

11 May 2018

Consumer Price Index (CPI). Base 2016 April 2018

Overall index

	Monthly variation	Accumulated variation	Annual variation
April	0.8	0.0	1.1

Main results

- The **annual variation rate** of the CPI in April was **1.1%**, one tenth of a percent lower than that registered the previous month.
- The **annual rate of core inflation** decreased four tenths to **0.8%**.
- The **monthly variation** of the general index was **0.8%**.
- The **annual variation rate** of the **Harmonised Index of Consumer Prices** (HICP) stood at **1.1%**, thus decreasing two tenths as compared with March.

Annual evolution of consumer prices

The annual rate of the general Consumer Price Index (CPI) in April was **1.1%**, one tenth of a point lower than that registered in the previous month.

The groups with the most negative contribution to the annual rate decrease were:

- **Leisure and culture**, whose variation rate decreased by nearly two and a half points, to **-1.4%**. This behaviour was mainly due to the decrease in the prices of *tourist packages*, compared with the increase recorded in 2017.
- **Hotels, cafés and restaurants**, with a variation rate of **1.6%**, six tenths of a percent lower than the previous month, mostly due to the fact that the prices of *accommodation services* increased less in April this year than in the same month of the previous year.
- **Housing**, whose variation rate fell by two tenths of a point, standing at **0.8%**, as a result of the decrease in the prices of *gas*, which increased last year.

It is also worth noting, although in the opposite direction, the increase in *heating gas oil*, compared to the decrease in 2017, and the increase in the prices of *electricity*, which remained stable the previous year.

11 May 2018

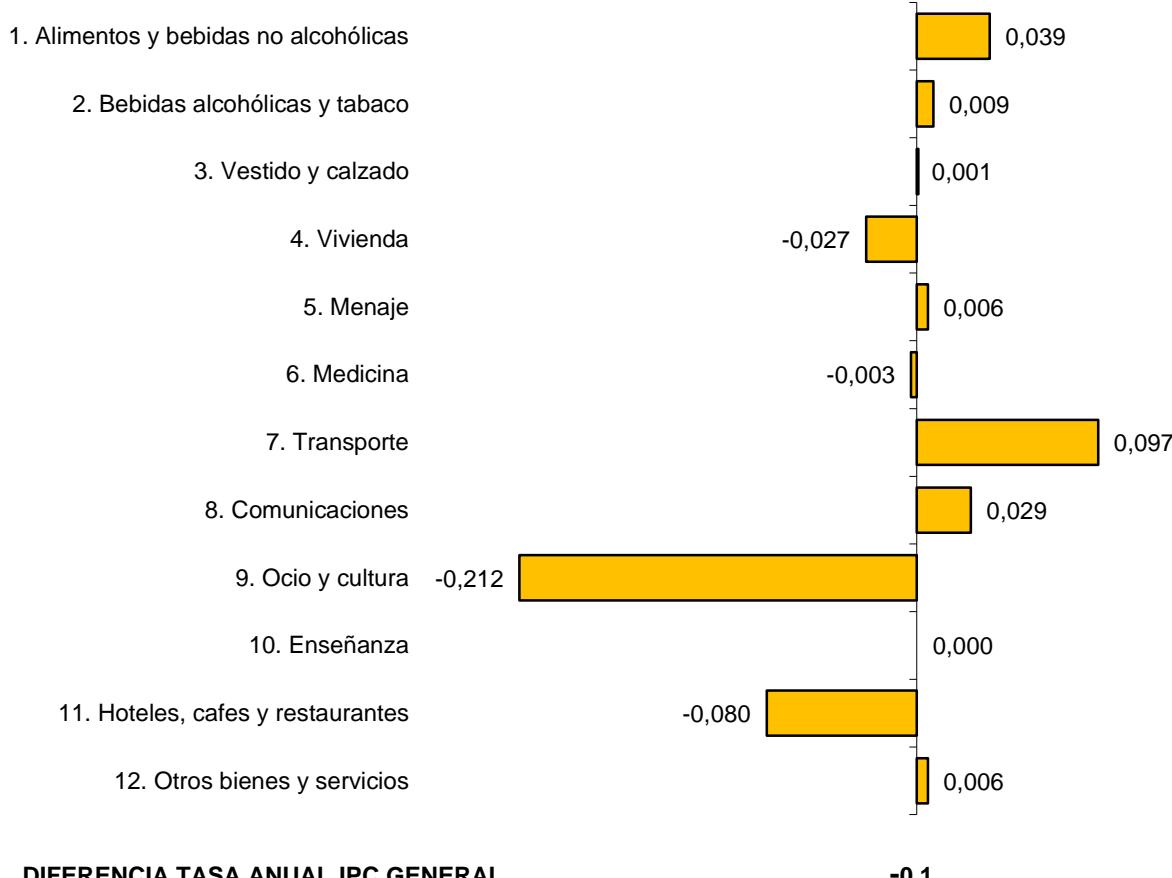

On the other hand, the groups with the most positive influence were:

- **Transport**, with an annual variation of **2.0%**, six tenths above that of the previous month, due to the fact that the prices of *fuels and lubricants* increased more this month than in April last year.

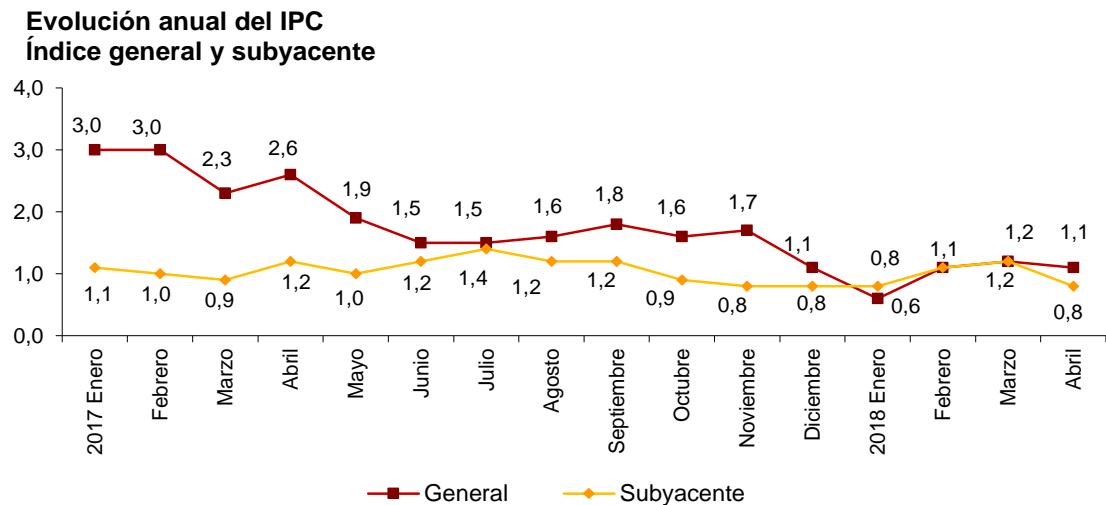

It also influenced, although to a lesser extent, the decrease in the prices of *air transport*, as compared with its increase in 2017.

- **Food and non-alcoholic beverages**, whose rate increased by two tenths to **1.6%**. Of particular note in this evolution was the increase in the price of *fish and seafood*, which was higher than in April of the previous year.
- **Communications**, which presented an annual variation of **2.8%**, seven tenths higher than the previous month, mostly due to the increase in the prices of *telephone and fax services*, which this year was higher than in 2017.

Influencia de los grupos en la tasa anual del IPC

The annual variation rate of **core inflation** (general index excluding unprocessed food and energy products) falls by four tenths to **0.8%**, standing three tenths below that of the overall CPI.

Monthly evolution of consumer prices

In April, the monthly variation rate of the general CPI was **0.8%**.

The groups with the greatest positive impact on the general index were:

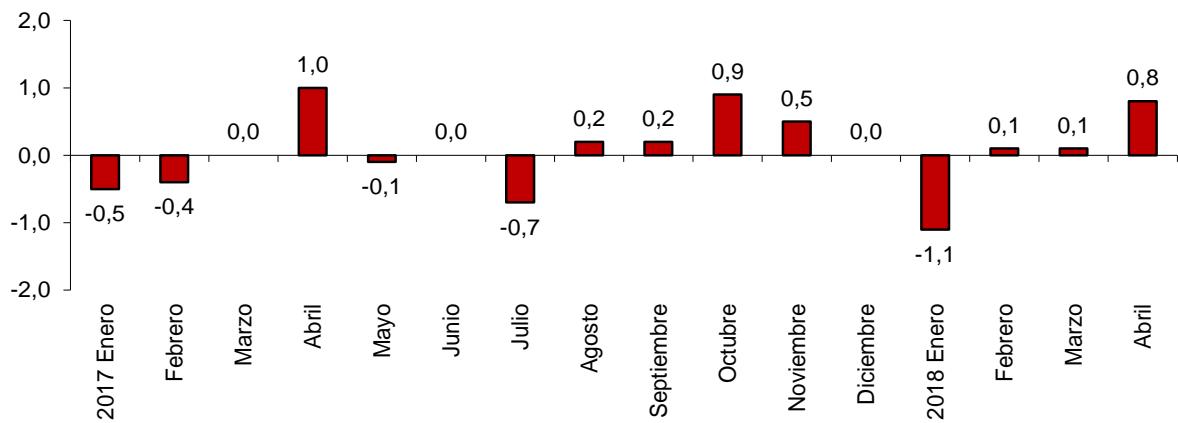

- **Clothing and footwear**, with a variation of **10.3%** and a contribution of **0.600**, reflecting the behaviour of the new spring-summer season.
- **Transport**, whose variation rate of **1.1%**, was almost entirely explained by the increase in the prices of *fuels and lubricants*. The contribution of this group to the general CPI was **0.170**.
- **Communications**, which registered a variation of **1.2%** and a contribution of **0.046**, mainly due to the increase in the prices of *telephone and fax services*.
- **Hotels, cafés and restaurants**, with a rate of **0.3%** due to the increase in the prices of accommodation services and, to a lesser extent *catering*. The contribution of this group to the CPI was **0.044**.
- **Food and non-alcoholic beverages**, which showed a variation rate of **0.1%** and a contribution of **0.022**. Of particular note in this evolution were the increases in the prices of *fresh fish* and *fresh vegetables*.

It is noteworthy, although in the opposite direction, the decrease in the prices of *fresh fruits*.

In turn, among the groups with a negative impact on the overall index, worth noting were:

- **Leisure and culture**, whose variation rate of **-1.0%** was mainly due to the decrease in the prices of *tourist packages*, which is usual after the Holy Week. The contribution of this group to the overall CPI was **-0.086**.

**Evolución mensual del IPC
Índice general**

A more detailed analysis shows the divisions that had the greatest contribution to the monthly CPI change during April.

Divisions with the greatest positive contribution to the monthly rate of the CPI

	Monthly rate	Contribution
	(%)	

Food products

Fish and seafood	1.6	0.037
Fresh vegetables	0.9	0.017

Other divisions

Clothes	11.7	0.486
Fuels and lubricants for personal vehicles	3.1	0.183
Footwear	7.1	0.107
Telephone and telefax services	1.6	0.055
Accommodation services	2.7	0.029
Electricity	0.7	0.021
Catering	0.1	0.015

Divisions with the greatest negative contribution to the monthly rate of the CPI

	Monthly rate	Contribution
	(%)	

Food products

Fruit	-2.4	-0.046
-------	------	--------

Other divisions

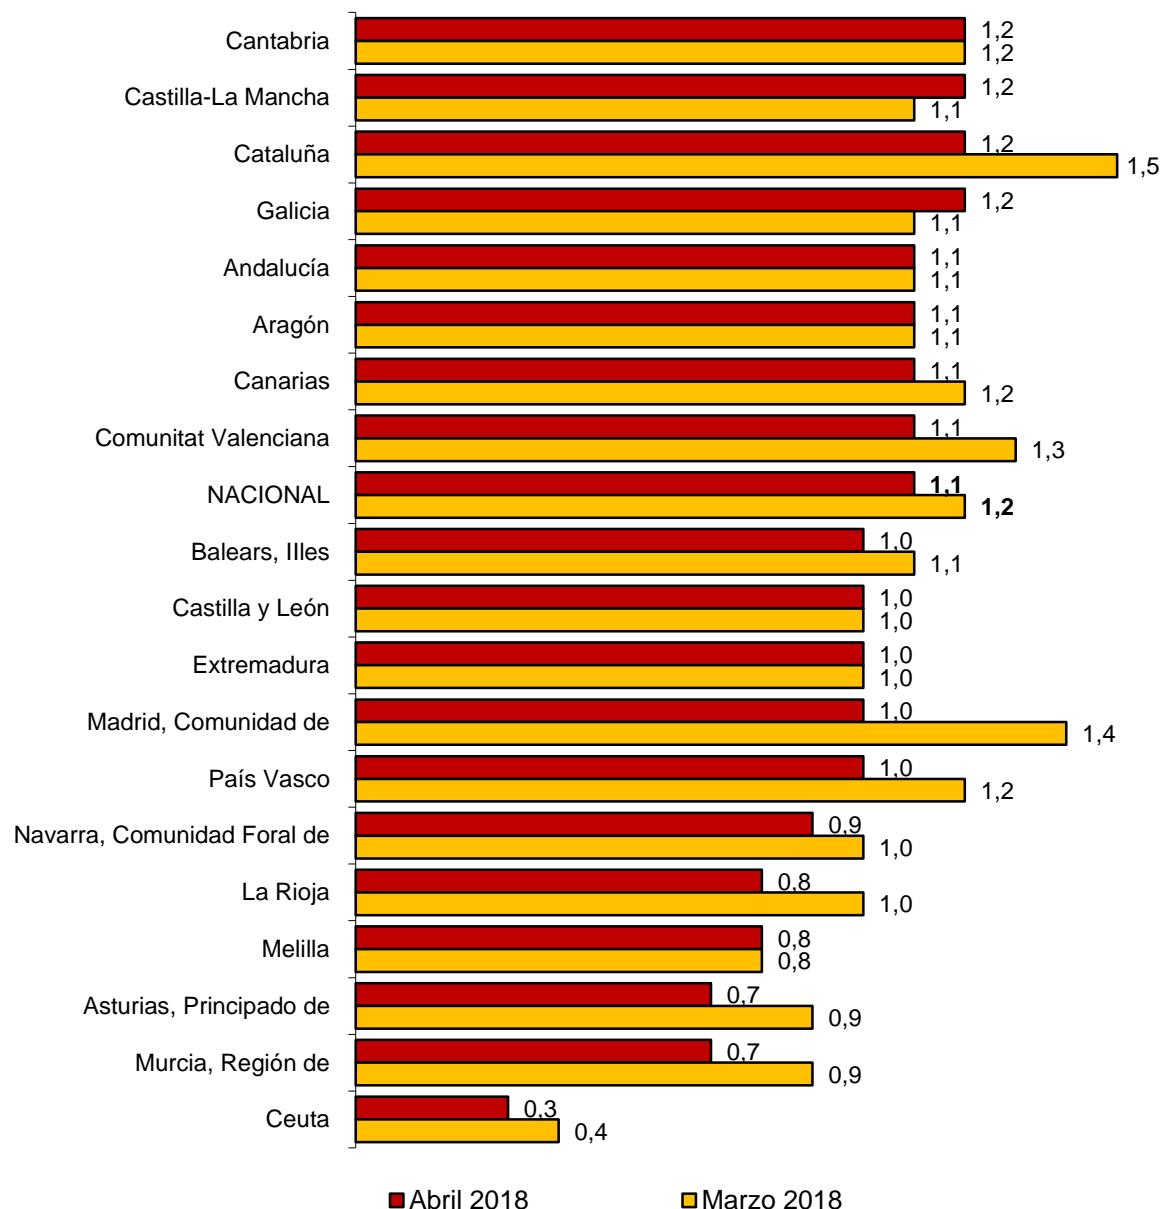

Tourist packages	-5.3	-0.090
Gas	-3.2	-0.050
Passenger air transport	-3.8	-0.018

Results by Autonomous Community. Annual variation rates

The annual rate of the CPI decreased in most Autonomous Communities in April as compared to March. The greatest decreases occurred in Comunidad de Madrid and Cataluña, with decreases of four and three tenths, respectively.

In turn, Castilla-La Mancha and Galicia were the only Autonomous Communities that increased their annual rate, with an increase of one tenth in both.

Consumer Price Index at Constant Taxes

In April, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **1.1%**, remaining the same as that of the general CPI.

The monthly variation rate of the CPI-CT was **0.8%**.

In turn, the HICP at Constant Taxes (HICP-CT) registered an annual variation of **1.1%**, remaining the same as that of the HICP.

The monthly variation rate of the HICP-CT was **0.8%**.
