI Board of Directors (8 March 2012)**
  - **Commitment to the implementation of the QAF**

- ✓ **Reinforce the role of BRs as the backbone of the ESS**
- ✓ **Adoption of a *Business Architecture*, allowing:**
  - **Similar methods of management**
  - **Common tools / statistical services**
  - **Coordinated DQPs**

## *Specify Needs, Design and Build Phases*

### **Management of NBRs; a long tradition in the NSIs**

#### **□ Historical approach**

✓ Best way to understand the current state and basis of our business process

#### **□ Design and Build phases conceived jointly with a large degree of overlapping**

✓ Description of the PIDE project, the methodological basis for the NBR management

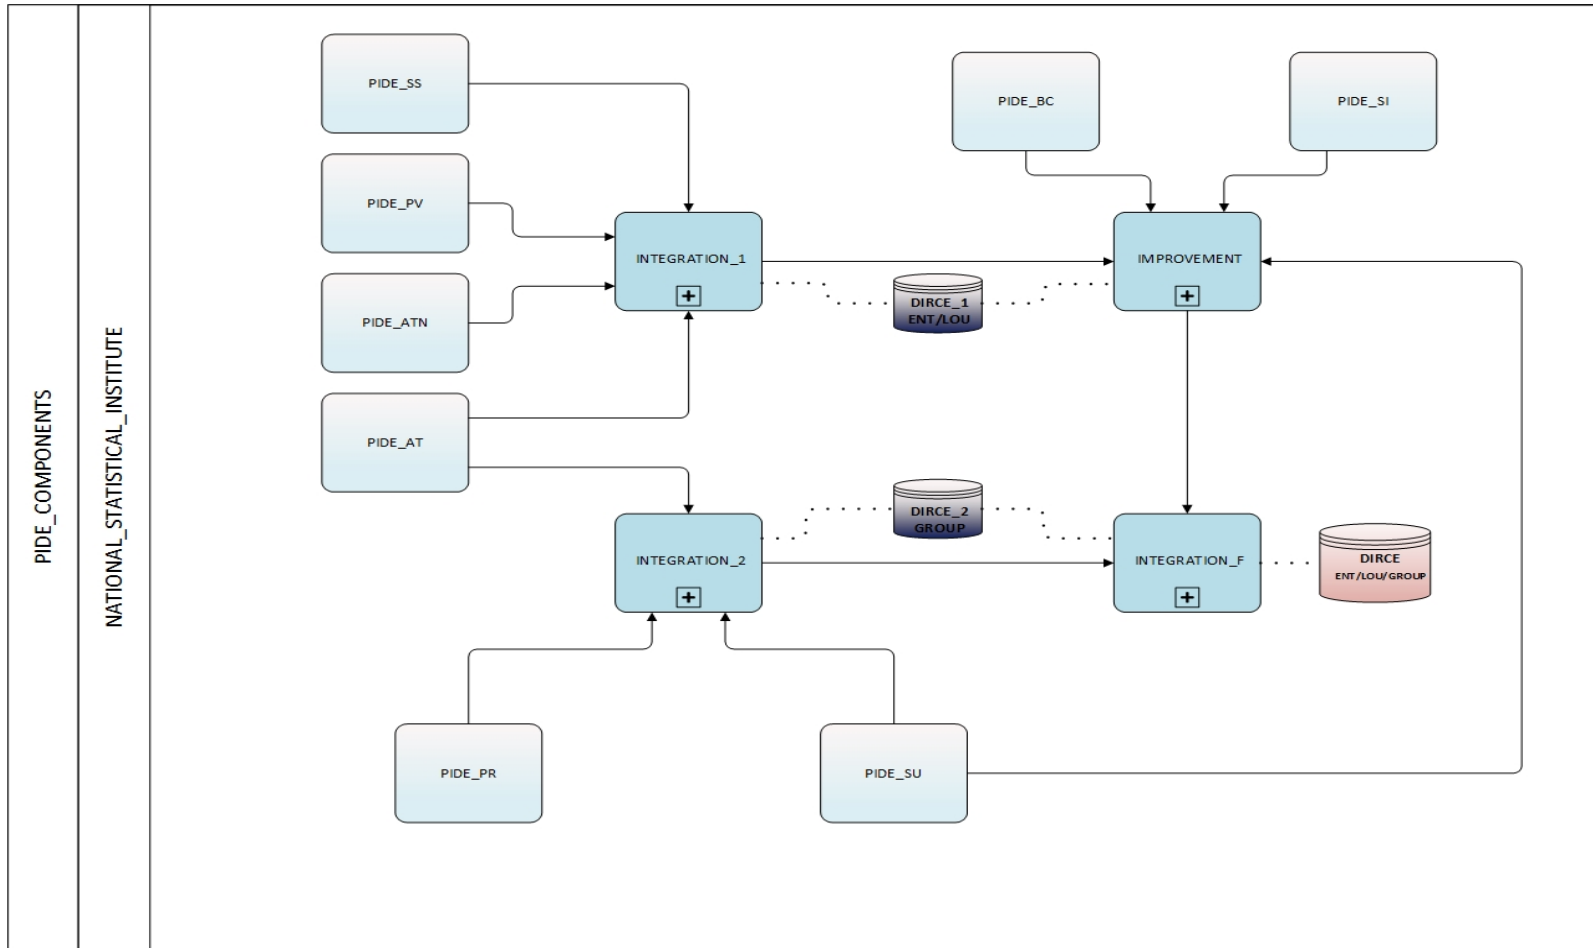

✓ Developments and main milestones consolidated from a time-based perspective

#### **□ Static dimension predominant for the next phases**

# Specify Needs, Design and Build Phases

## High level perspective of the PIDE project

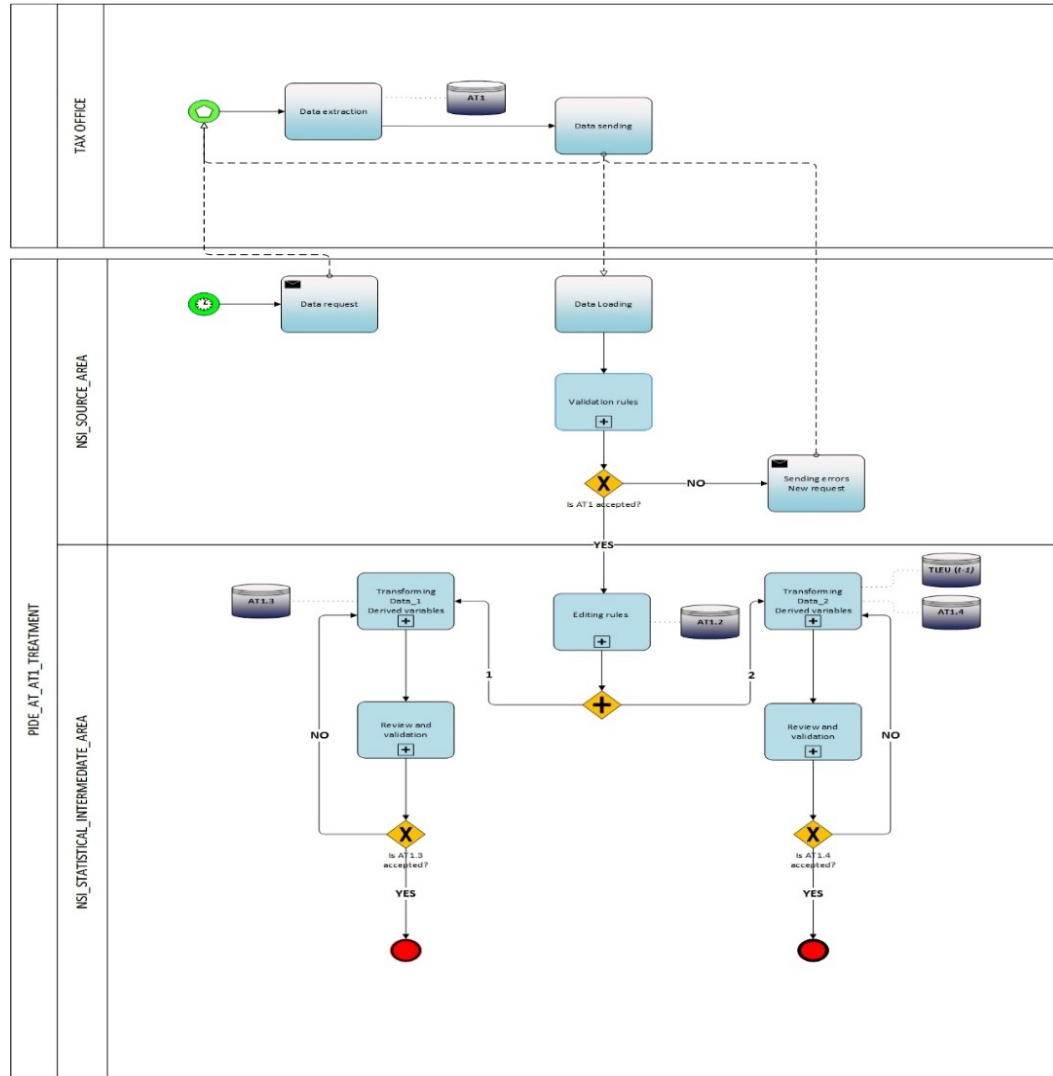

- ❑ **Set up Collection.** Two blocks of information provided
  - ✓The Institutional context created for a successful access to data sources
  - ✓The systems used for data interchanges
  
- ❑ **Run and Finalize Collection.-** 28 input sources classified by the PIDE components
  - ✓Denomination and Managing Organization
  - ✓Reception date
  - ✓Dates of start-finish processes
  - ✓Elementary observation unit and data structure
  - ✓Validation rules
  - ✓Editing process
  - ✓Transformation process

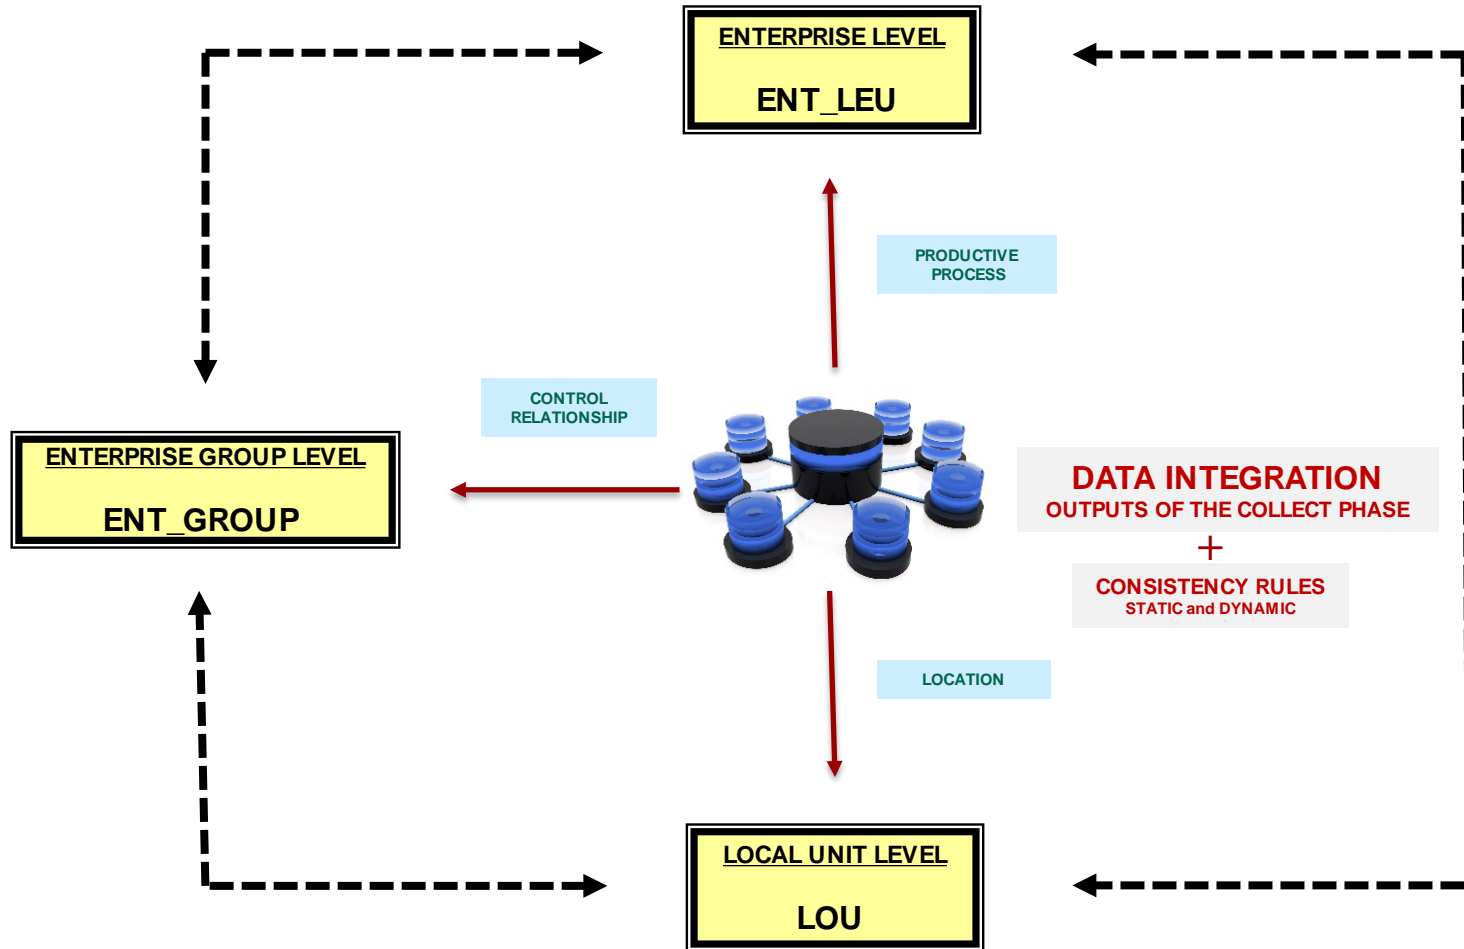

# Collect Phase

DQP designed for a Tax source

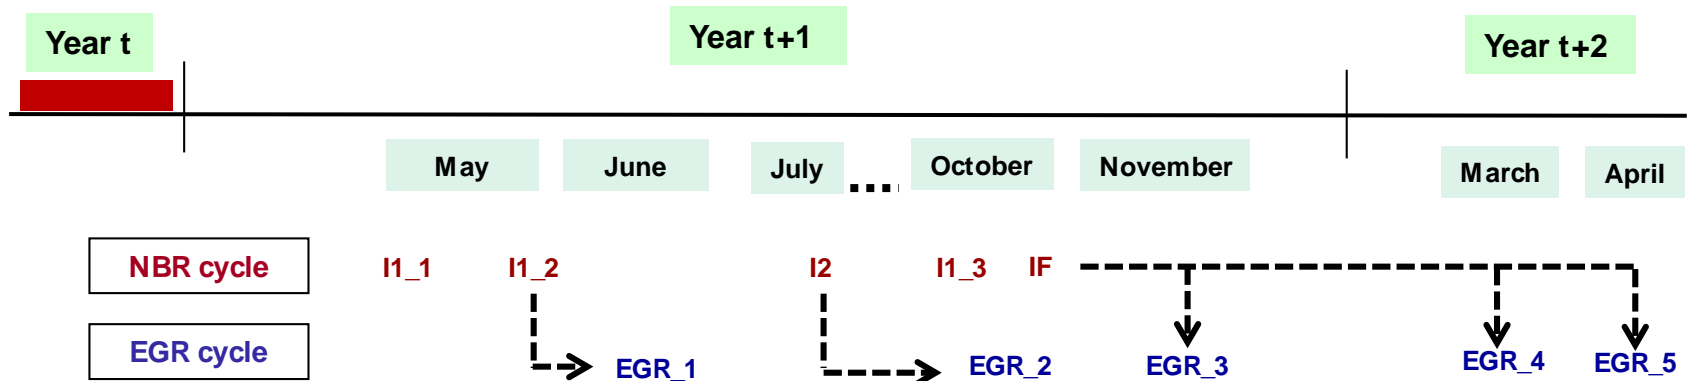

# Process Phase

## □ Integrate data\_1.- The **NBR** production cycle

## □ Integrate data\_2.- NBR frames and interactions with the EGR production cycle

**I1\_1.- Preliminary version based on administrative sources (LEU)**

**I1\_2.- Second version consistent with the previous year (LEU and LOU)**

**I1\_3.- Definitive version (LEU and LOU)**

**I2.- Preliminary version (ENT\_GROUP)**

**IF.- Definitive version (ENT\_LEU, LOU and ENT\_GROUP fully integrated and consistent)**

**EGR\_1.- Extraction and delivery of resident LEUs to the EGR Identification Service**

**EGR\_2.- Extraction and delivery of non-resident LEUs to the EGR Identification Service**

**EGR\_3.- Extraction and delivery of the core files (LEUs and relationships) for the EGR system**

**EGR\_4.- Extraction and delivery of the enterprise data for the EGR system**

**EGR\_5.- Repair action and data exchange on Ultimate Controlling Units**

# Analyse and Disseminate Phases

**Purpose:** To emphasize the role of the NBR as the key data source for the statistical analysis of the business population.

**DIRCE: Statistical Analysis**  
(Annual Standard Publication)

**Business Demography Indicators**  
(OECD-Eurostat methodology)

The screenshot shows the INE website interface. A large yellow banner with the text "Since 1999" is overlaid on the page. Below the banner, there is a section titled "More information available:" with a dropdown menu for "Changes to CER" and a "Go" button. The page also features a navigation menu at the top and a sidebar on the left.

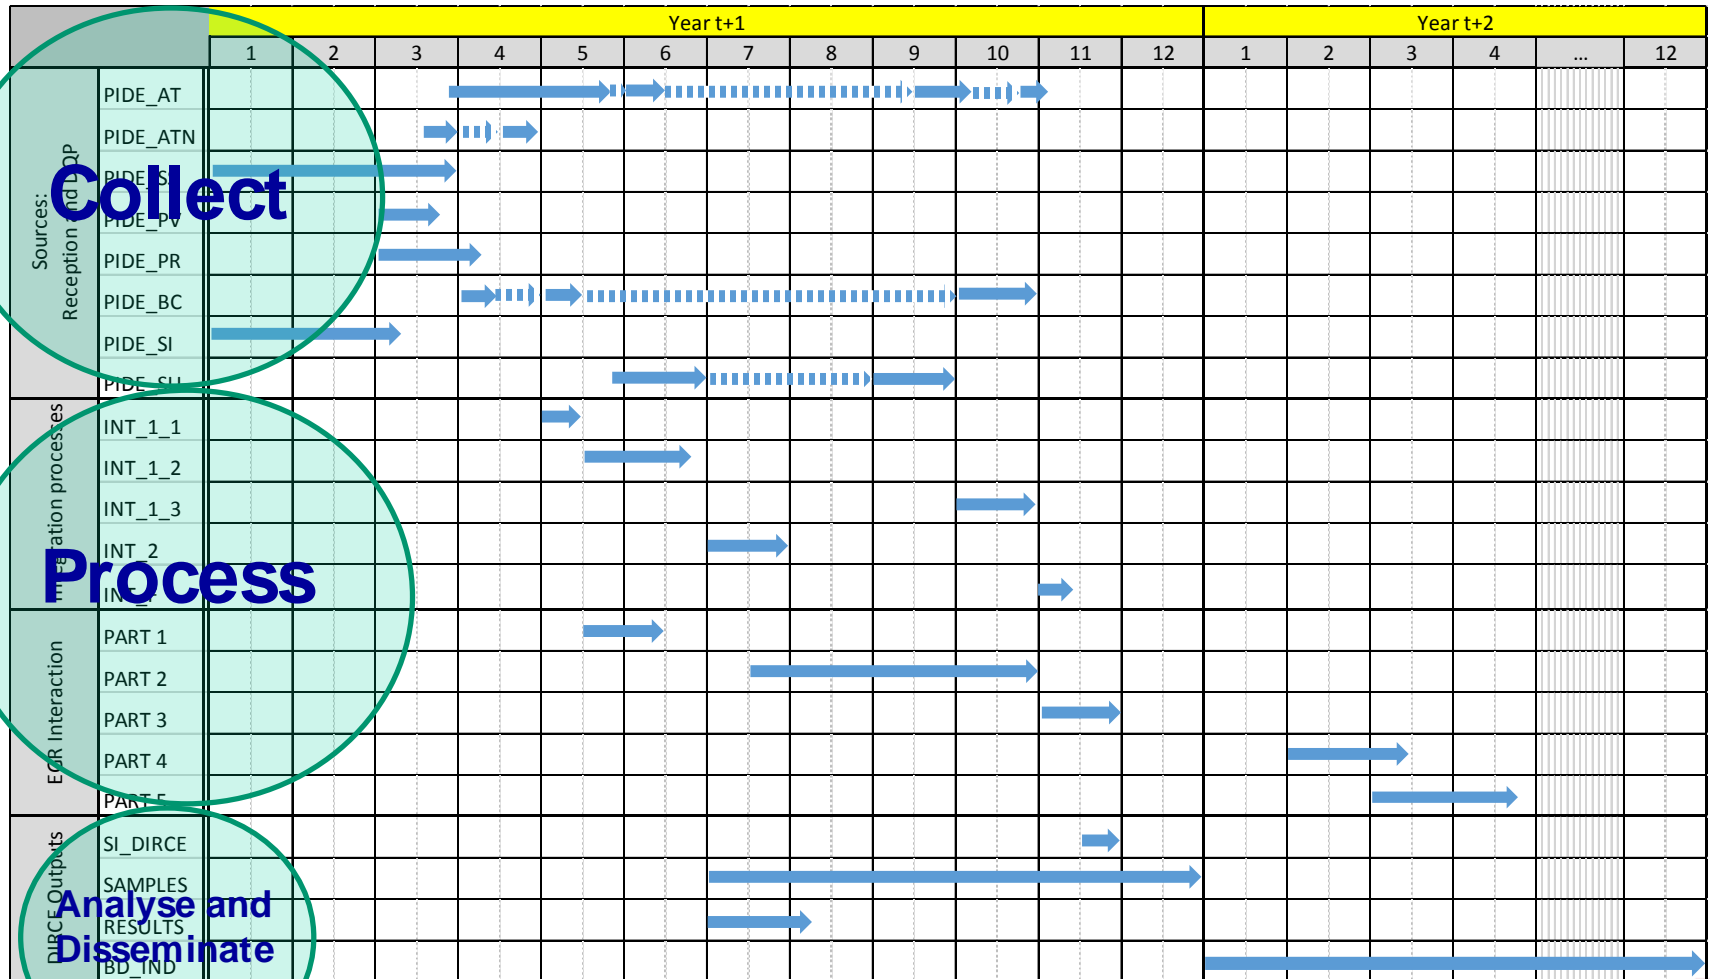

The screenshot shows the INE website interface. A large yellow banner with the text "Since 2008" is overlaid on the page. Below the banner, there is a section titled "Methodology:" with a link to "Standardised Methodological Report" and another link to "General methodology". The page also features a navigation menu at the top and a sidebar on the left.

**Features of our macro-data products and interactions between BR and Dissemination Units**

- ❑ Update output systems (data loading in TEMPUS3)
- ❑ Produce dissemination products (components)
- ❑ Manage user support (NBR tailored information service)

# Timetable of the whole cycle

## A challenging and very positive task

### ➤ Beneficial aspects

- ✓ BR processes described in a standardized way
- ✓ New possibilities for the ESBR project
  - Some principles on quality can be derived
  - Possible benchmarking activities

### ➤ Restrictions

- ✓ Feasible but not easy to apply:
  - National specificities in the BR management
  - Lack of detailed methodological guidelines

**Thank you for your attention and  
have a nice stay in Madrid !!**
