## Consumer Price Index (CPI). Base 2016

### June 2018

#### General index

|      | Monthly variation | Accumulated variation | Annual variation |
|------|-------------------|-----------------------|------------------|
| June | 0.3               | 1.2                   | 2.3              |

#### Main results

- The **annual variation rate** of the CPI in June was **2.3%**, two tenths higher than that registered the previous month.
- The **annual rate of core** inflation decreases one tenth, reaching **1.0%**.
- The **monthly** variation of the general index was **0.3%**.
- The **annual rate** of the **Harmonised Index of Consumer Prices** (HICP) stood at **2.3%**, representing an increase of two tenths as compared with May.

#### Annual evolution of consumer prices

The annual rate of the general Consumer Price Index (CPI) in June was **2.3%**, two tenths higher than that registered in the previous month.

The groups with the greatest positive influence in this annual rate increase were:

- **Transport**, with an annual variation rate of **6.1%**, one percentage point above that of the previous month. This increase was due to the rise in the prices of *fuels and lubricants* this month, compared to the decrease experienced last year. Also noteworthy, although in the opposite direction, was *passenger air transport*, whose prices fell this month, while they increased in June 2017.
- **Food and non-alcoholic beverages**, whose rate increased by five tenths, standing at **2.5%**. Particularly important in this evolution were the increase in the price of *fresh fruits*, higher than that recorded in 2017, and the decrease in the price of *fresh vegetables*, less significant than that recorded last year.

It is also worth noting the negative influence of the prices of *fish and seafood*, and *oils and fats*, which fell this month while they increased in June last year. And also the increase in *meat* prices, which was less intense than in 2017.

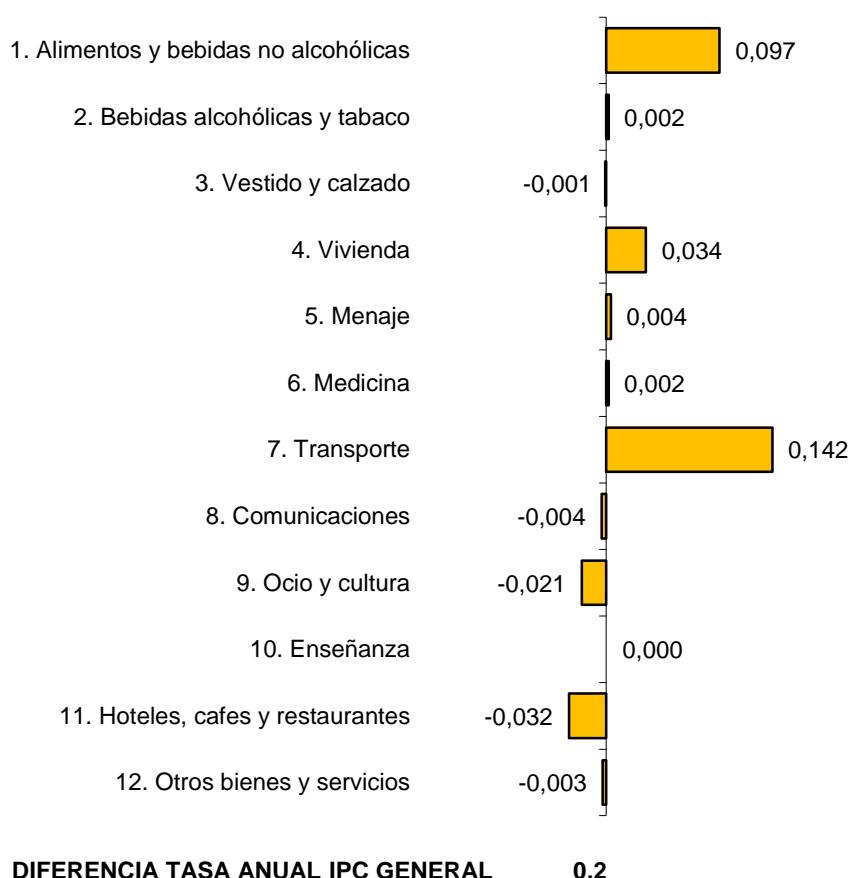

- **Housing**, whose rate increased by three tenths of a percentage point to **2.6%**, due to the increase in the prices of *heating gas oil*, which fell in 2017, and of *electricity*, which increased

less in June last year. Gas prices, on the other hand, had a negative influence since they dropped this month, compared to the increase experienced in June 2017.

On the other hand, the groups with the most negative influence were:

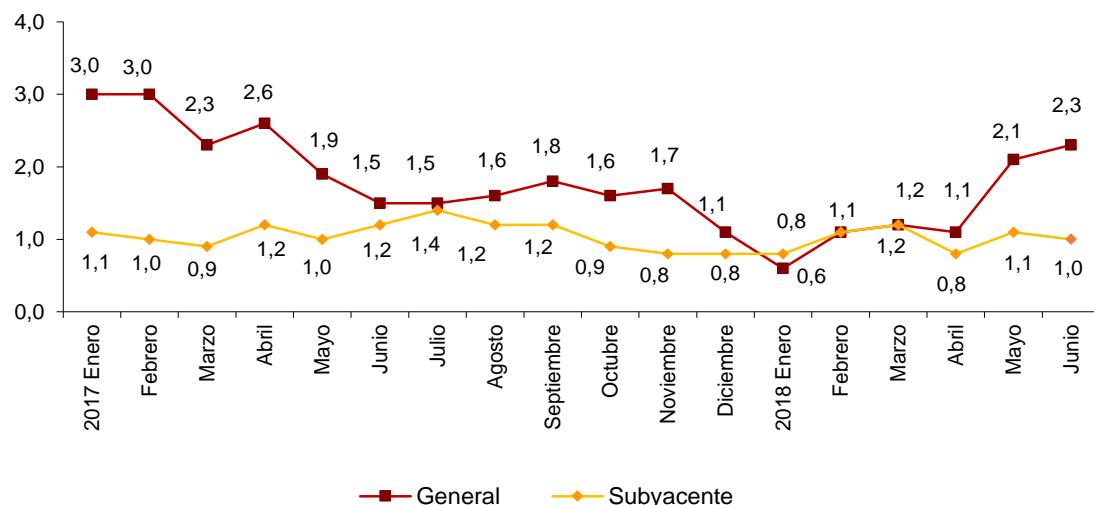

- **Hotels, cafés and restaurants**, whose rate decreased by three tenths of a percentage point, standing at **1.7%**, mainly due to the fact that the prices of *accommodation services* rose less this month than they did the same month of the previous year.
- **Leisure and culture**, whose variation decreased by two tenths to **0.6%**. This behaviour was mainly due to the increase in the prices of *tourist packages*, which was lower than in 2017.

#### Influencia de los grupos en la tasa anual del IPC

The annual variation rate of **core inflation** (general index excluding unprocessed food and energy products) decreased by one tenth of a point to **1.0%**, standing more than one point below that of the general CPI.

Índice general y subyacente**

### Monthly evolution of consumer prices

In June, the monthly variation rate of the general CPI was **0.3%**.

The groups with the greatest positive contribution to the general index were:

- **Food and non-alcoholic beverages**, which showed a variation rate of **0.5%** and a contribution of **0.088**. Worth noting in this evolution was the increase in the prices of *fresh fruits*.

It is noteworthy, although in the opposite direction, the decrease in the prices of *fresh vegetables*.

- **Leisure and culture**, with a variation rate of **0.9%** mainly due to the increase in the prices of *tourist packages*. The contribution of this group to the general CPI was **0.076**.

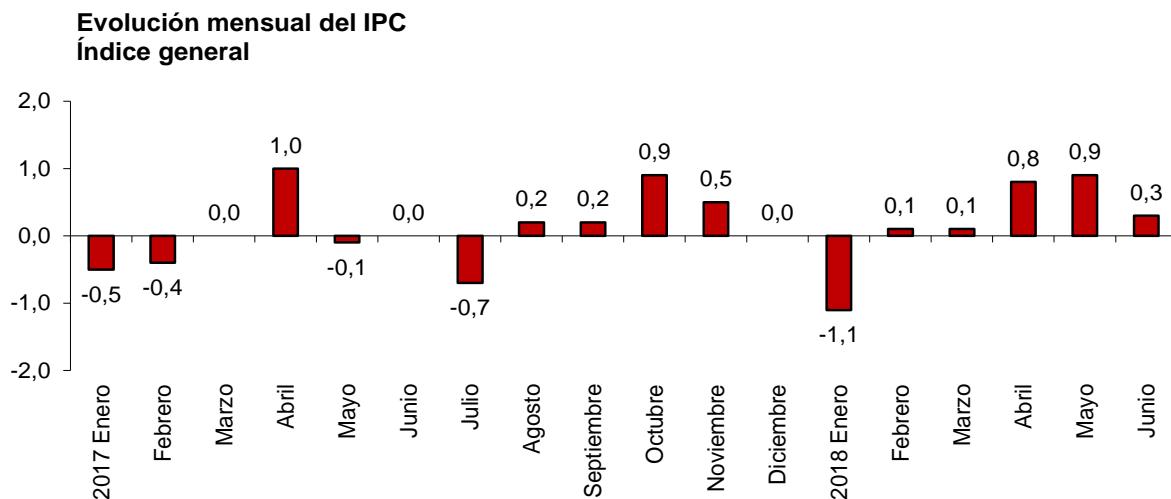

- **Housing**, with a variation of **0.5%** and a contribution of **0.070**, due to the increase in the prices of *electricity* and, to a lesser extent, of *heating gas oil*.

- **Transport**, whose variation rate of **0.4%**, was almost entirely explained by the increase in the prices of *fuels and lubricants*. The contribution of this group to the general CPI was **0.055**.

- **Hotels, cafés and restaurants**, with a rate of **0.3%** due to the increase in the prices of *accommodation services* and, to a lesser extent of *catering*. The contribution of this group to the CPI was **0.039**.

In turn, among the groups with a negative impact on the general index, worth noting were:

- **Clothing and footwear**, whose variation rate of **-1.2%** reflects the price performance at the beginning of the spring-summer sales period. The contribution of this group to the general index was **-0.079**.

A more detailed analysis shows the divisions that most affected the monthly rate of the CPI during the month of June.

#### **Divisions with the greatest positive contribution to the monthly rate of the CPI**

|  | Monthly rate<br>(%) | Contribution |
|--|---------------------|--------------|
| <b>Food products</b>                       |                     |              |
| Fruit                                      | 6.3                 | 0.126        |
| <b>Other divisions</b>                     |                     |              |
| Tourist packages                           | 5.3                 | 0.083        |
| Electricity                                | 1.5                 | 0.052        |
| Fuels and lubricants for personal vehicles | 0.8                 | 0.051        |
| Accommodation services                     | 2.2                 | 0.024        |
| Liquid fuels                               | 4.0                 | 0.022        |
| Catering                                   | 0.1                 | 0.015        |

#### **Divisions with the greatest negative contribution to the monthly rate of the CPI**

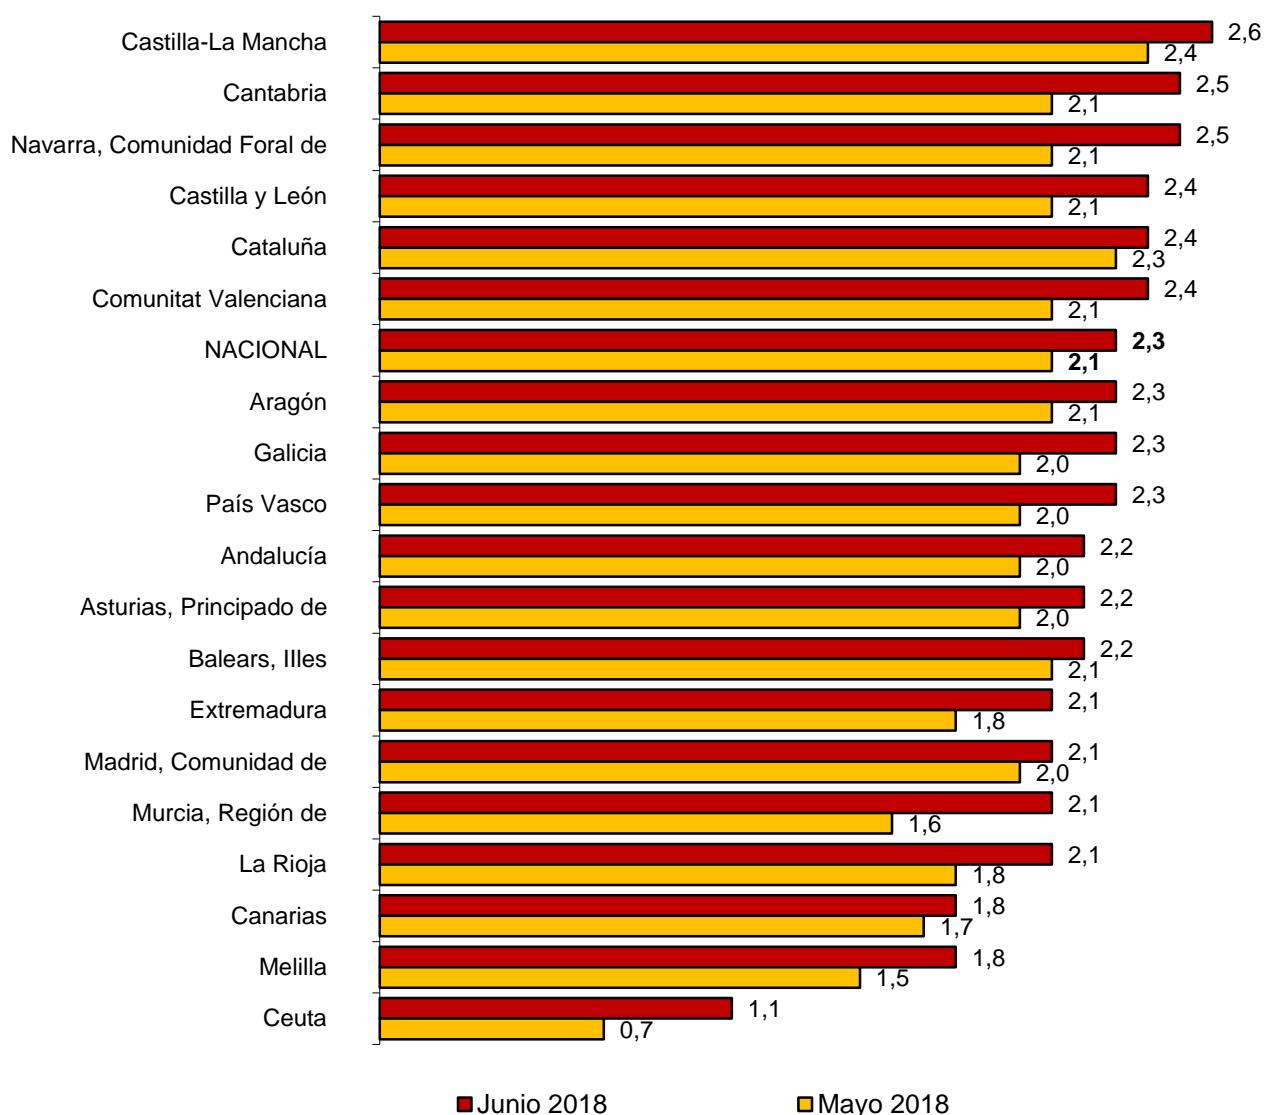

|                         | Monthly rate<br>(%) | Contribution |
|-------------------------|---------------------|--------------|
| <b>Food products</b>    |                     |              |
| Fresh vegetables        | -1.3                | -0.024       |
| <b>Other divisions</b>  |                     |              |
| Clothes                 | -1.5                | -0.070       |
| Games, toys and hobbies | -1.8                | -0.010       |

### Results by Autonomous Community. Annual variation rates

The annual rate of the CPI increased in all Autonomous Communities in June, as compared with May. The largest increases were recorded in Región de Murcia, Cantabria and Comunidad Foral de Navarra, with increases of five tenths the first and four tenths the last two.

On the other hand, Illes Balears, Canarias, Cataluña and Comunidad de Madrid were the Autonomous Communities with the lowest annual rate increases, with rises of one tenth.

## Consumer Price Index at Constant Taxes

In June, the annual variation rate at Constant Taxes (CPI-CT) stood at **2.3%**, the same as that recorded by the general CPI.

The monthly variation rate of the CPI-CT was **0.3%**.

In turn, the HICP at Constant Taxes (HICP-CT) registered an annual variation rate of **2.3%**, the same as that of the HICP.

The monthly variation rate of the HICP-CT was **0.2%**.
