

12 September 2018

Consumer Price Index (CPI). Base 2016
August 2018.**General index**

	Monthly variation	Accumulated variation	Annual variation
August	0.1	0.6	2.2

Main results

- The **annual variation** rate of the CPI in August was **2.2%**, the same as that recorded the previous month.
- The **annual rate of core** inflation decreases one tenth, reaching **0.8%**.
- The **monthly** variation of the general index was **0.1%**.
- The **annual variation rate** of the **Harmonised Index of Consumer Prices** (HICP) stood at **2.2%**, thus decreasing one tenth as compared with July.

Annual evolution of consumer prices

The annual rate of the general Consumer Price Index (CPI) in August was **2.2%**, the same as that recorded the previous month.

The groups with the greatest negative influence on the evolution of the annual rate were:

- **Transport**, with an annual variation rate of **5.2%**, seven tenths of a point below that of the previous month. This behaviour was due to the fact that the prices of *fuels and lubricants* rose less this month than in August 2017.

The drop in the price of *cars* compared to last year's increase also had an influence, albeit to a lesser extent.

- **Leisure and culture**, whose rate dropped by five tenths of a point, to **-1.1%**, mainly as a result of the fact that the prices of *tourist packages* increased less this month than in 2017.
- **Hotels, cafés and restaurants**, with a variation rate of **1.8%**, two tenths less than in July, mostly due to the fact that the prices of *accommodation services* increased less this month than they did in August last year.

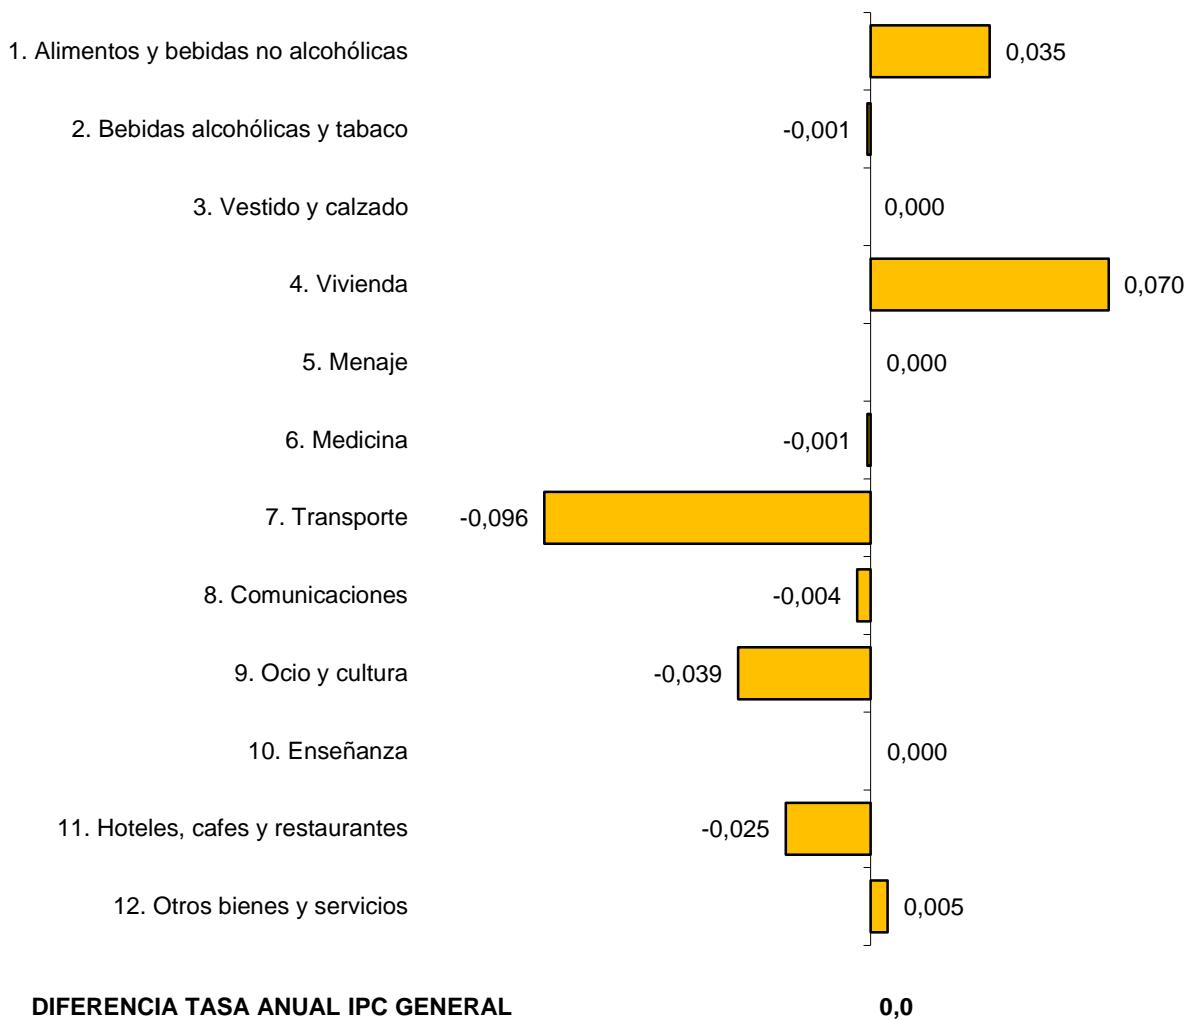

On the other hand, the groups with the most positive influence were:

- **Housing**, whose rate increased six tenths of a point and stood at **4.3%**, due to the increase in electricity prices, compared to the stability recorded last year.

It is noteworthy, although in the opposite direction, the decrease in the prices of *heating gas oil*, which increased in 2017.

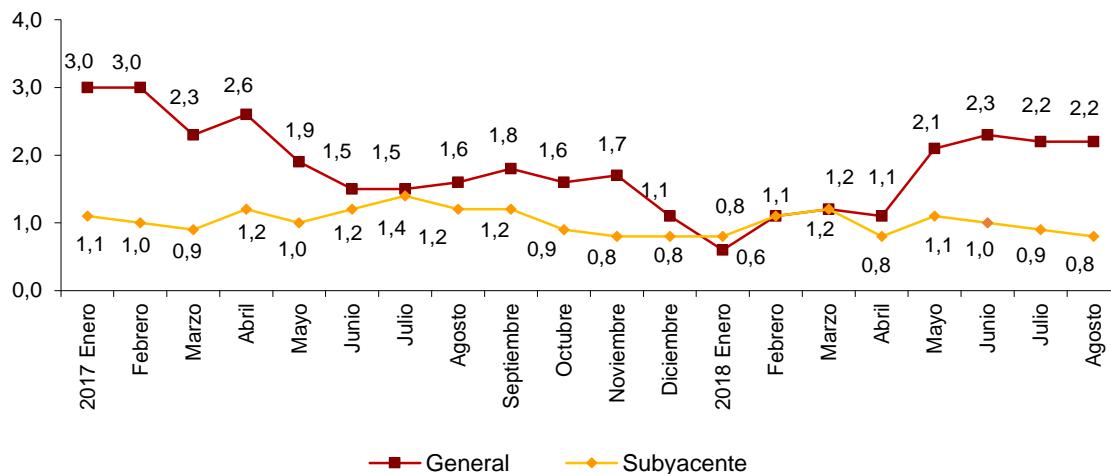

- **Food and non-alcoholic beverages**, with an annual variation of **2.0%**, two tenths above that of July. It is worth noting in this evolution that the prices of *fruits* decreased this month less than they did in August last year.

Influencia de los grupos en la tasa anual del IPC

The annual variation rate of **core inflation** (general index excluding unprocessed food and energy products) decreased by one tenth of a point to **0.8%**, almost one and a half points below the general CPI.

**Evolución anual del IPC
Índice general y subyacente**

Monthly evolution of consumer prices

In August, the monthly variation rate of the general CPI was **0.1%**.

The groups with the greatest positive contribution to the general index were:

- **Housing**, with a variation rate of **0.6%** due to the increase in the prices of *electricity*. The contribution of this group to the general CPI was **0.087**.

It is noteworthy, although in the opposite direction, the decrease in the prices of *heating gas oil*.

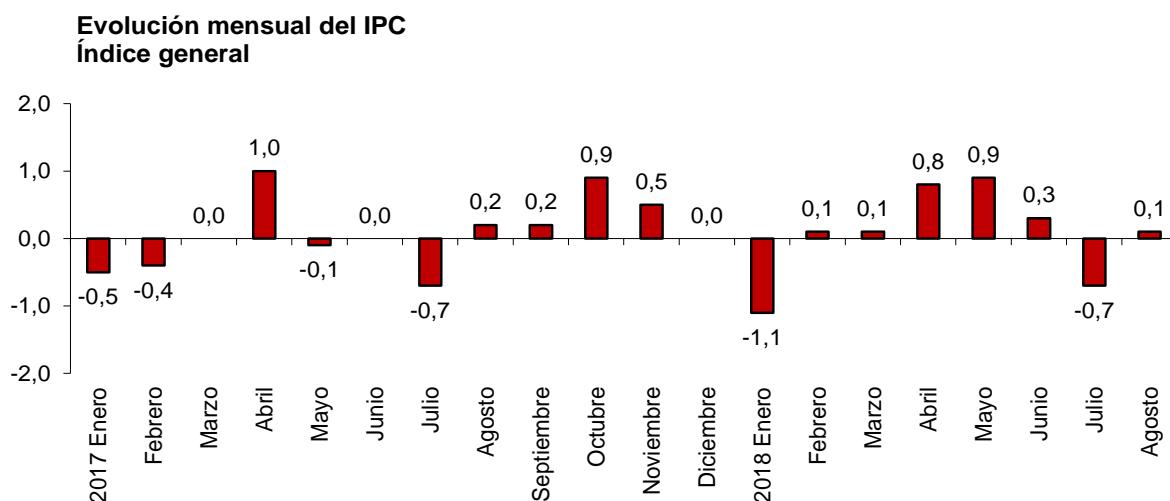

- **Leisure and culture**, which registered a variation rate of **0.7%** and a contribution of **0.060**, mainly due to the increase in the prices of *tourist packages*.

- **Hotels, cafés and restaurants**, with a monthly rate of **0.2%** and a contribution of **0.025**, due to the increase in the prices of most of its components.

- **Transport**, with a variation rate of **0.2%** explained almost entirely by the increase in the prices of *fuels and lubricants*. The contribution of this group to the general CPI was **0.023**.

On the other hand, among the groups with a negative contribution that most influenced, worth noting were:

- **Clothing and footwear**, with a rate of **-1.2%**, which reflects the behaviour of the prices in the last month of sales, and has a contribution of **-0.069** in the general CPI.

A more detailed analysis shows the activities that most affected the monthly rate of the CPI during the month of August.

Classes with the greatest positive contribution to the monthly rate of the CPI

	Monthly rate	Contribution (%)
Food products		
Bread and cereals	0.2	0.006
Other classes		
Electricity	2.5	0.087
Tourist packages	3.3	0.060
Fuels and lubricants for personal vehicles	0.4	0.024
Accommodation services	1.2	0.015
Other appliances, articles and products for personal care	0.6	0.011
Catering	0.1	0.010

Classes with the greatest negative contribution to the monthly rate of the CPI

	Monthly rate	Contribution (%)
Food products		
Fresh vegetables	-0.9	-0.016
Fresh fruits	-0.2	-0.005
Other classes		
Clothes	-1.3	-0.051
Footwear	-1.2	-0.017
Liquid fuels	-2.3	-0.013

Results by Autonomous Community. Annual variation rates

The annual rate of the CPI decreased in 12 Autonomous Communities in August compared with July, remained unchanged in two and increased in the remaining three. The greatest decline was recorded in Principado de Asturias, with a decrease of two tenths.

On the other hand, Canarias, Extremadura and Comunitat Valenciana were the Autonomous Communities where the annual rate increased, with increases of three tenths in the first and one tenth in the last two.

Consumer Price Index at Constant Taxes

In August, the annual variation rate of the Consumer Price Index at Constant Taxes (CPI-CT) stood at **2.2%**, the same as that recorded by the general CPI.

The monthly variation rate of the CPI-CT was **0.1%**.

In turn, the HICP at Constant Taxes (HICP-CT) registered an annual variation rate of **2.3%**, one tenth higher than that of the HICP.

The monthly variation rate of the HICP-CT was **0.1%**.
