Methodological note

The statistics on Spaniards Residing Abroad are obtained from the statistical exploitation of the central file of the Register of Spaniards Residing Abroad (RSRA), which contains the registrations of people who are Spanish nationals and habitually live outside of Spain, whether or not this is their only nationality. The RSRA is formed with the data existing in the Registration Registry of each Career Consular Office or Consular Section of the Diplomatic Missions.

The registrations carried out within the year before the 1st January of the reference year correspond to new registers due to any possible reason (birth, nationalization, omission and emigration from Spain abroad).

The statistical use of the RSRA central file provides the distribution of registered individuals and the distribution of new registrations by variable on the date of reference, but it does not provide information about the reasons for changes with respect to the previous year.

Type of operation: continuous on an annual basis.

Population scope: all persons with Spanish nationality residing abroad.

Geographical scope: in terms of residence abroad, all countries are covered; in terms of municipality of registration for electoral purposes, the entire national territory is covered.

Reference period: on 1 January of each year.

Collection method: comprehensive from an administrative register.

For more information you can access the [methodology](#) and the [standardized methodological report](#).

INE statistics are produced in accordance with the Code of Best Practices for European Statistics, which is the basis for the institution's quality policy and strategy. More information in [Quality at the INE and the Code of Best Practices](#).
