Data revisions and updates

On the press release day, INE has updated COPI data series corresponding to the last 13 months. In the case of calendar adjusted and seasonally and calendar adjusted series, according to INE standard, the series are revised since its beginning. The results are available at INEBase.

According to the Commission Delegated Regulation (EU) 2023/137 INE has started the works to incorporate the new National Classification of Economic Activities CNAE-2025 in all the statistical operations.

In the case of the COPI, the release of the first results with CNAE-2025 will take place in March 2028.

Methodological note

The Construction Production Index (COPI) is a short-term synthesis statistical operation aiming at obtaining an indicator to measure the short-term evolution of added value in the construction sector.

Survey type: ongoing monthly.

Base year: 2021.

Population scope: units of economic activity that carry out any activity included in Section F: Construction CNAE-2009.

Geographical scope: the whole country.

Results reference period: calendar month.

Sample size: Approx. 3,600 units.

Collection method: fill in a questionnaire by the respondent using the following methods: internet (IRIA system), email, fax, telephone or post.

Further information is available in the methodology and in the standardized methodological report.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics. More information on Quality at INE and Code of Best Practices.
