### Overall index

	Monthly change	Change over last December	Annual change
November	-0.1	2.8	2.9

### Main results

- The **annual change** of the CPI for the month of November stands at **2.9%**, six tenths below the change registered the previous month.
- The **annual** change of **core** inflation decreases two tenths and stands at **2.3%**.
- **Monthly change** of the overall index is **-0.1%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **3.0%**, thus it remains as compared with October.

### Annual evolution of consumer prices

The annual change for the overall Consumer Price Index (CPI) in November was **2.9%** six tenths lower than that registered in October. This change was the same than the CPI flash estimate, published last 30 November.

The groups that most contributed in this drop were:

- **Transport**, whose annual change decreased more than three points standing at **3.1%**, due to the drops in prices of the *fuels and lubricants*, that increased in November 2011, and *motor cars*, mainly due to the effect of Fuel-Efficient Vehicle Incentive Program (PIVE).
- **Recreation and culture**, that presented an annual change of **1.2%**, eight tenths lower than October, mainly due to the decrease in prices of *recreational and sporting services*, that increased the previous year, and *package holidays*, that decreased more than in 2011.
- **Communication**, that decreased its rate one point, standing at **-2.7%**, mainly due to the decrease in prices of *telephone services*.

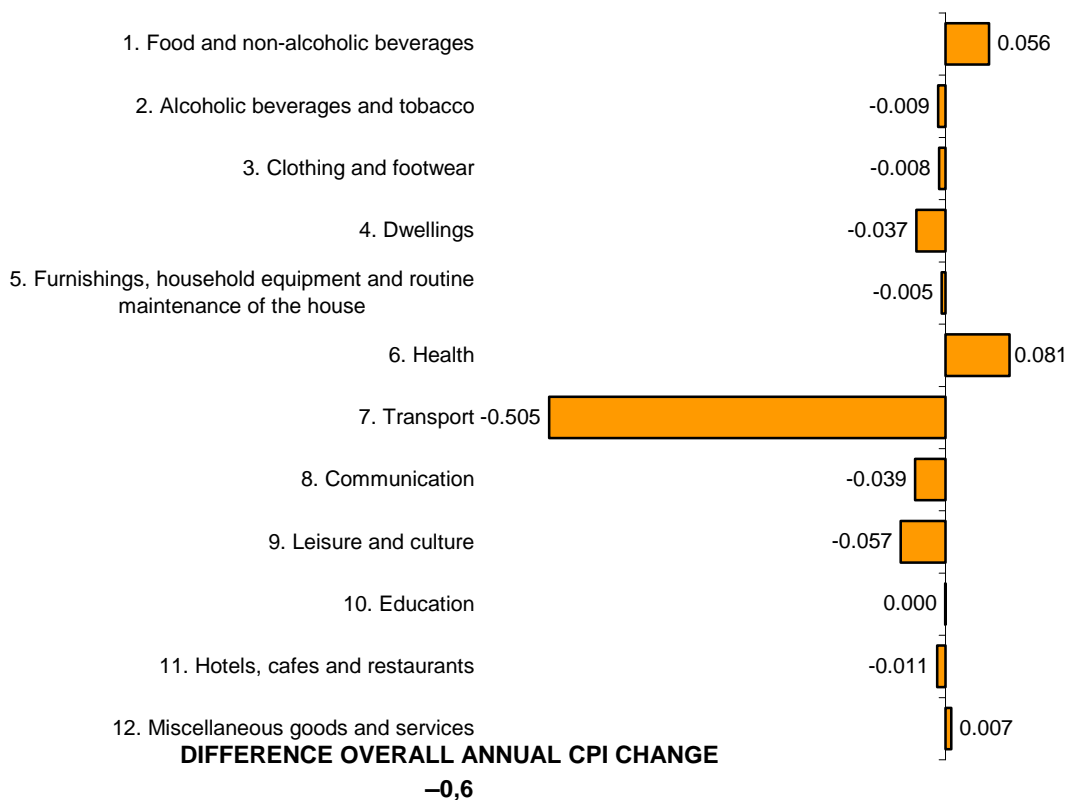

• **Housing**, with an annual rate of **5.8%**, three tenths below the previous month. This behaviour was due to the drop in prices of the *heating fuels*.

Despite the decrease of the annual change of the CPI, worth noting the increase in price of the following groups:

• **Health**, whose change increased three points up to **13.5%**. This rise was due to the stability in prices of *medical and other pharmaceutical products*, which decreased in November 2011.

• **Food and non-alcoholic beverages**, with an annual variation of **2.9%**, four tenths higher than the previous month. The areas highlighted by their influence in this increase were *edible oils, fresh vegetables, poultry meat and fresh potatoes and potatoes preparations*.
