

14 March 2023

(Updated 15 March 2023)

**Consumer Price Index (CPI). Base 2021**  
**Harmonised Index of Consumer Prices (HICP). Base 2015**  
February 2023

## Main results

- The annual variation rate of the February CPI stood at -6.0%, six tenths above that registered in January.
- The annual rate of core inflation increases one tenth, reaching 7.6%.
- The monthly variation rate for the overall index is 0.9%.
- The annual rate of the Harmonised Index of Consumer Prices (HICP) stood at 6.0%, one tenth higher than that of the previous month.

## Annual evolution of consumer prices

The annual rate of the overall Consumer Price Index (CPI) in February was 6.0%. This rate is one tenth higher than that registered the previous month.

The groups which most influenced this increase in the annual rate were:

- **Housing**, whose annual variation rate increased two points, standing at -6.2%. Of note in this behaviour was the increase in *electricity*; compared to the decrease registered last year.

Also of note was the negative influence of *heating oil*, whose prices decreased, compared to last year's increase.

- **Food and non-alcoholic beverages** had a rate of 16.6%, more than one point above that of the previous month. This behaviour was influenced by the increase in the prices of *vegetables*, whose prices increased more than last year, meat, whose price increased compared to a decrease in 2022, and *fish and shellfish*, whose prices decreased less than last year.

Also influential, although in the opposite direction, were the prices of *milk, cheese and eggs*, which increased less than in 2022.

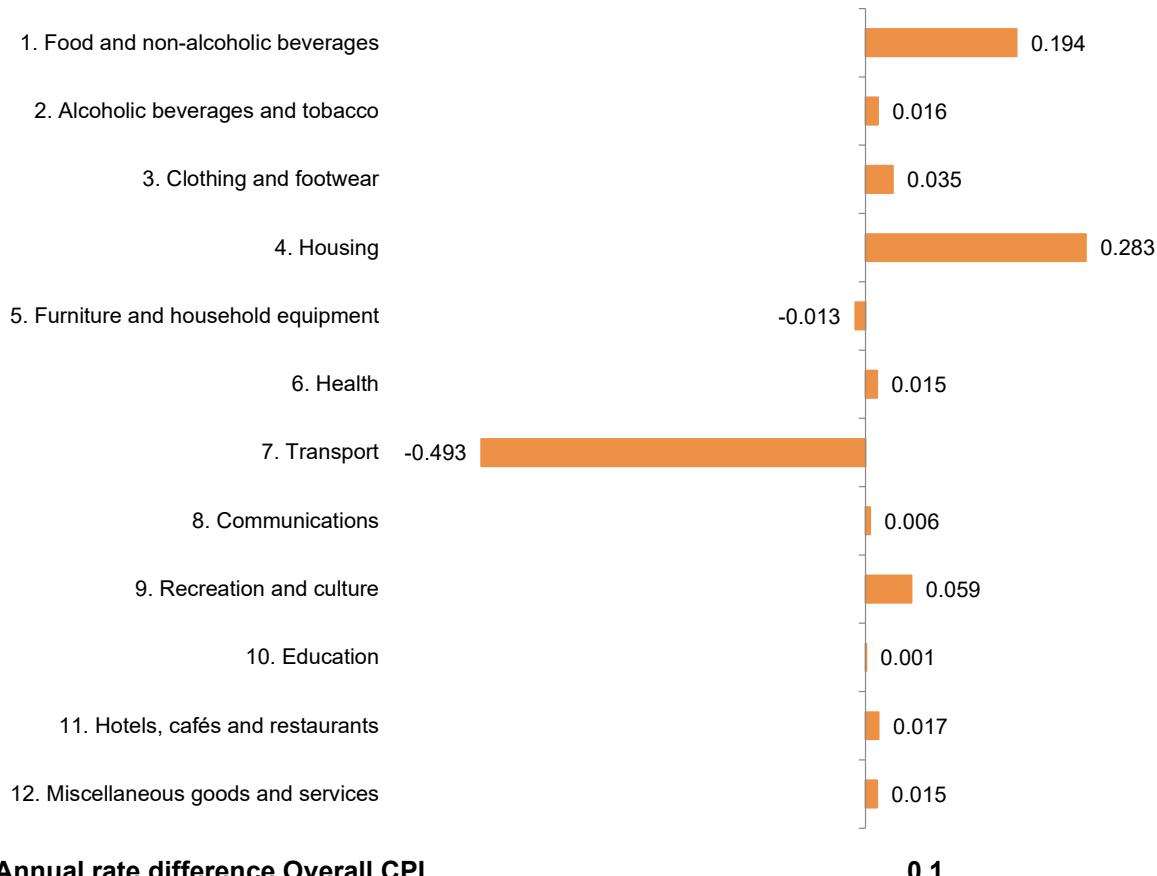

- **Leisure and culture** had an annual variation of 3.2%, seven tenths about that registered in January. This was due to the drop in the prices of *Package holidays*, which was greater than that registered in February 2022.

- **Clothing and footwear**, with a variation of 3.9%, three tenths higher than the previous month. This evolution was because the prices of all components fell less this month than in February 2022.

Notable among the groups with a negative contribution are:

- **Transport**, whose rate stood at 1.9%, more than three and a half points lower than that of the previous month. This decrease is due to lower *fuel and lubricant* prices, compared to the increase in February of the previous year, to the decrease in *transport services*, and to the fact that *automobile* prices increased less than in 2022.

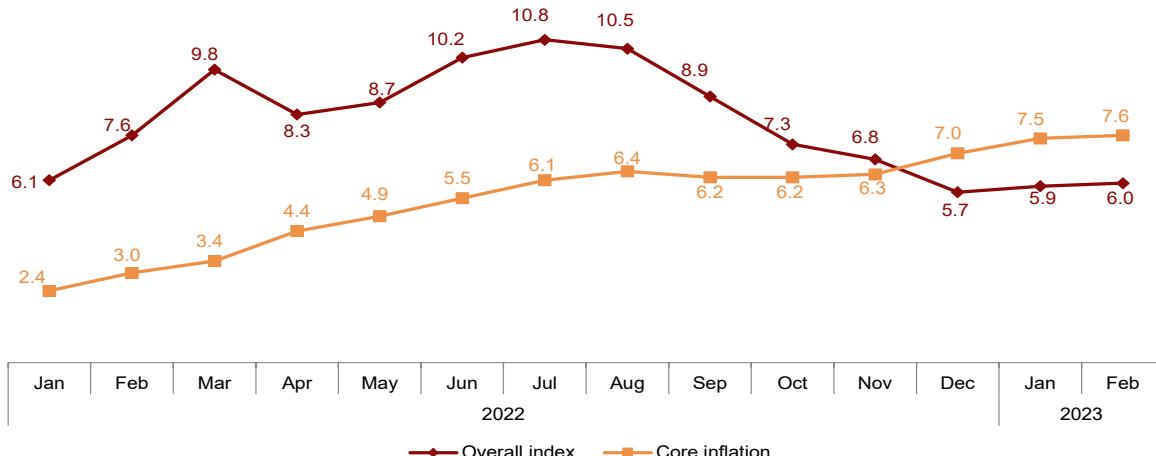

### Contribution of groups to the annual rate of the CPI

The annual variation rate of core inflation (general index excluding unprocessed food and energy products) increased one tenth, to 7.6%. It was highest since December 1986; the difference with the general CPI was more than one and a half points.

## Annual CPI Rate

Overall and core index. Percentage

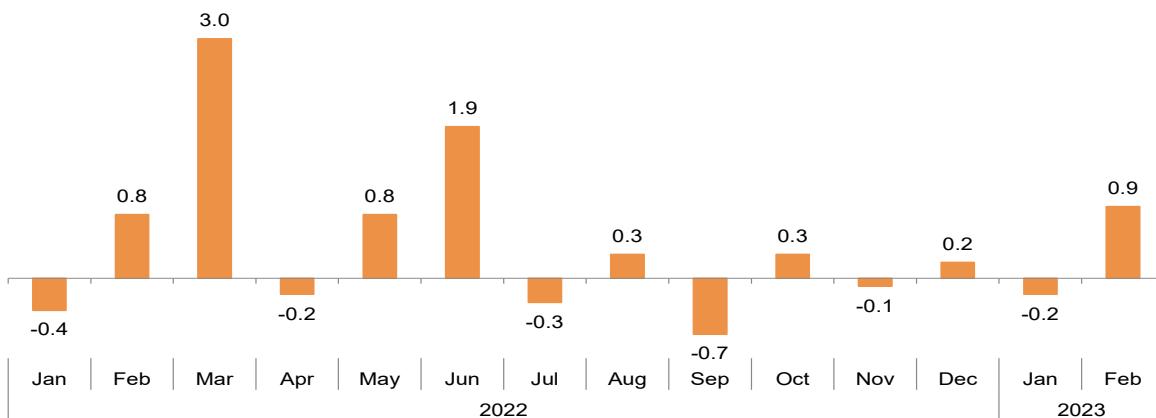

## Monthly evolution of consumer prices

In February, the monthly variation rate of the overall CPI was 0.9%.

### Monthly CPI Rate

General index. Percentage

The groups with the greatest positive monthly contribution to the CPI monthly rate were:

- **Food and non-alcoholic beverages**, which showed a variation rate of 2.0%. This was due to general price increases in most of its components. Among these increases, increases in the prices of *vegetables, fruits, mineral water, soft drinks and juices, bread and cereals, and other food products* stood out in particular. The contribution of this group to the overall index was 0.388.

Also noteworthy in this group - although in the opposite direction - was *fish and shellfish*, whose prices fell in February.

- **Housing**, which presented a rate of 3.0% as a result of the increase in *electricity* prices. The contribution of this group to the general CPI was 0.369.

While in the opposite direction, the decrease in the prices of *heating oil* were also of note.

- **Hotels, cafes and restaurants**, with a variation of 0.9% and a contribution of 0.115. This behaviour was due to an increase in the prices of *catering services* and *accommodation services*.
- **Leisure and culture** registered a rate of 1.3%, which contributed 0.102. This was primarily caused by the increase in the prices of *Tourist packages*.

On the other hand, among the groups with a negative monthly contribution, worth noting were:

- **Transportation**, with a monthly rate of -0.9% and a contribution of -0.128, due to the increase in the prices of *fuel and lubricants* and *transportation services*.

Also noteworthy, but with a positive influence, was the *maintenance and repair of personal vehicles*.

- **Clothing and footwear**, with a variation of -1.3% and a contribution of -0.044. This was due to the end of the winter sales season discounts.

A more detailed analysis shows the items that had the greatest contribution to the monthly variation of the CPI in February.

#### **Groups with the greatest positive impact on the monthly CPI rate**

| Classes   | Monthly rate | Contribution (%) |
|---|--------------|------------------|
| <b>Food products</b>                                    |              |                  |
| Fresh vegetables  | 6.7          | 0,134            |
| Fresh fruits  | 4.5          | 0,080            |
| Mineral waters, soft drinks, fruit and vegetable juices | 4.4          | 0,048            |
| Food products n.e.c.                                    | 2.9          | 0,043            |
| Bread and cereals                                       | 1.6          | 0,043            |
| <b>Other groups</b>                                     |              |                  |
| Electricity   | 12.6         | 0,368            |
| Tourist packages  | 5.2          | 0,066            |
| Restaurants, cafés and the like                         | 0.5          | 0,059            |
| Accommodation services                                  | 5.8          | 0,056            |
| Maintenance and repair of personal transport equipment  | 1.1          | 0,034            |

#### **Groups with the greatest negative impact on the monthly CPI rate**

| Classes                                    | Monthly rate | Contribution (%) |
|--|--------------|------------------|
| <b>Food products</b>                       |              |                  |
| Fish and seafood                           | -1.7         | -0,038           |
| <b>Other groups</b>                        |              |                  |
| Fuels and lubricants for personal vehicles | -2.3         | -0,119           |
| Combined passenger transport               | -19.7        | -0,046           |
| Clothes                                    | -1.3         | -0,033           |
| Passenger transport by road                | -4.1         | -0,024           |
| Liquid fuels                               | -6.3         | -0,018           |

#### **Results by Autonomous Communities. Annual variation rates**

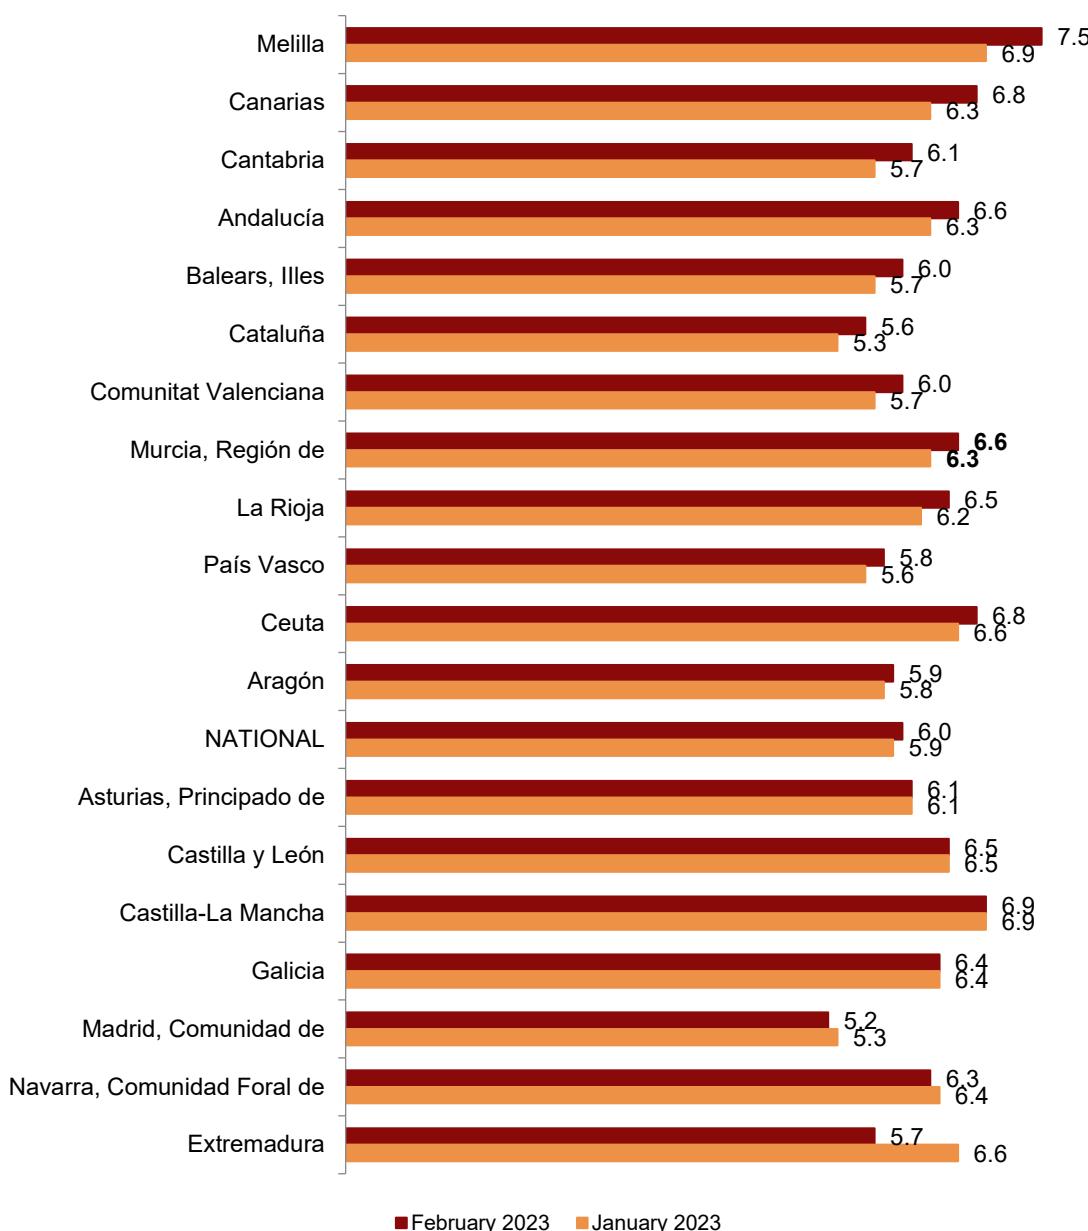

Compared to January, in February the annual rate of the IPRI increased in ten Autonomous Communities, decreased in three and remained stable in the other four.

The largest increases occurred in the Canarias (with an increase of 0.5 points), Cantabria (of 0.4 points), and Andalucía, Illes Balears, Cataluña, Comunitat Valenciana, Región de Murcia and La Rioja (all with increases of 0.3 points).

For its part, the annual rate fell 0.9 points compared to January in Extremadura, and 0.1 points in Comunidad de Madrid and Comunidad Foral de Navarra.

### Annual rates of CPI

Autonomous Communities and Cities. Percentage

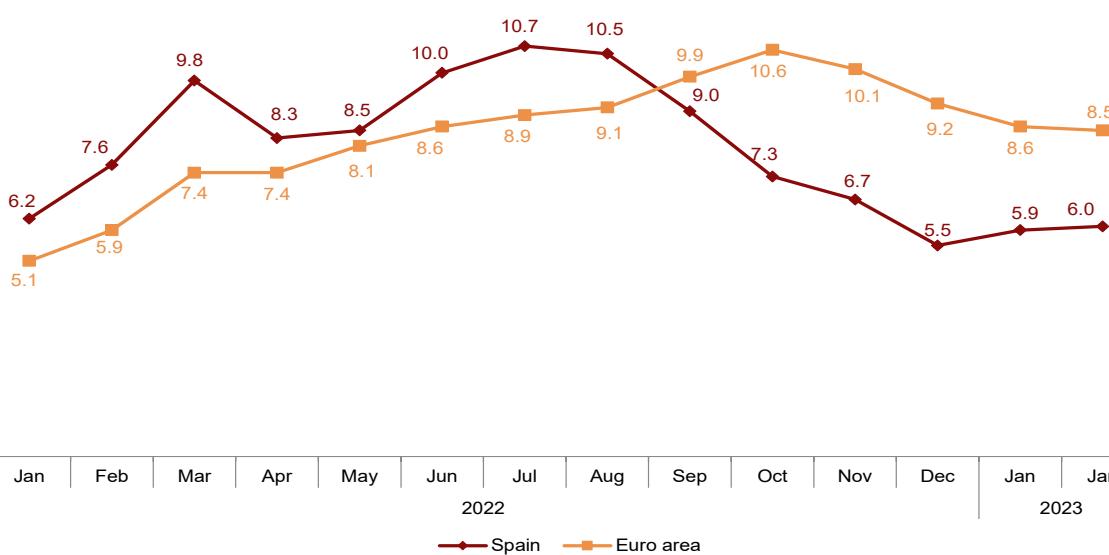

## Harmonised Index of Consumer Prices (HICP)

In February, the annual variation rate of the HICP stood at 6.0%, one tenth above that registered in the previous month.

The monthly variation of the HICP was 0.9%.

### Annual HICP Evolution. Base 2015

Overall index. Spain and Monetary Union<sup>1</sup>

<sup>1</sup> The latest data from the Monetary Union refers to the flash estimate

## Consumer Price Index at Constant Taxes

In February, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **6.6%**, six tenths above that recorded by the general CPI.

The monthly variation of the CPI-CT was **0.9%**.

In turn, the annual rate of HICP-CT registered an annual change of **6.6%, six tenths above** as that of the HICP.

The monthly variation rate of the HICP-CT was 0.5%.

## Data Review and Update

The data published today is final and is not subject to further revision. All results are available on INEBase.

## Methodological note

The **Consumer Price Index (CPI)** is a short-term indicator that measures the evolution of the prices of consumer goods and services acquired by households resident in Spain.

On the other hand, the Harmonized Index of Consumer Prices (HICP) is an indicator whose objective is to provide a common inflation measure that allows international comparisons.

**Type of survey:** continuous monthly survey.

**Base period:** 2021 (CPI) and 2015 (HICP).

**Reference period for the weightings:** year prior to the present year.

**Sample of municipalities:** 177.

**Number of products:** 462 (CPI) and 461 (HICP), for traditional collection, and 493 for scanner data.

**Number of observations:** Approximately 210,000 monthly prices.

**Functional classification:** ECOICOP.

**General calculation method:** Laspeyres' Chain Index.

**Collection method:** interviewing agents in establishments, *data scanner* and centralized collection for special items.

For more information, the methodology of both indicators can be consulted in the following link:
