Consumer Price Index (CPI). Base 2006
October 2010

Overall index

	Monthly change	Change over last December	Annual change
October	0.9	1.8	2.3

Main results

- The **annual change** of the CPI for the month of October increases two tenths, standing at **2.3%**.
- The **annual** change of **core** inflation is **1.1%**, the same as that registered in September.
- The **monthly change** of the overall index is **0.9%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **2.3%**, two tenths higher than the previous month.

Annual evolution of consumer prices

The annual change of the overall Consumer Price Index (CPI) in October was 2.3%, two tenths higher than the change registered in September.

The groups which most contributed to this increase were:

- **Housing**, with a change of **5.4%**, more than one point higher than previous month. This increase was explained, for the most part, by the fact that the prices of *electricity* showed an increase that remained stable in October 2009.
- **Food and non-alcoholic beverages**, whose annual change increased three tenths, standing at **0.4%**. The most noteworthy divisions due to their contribution to this change were *poultry meat* and *fresh fish*.

• **Transport**, with an annual change of **6.9%**, one tenth higher than that registered in September. This behaviour was due to the slight rise in prices of *fuels and lubricants for personal transport equipment* this month, while drops were registered last year.

In addition to the previously mentioned increases, worth noting was the decrease in the annual change of the following group:

• **Health**, whose annual change decreased five tenths, standing at **-1.0%**, due to the drop in prices for *medicaments and other pharmaceutical products* in October 2010, as compared with the stability in 2009.

Contribution of the groups to the annual change of the CPI

The annual change of **core inflation** (overall index excluding energy and unprocessed food) remained at **1.1%**, and its difference from the overall index stood at 1.2 points.

Monthly evolution of consumer prices

In October, the monthly change of the overall CPI was **0.9%**.

The groups with the most relevant positive monthly contribution to the overall index were the following:

- **Clothing and footwear**, whose monthly change of **9.8%** reflected the behaviour of the new winter season. Its contribution to the overall CPI was **0.749**.
- **Housing**, whose change of **1.4%** contributed **0.155**. This change was due, for the most part, to the increase in the price of *electricity*.

Likewise, among the groups with a negative contribution to the overall index, the most relevant groups were:

- **Recreation and culture**, with a monthly change of **-0.8%**, which contributed **-0.062** to the overall index, mainly due to the change in the price of *package holidays*.
- **Restaurants, cafés and hotels**, with a monthly change of **-0.2%** and a contribution of **-0.030** to the overall index. This performance was explained by the decrease in prices of *accommodation services*.
