## Revision and updating of data

The data published today are provisional and will be reviewed when the data for the same period next year are published. All results of this operation are available on [INEBase](#).

## Methodological note

The Foreclosure statistics provide information on foreclosure certifications initiated and registered in the Land Registers during the reference quarter, relating to all rural and urban properties. The results are broken down on the basis of various variables such as the nature of the property, regime, state and owner of the dwellings with a foreclosure initiated.

The information on foreclosure certifications is obtained from the data contained in the Land Registries of the entire national territory. The Association of Land and Mercantile Registrars of Spain (CORPME) provides centralised information to the INE.

**Type of survey:** quarterly continuous survey.

**Population scope:** registration of foreclosure certifications that are initiated and registered in the land registries.

**Geographical scope:** the entire national territory and Autonomous Communities.

**Reference period of the results:** the calendar quarter.

**Reference period of the information:** the calendar quarter.

**Classification:** rural and urban properties (dwellings, plots and other urban). Households of natural persons, legal entities, primary and other residences.

**Collection method:** administrative registers from the Association of Land and Mercantile Registrars of Spain.
