Methodological note

The Statistics on Annulments, Separations and Divorces are carried out by the National Institute of Statistics (INE) on the basis of the Agreement signed with the General Judicial Council (GJC) dated 14 February 1995.

It is oriented to the study of matrimonial dissolution proceedings handled through sentences, decrees and public deeds on behalf of the judges, the judicial administration lawyers (formerly judicial secretaries) and notaries, respectively.

The objective of these statistics is to determine the number of these judgements, decrees and public deeds by providing information on some of the main socio-demographic characteristics of the spouses involved (sex, age, nationality, number of children), on the type of separation or divorce (by mutual agreement or contested) and on other variables of social interest associated with the judicial process (alimony, custody, duration of the proceedings, etc.).

Type of operation: annual continuous statistics.

Population scope: Judgements, decrees and public deeds issued on annulments, separations and divorces.

Geographical scope: the entire national territory.

Reference period for the results: the calendar year.

Information reference period: the date on which the sentence, decree or public deed of the dissolution of the marriage takes place.

Collection method: statistical form based on an administrative act.
