MANAGEMENT COMPANY

Nature, characteristics and purpose

This survey is included within statistical operation no. 6091 "Statistic on water supply and sanitation" of National Statistical Plan 2013-2016. The objectives of this survey are update and enlarge the information about water supply and treatment of wastewater.

Legislation

Statistical secrecy

The personal information obtained by the statistical services, both directly from the informants and from administrative sources, shall be subject to protection, and covered by **statistical secrecy** (article 13.1 of the Law on Public Statistical Services, of 9 May 1989, (LFEP)). All statistical personnel will be obliged to maintain statistical secrecy (article 17.1 of the LFEP).

Obligation to provide data

Laws 4/1990 and 13/1996 establish the **obligation to provide the data** that is requested for the compilation of these Statistics.

The statistical services may request data from all individuals and corporations, whether national or foreign, resident in Spain (article 10.1 of the LFEP).

All individuals and corporations providing data, regardless of whether their collaboration is compulsory or voluntary, **must respond in a true, exact and comprehensive manner within the stipulated deadline** to the questions outlined in due form by the statistical services (article 10.2 of the LFEP).

Failure to comply with the obligations established in this Law, as regards statistics for state purposes, **shall be sanctioned**, pursuant to the regulations contained in this Title (article 48.1 of the LFEP).

Very serious infringements shall be sanctioned with fines ranging from **3,005.07 to 30,050.61 euros**. Serious infringements shall be sanctioned with fines ranging from **300.52 to 3,005.06 euros**. Minor infringements shall be sanctioned with fines ranging from **60.10 to 300.51 euros** (articles 51.1, 51.2 and 51.3 of the LFEP).

Note: This questionnaire is available in the different co-official languages of Autonomous Communities.

General instructions:

Read carefully the instructions for the compliance of the questionnaire of the Survey on Water Supply and Treatment 2012. Information unit: the information requested in this questionnaire refers to the Water Supply and Treatment Unit whose identification data appears on the cover page. Complete the questionnaire with the data related to any supply, sewage and wastewater treatment activities carried out by this entity in the Autonomous Community that appears on the label. A questionnaire cannot contain data related to more than one Autonomous Community.

Reference period: the data must refer to the year 2012.

Form of recording the data: write down the data clearly. The volume of water is measured in cubic metres / year.

The financial data is requested in euros and shall not include invoiced VAT.

Consignment term: this questionnaire, duly completed with the required information, must be returned within a term not exceed in 15 calendar days.

1.2. Legal status of the Supply and Sanitation Unit

Mark with an X where appropriate

- 1. Local Entity (City councils, Communities of municipalities, etc.).....
- 2. State-owned company (100%)
- 3. Mixed company.....
- 4. Private-owned company (100%)
- 5. Other legal status (specify): _____

1.3. Activities of the Supply and Sanitation Unit

Mark with an X where appropriate. If you do not distribute water on low-level to users move to section 6.

- 1. The Unit in the Autonomous Community:
 - Distributes wholesale water
 - Distributes retail water to the users
 - Manages the sewage system
 - Treats wastewater

2. Abstraction and purchase-sale of wholesale raw water from other entities

Abstraction includes both the granted water and the one obtained from owned resources.

The volume of water is measured in m3

	Collection	Purchase
1. Volume of raw water abstracted or purchased (m³/year).....	_____	_____
1.1. Surface water.....	_____	_____
1.2. Groundwater (includes springs).....	_____	_____
1.3. Water for desalination.....	_____	_____
2. Volume of raw wholesale water sold to other entities (m³/year) ...	_____	_____

3. Purchase - sale of drinkable water from other entities

- 1. Volume of drinkable water purchased from other entities (m³/year)..... _____
- 2. Volume of wholesale drinkable water sold to other entities (m³/year)..... _____

4. Losses in water transport and consumption in drinking water treatment plants

Losses in piping are the difference between the volume collected or purchased from other entities and the volume entering the Drinking Water Treatment Plants (DWTP).

The water consumed in treatment is the differences between the volume of water entering the DWTP and the volume leaving it.

- 1. Losses in water transport up to the drinking water treatment plants (m³/year)..... _____
- 2. Volume of water consumed in the drinking water treatment plants (m³/year)..... _____

5. Distribution of drinking retail water to the users (m³/year)

Section 1 will include water supplied to the distribution network from treatment plants or service deposits.

The rubric 1.1 will include the total volume of registered water by the meters of the users.

Indicate in rubric 1.2 the difference between the volume of water supplied to the public supply network (section 1) and the volume of water registered and distributed by type of user (section 1.1).

The investment made shall refer only to that carried out during the year 2012. The volume of water is measured in m³.

1. Volume of water supplied to the public network (m³/year)	_____
1.1 Volume of water registered and distributed by type of user	_____
1.1.1 Households (including second homes).....	_____
1.1.2 Industry	_____
1.1.3 Services (trade, offices...).....	_____
1.1.4 Agriculture and cattle raising	_____
1.1.5 Leisure and tourism uses (hotels, campsites, swimming pools, golf courses...)	_____
1.1.6 Municipal consumption (garden watering, street and municipal building cleaning...)	_____
.....	_____
1.1.7 Building construction and public works	_____
1.1.8 Other user (specify):	_____
1.2 Volume of water non-registered (m³ /year)	_____
1.2.1 Real or physical losses (water leaks, breakages, water tanks overflows)	_____
1.2.2 Apparent losses	_____
1.2.2.1 Meter inaccuracies (submetering)	_____
1.2.2.2 Authorised non registered consumptions (gaugings, street cleaning, public park watering, fountains, filters cleaning, water tanks cleaning, etc.).....	_____
1.2.2.3 Unauthorized consumptions (Illicit connections).....	_____
2. Length of the supply network (km)	_____
3. Value of the investment made on the distribution network (euros)	_____
4. Supplied population (inhabitants) (*)	_____

6. Total amount of the water billed to the users (euros)

This refers to both the invoicing itself and the monetary amounts charged to users by delegation of invoicing.

The monetary amount shall contain all rubrics related to the correspondent service, including any kind of tax.

It shall not include invoiced VAT.

1. Water supply	
1.1 Billed amount of the water supply service	_____
2. Sewage	
2.1 Billed amount of the sewage service	_____
3. Wastewater treatment	
3.1. Billed amount of the wastewater treatment service	_____

7. Sewage

1. Length of the sewage network (km)	_____
2. Number of spillways of the sewage network	_____
3. Storm tanks	
3.1 Number of storm tanks	_____
3.2 Total capacity (m ³).....	_____

(*) Number of people-year (or failing that at 1st January 2012) that live in dwellings supplied by the company or organisation. For municipalities registering sharp seasonal variations, refer the annual average.

8. Treatment of wastewater (m³/year)

Wastewater treatment consists on treating wastewater so that it can be poured into the channels or collectors. BOD₅ before treatment is measured in mg/litre, it is calculated by balancing with the current treated flows and it refers to the annual average.

1. Number of Wastewater Treatment Plants (WWTP)

2. Number of Soft Technologies Based Plants

3. Capacity of the plants

3.1 Primary treatment (physical-chemical)

3.2. Primary and secondary treatment (physical-chemical and biological)

3.3 Primary, secondary and tertiary treatment (physical-chemical + biological + advanced)

m ³ /year	Equivalent inhabitants

4. Treated volume.....

4.1 Primary treatment (physical-chemical)

4.2. Primary and secondary treatment (physical-chemical and biological)

4.3 Primary, secondary and tertiary treatment (physical-chemical + biological + advanced)

4.4 Soft Technologies Based Plants (biodiscs, lagooning, peat layers, septic tanks, etc.)

m ³ /year	Inhabitants Equivalent	BOD ₅ Before Treatment

5. Destination of the treated wastewater (100% total)

5.1 To the sea %

5.2 To a river channel..... %

5.3 Re-used water..... %

5.4 Other destination (specify) %

TOTAL **100%**

6. Volume of re-used treated wastewater (m³/year)..... _____

7. Use of the re-used water (100% total)

7.1 Agriculture %

7.2 Industry %

7.3 Gardens and leisure and sport areas..... %

7.4 Cleaning of the sewage system and street cleaning %

7.5 Other uses (specify) %

TOTAL **100%**

8. Volume of sludge generated in wastewater treatment

(tonnes of dry matter/year)..... _____

9. Destination of the generated sludge (100% total)

10.1 Agriculture, forestry and gardening %

10.2 Incineration or energy use..... %

10.3 Dumping site %

TOTAL **100%**
