➤ **Health**, with an annual change standing at **-0.4%**, having increased almost one-and-a-half points. This increase was due to the fact that the drop in the prices of *medicaments and other pharmaceutical products* was less pronounced this year than in 2009.

Despite the increase in the annual change, worth noting was the decrease in the change of the following group:

➤ **Transport**, whose annual change reached **7.9%**, four tenths less than that registered in April. This decrease was explained by the prices of *fuels and lubricants for personal transport equipment* increasing less this month than in May of last year.

## Contribution of the groups to the annual change of the CPI

The annual change of **core inflation** (overall index excluding unprocessed food and energy products) increased three tenths to **0.2%**, thus returning to positive levels.
