The annual rate of the overall Consumer Price Index (CPI) in December was 2.8%, four tenths higher than that registered the previous month.

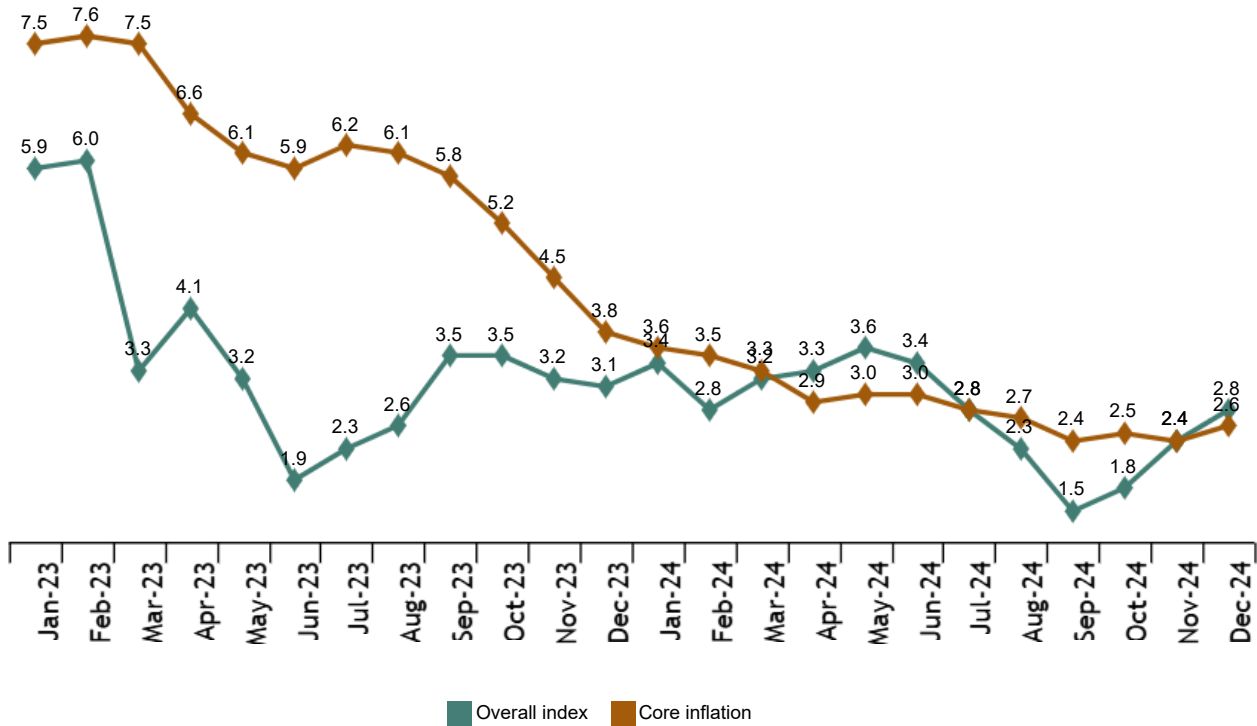

The groups that stood out most in terms of their influence on the increase in the annual rate were:

- **Transportation**, whose annual rate increased 1.6 points of a percentage point to 0.6%. This situation was due to higher prices for *fuels and lubricants used in personal vehicles*, compared with the falling prices in December 2023.
- **Leisure and culture**, whose annual variation stood at 3.2%, was 1.2 points higher than in the previous month. This increase was mainly due to higher *package tour* price increases than in the same month of 2023.

The annual variation rate of core inflation (general index excluding unprocessed food and energy products) increased by two tenths of a percentage point with respect to November, and stood at 2.6%.

Annual CPI Rate

Overall and core index. Percentage

Monthly evolution of consumer prices

In December, the monthly variation rate of the general CPI was 0.5%.

The groups with the greatest positive monthly impact to the CPI monthly rate were:

- **Leisure and culture**, which showed a variation of 3.5%, due to the increase in *package tour* prices. The impact of this group to the overall CPI was 0.294.
- **Housing**, with a rate of 0.6% and an impact of 0.071 due to the rise in *electricity* prices.
- **Transportation**, with a variation of 0.4%, due to higher prices of *fuel and lubricants for personal vehicles*. The impact of this group to the overall CPI was 0.054.

Methodological note

The Consumer Price Index (CPI) is a short-term indicator that measures the evolution of the prices of consumer goods and services acquired by households resident in Spain.

On the other hand, the Harmonized Index of Consumer Prices (HICP) is an indicator whose objective is to provide a common inflation measure that allows international comparisons.

Type of survey: continuous monthly survey.

Base period: 2021 (CPI) and 2015 (HICP).

Reference period for the weightings: year prior to the present year.

Sample of municipalities: 177.

Number of products: 462 (CPI) and 461 (HICP), for traditional collection, and 493 for scanner data.

Number of observations: approximately 210,000 monthly prices.

Functional classification: ECOICOP.

General calculation method: Laspeyres' Chain Index.

Collection method: interviewing agents in establishments, scanner data and centralised collection for special items.
