

11 March 2011

Consumer Price Index (CPI). Base 2006
February 2011

Overall index

	Monthly change	Change over last December	Annual change
February	0.1	-0.6	3.6

Main results

- The **annual change** of the CPI for the month of February increases three tenths, standing at **3.6%**.
- The **annual change** of **core** inflation is **1.8%**, two tenths higher than that registered in January.
- The **monthly change** of the overall index is **0.1%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **3.4%**, four tenths higher than the previous month.

Annual evolution of consumer prices

The annual change for the overall Consumer Price Index (CPI) in the month of February was 3.6%, three tenths higher than that registered in January. This change coincided with the HICP flash estimate, published last 28 February.

The groups which most contributed to this increase in the annual change were:

- **Transport**, whose annual change rose one point, standing at **10.0%**, the greatest change since July 2008. This increase was mainly due to the rise in prices of *fuels and lubricants for personal transport equipment*.
- **Food and non-alcoholic beverages**, with an annual change of **1.5%**, six tenths higher than the change in the month of January. The divisions that most contributed to this change were *edible oils, other milk-based products and sheep meat*.
- **Recreation and culture**, whose annual change increased eight tenths, reaching **-0.2%**, due to the increase in prices of *package holidays*, as compared with the drop experienced one year ago.

In addition to the aforementioned increases, worth noting was the decrease in the annual change of the following group:

• **Alcoholic beverages and tobacco**, which presented an annual change of **14.5%**, thus decreasing more than one-and-a-half points with regard to the previous month. This drop was explained by the fact that, in February last year, the prices of *tobacco* increased more than they did this month.

Contribution of the groups to the annual change of the CPI

The annual change of **core inflation** (overall index excluding energy and unprocessed food) increased two tenths to **1.8%**, and its difference from the overall index change stood at more than one-and-a-half points.

Annual evolution of the CPI Overall and core index

Monthly evolution of consumer prices

In February, the monthly change of the overall CPI was **0.1%**.

The groups with the greatest positive monthly contribution to the overall index were the following:

- **Transport**, with a monthly change of **0.8%**, and a contribution of **0.125**, due to the increase in prices of *fuels and lubricants for personal transport equipment*.
- **Miscellaneous goods and services**, whose change of **0.6%** was mainly due to the increase in prices of *insurance*, customary at the beginning of the year. The contribution of this group was **0.055**.
- **Recreation and culture**, whose monthly change of **0.6%** contributed **0.042** to the overall index, fundamentally caused by the rise in prices of *package holidays*.
- **Housing**, which presented a change of **0.3%**, largely due to the increase in prices of *heating fuels*. Its contribution to the overall index was **0.038**.

Likewise, the groups with the greatest negative monthly contribution in the month of February were the following:

- **Clothing and footwear**, whose monthly change of **-1.6%** reflected the behaviour of prices at the end of the winter sales period. Its contribution was **-0.119**.
- **Food and non-alcoholic beverages**, with a change of **-0.2%**, which contributed **-0.032** to the overall index. Worth noting in this decrease were mainly the drops in prices of *fresh fish* and *sheep meat*.

Monthly evolution of the CPI Overall index

A more detailed analysis showed the divisions that had the greatest contribution to the monthly CPI change during the month of February.

Divisions with the greatest positive contribution to the monthly change of the CPI

	Monthly change (%)	Contribution
Food products		
Fresh potatoes and potatoes preparations	2.6	0.008
Coffee, cocoa and infusions	2.5	0.008
Other divisions		
Fuels and lubricants for personal transport equipment	1.7	0.107
Insurance	1.1	0.047
Package holidays	2.1	0.027
Other fuels	4.9	0.025
Restaurants, cafés and the like	0.2	0.016
Motor cars	0.2	0.011

Activities with the greatest negative contribution to the monthly change of the CPI

	Monthly change (%)	Contribution
Food products		
Fresh fish	-4.4	-0.045
Sheep meat	-3.9	-0.011
Other divisions		
Garments	-1.6	-0.088
Footwear	-1.7	-0.028

Results by Autonomous Community. Annual changes

The greatest increases in annual change corresponded to the Autonomous Community of Illes Balears (3.3%), with an increase of six tenths, followed by Principado de Asturias (4.2%) and Comunidad Foral de Navarra (3.5%), whose changes increased five tenths.

In turn, the Autonomous Communities whose annual change increased the least were Andalucía (3.7%), Comunitat Valenciana (3.5%) and Extremadura (3.6%), with an increase of two tenths.

Annual changes of the CPI

Index by Autonomous Community and autonomous city

Harmonised Index of Consumer Prices (HICP)

In the month of February, the annual change of the HICP increased four tenths, standing at **3.4%**. This change coincided with the HICP flash estimate, published last 28 February.

The monthly change of the HICP was **0.1%**.

Annual evolution of the HICP¹, base 2005

Overall index for Spain and the Monetary Union ²

¹ The data for the year 2010 does not include changes in the treatment of seasonal items

² The latest data from the Monetary Union refers to the flash estimate

In turn, the Harmonised Index of Consumer Prices at Constant Taxes (HICP-CT) registered in **January** 2011 an annual change of **1.8%**, more than one point below that recorded by the HICP in said month (**3.0%**). The difference between the two indicators remained the same, with regard to the difference registered in December.

The monthly change of the HICP-CT was **-1.3%**.

Informative annex

New methodological treatment of the HICP

The Harmonised Index of Consumer Prices (HICP) is an indicator whose objective is to measure the evolution of consumer prices using the harmonised methodology of the European Union. Its importance therefore lies in the high degree of comparability between EU countries, which increases as the harmonisation process begun, in the year 1995, advances.

The new treatment that is applied in the HICP, in order to take a step further in this process, refers to the methodology used for seasonal items. Its main characteristics are contained in an EU Regulation¹ that makes its application compulsory in all countries.

Characteristics of the new methodology

The Regulation considers seasonal items to be those that are no longer available for sale during certain periods of the year, and this situation repeats itself cyclically. The Spanish HICP considers *fresh fruit*, *fresh vegetables* and *clothing and footwear* to be seasonal items.

The methodology that the EU Regulation proposes is based on the estimate of the price in the months in which the seasonal product is not found on the market. This estimate is carried out using the evolution of the prices of those products, in the same category, that are found on the market.

The new methodology implies a significant change, with regard to that which had been applied previously, and therefore, the implementation of the Regulation as of January 2011 has caused a break in the HICP series. For this reason, the data published for this indicator in 2010 has been revised, applying this new methodology, pursuant to the advice of European regulations, and the annual changes published in 2011 are calculated with this revised data. This information is available on the INE website (http://www.ine.es/en/welcome_en.htm).

Change in consumption classification

As of January 2011, in order to adapt the classification of HICP products to the international consumption classification COICOP/HICP, *Real rents of other dwellings*, which were previously located in division 11.2. *Accommodation services* pass on to form part of division 04.1. *Gross housing rents*.

The revised series for the year 2010 incorporates this change in classification in order for annual changes not to be affected.

¹ Commission Regulation (EC) no. 330/2009, of 22 April 2009, establishing the detailed norms for the implementation of Council Regulation (EC) no. 2494/95 regarding the minimum norms for the treatment of seasonal products in the HICP.
