

Statistical training as a Quality factor

Session number 12

Date: June 1, 2016

F. Veira, T. Martínez de Ibarreta

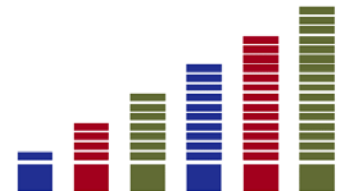

Instituto Nacional de Estadística

Madrid, Spain

paco.veira.vitores@ine.es; teresa.martinez.ibarreta@ine.es

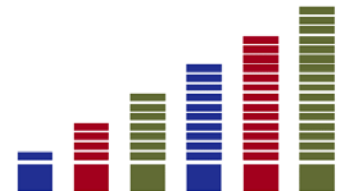

Spanish experience on Official Statistical training

- History
- Recipients
- Activities
- Teaching staff
- Others aspects
- Future

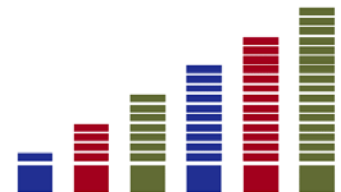

History

- Statistical Act
- Public Administration School of Statistics (PASS)
- Functions
 - Meet domestic needs of NSI and NSS
 - Presentation of statistical products and methodological advances
 - Specialist forum

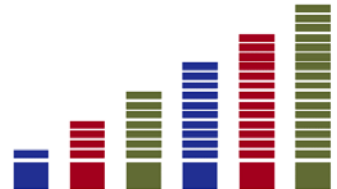

PASS Recipients

- SSN actors: Ministries, Regional Administration, Local Administration, Universities and NSI
- The program of activities is made on account of suggestions of SSN actors and courses students

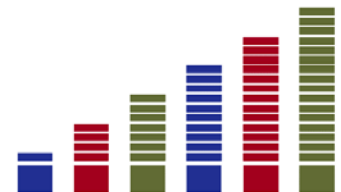

PASS Activities

- Classroom courses
 - Official statistics production, Statistical specialization and Statistical computing
- Technical sessions
- Online courses
- On demand activities for Public Bodies
- Educational Visits
- Specific courses for the Mass Media
- Specific courses for secondary school teachers

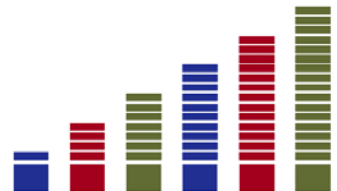

Teaching staff

- Responsible for statistical production
- Civil servants of several administrations
- University professors

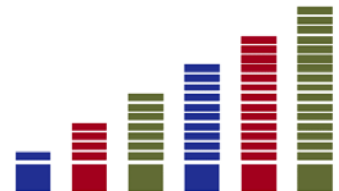

Others aspects

- Free courses announced on the web
- Feedback system to evaluate quality
- Consolidated classroom courses are being moved to online courses
- Online course offer is growing
- Evolution of classroom courses: towards specialized and shorter sessions

Future Challenges

- Maintaining statistical training as an element of Quality
- Promoting statistical literacy
- Improving the quality online training
- Collaborating in European Master in Official Statistics (EMOS)

Statistical training as a Quality factor

THANKS FOR YOUR ATTENTION!
