On the press release day, INE has updated PT data for the same month of the previous year. Results are available at [INEbase](#).

## Methodological note

The purpose of the Passenger Transport Statistics (PT) is to provide monthly information regarding the number of passengers transported by city transport (bus and metropolitan), inter-city transport (road, rail, air and sea) and special and unscheduled bus transport.

Road transport is researched through a simple survey. For rail transport, the number of passengers is calculated using the information provided by the railway operators (RENFE and other autonomous companies). The information for air transport is provided by Civil Aviation, and for sea transport, the number of passengers disembarked is compiled using information from State Ports.

**Survey Type:** ongoing monthly.

**Population scope:** companies involved in passenger transport irrespective of their main activity.

**Geographical scope:** the whole country

**Reference period of the results:** month.

**Reference period of the information:** month.

**Sample size:** Approximately 1,500 companies.

**Type of sampling:** stratified random sampling of companies, by Autonomous Communities, number of employees and type of transport.

**Collection method:** fill in a questionnaire by respondent using one of the following methods: internet (IRIA system), email, fax, telephone or post.
