Main results

- The **annual change** of the CPI for the month of November stands at **-0.4%**, three tenths below that registered in the previous month.
- The **annual change** of **core** inflation stands at **-0.1%**.
- The **monthly change** of the overall index is **-0.1%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **-0.5%**, showing a decrease of three tenths as compared to October.

Annual evolution of consumer prices

The annual rate for the overall Consumer Price Index (CPI) in November was **-0.4%**, three tenths below that registered the previous month.

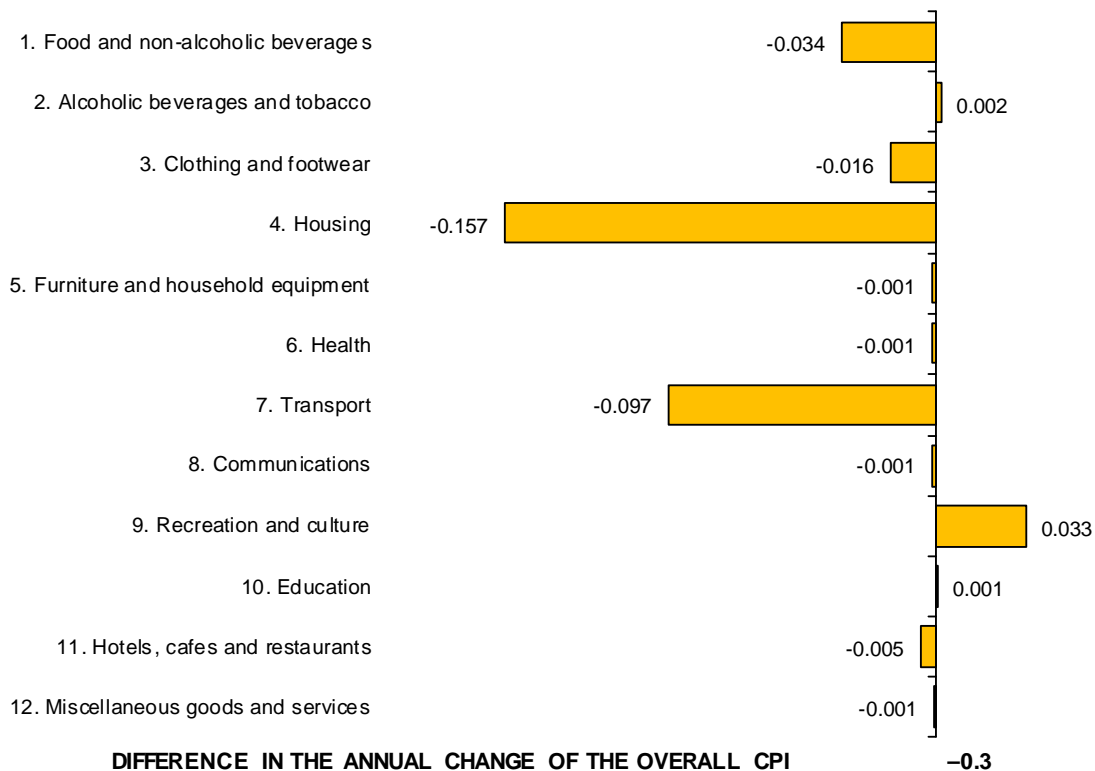

The groups that most contributed to this decrease were:

- **Housing**, with a variation of **0.0%**, more than one point below that registered in October. This behaviour was a consequence of the decrease in the prices of *electricity* this month.
- **Transport**, with a variation of **-1.7%**, six tenths below that recorded in the previous month. This reduction was due to the decrease in the prices of *fuels and lubricants*, which was greater than that recorded in November 2013.
- **Food and non-alcoholic beverages**, whose rate decreased two tenths, reaching **0.2%**. Worth noting in this behaviour was the decrease in the prices of *fresh vegetables*, as compared to the increase registered last year, and that of *fresh fish*, whose price increase was smaller this month as compared to 2013.

Despite the decrease in the annual change of the overall CPI, worth noting was the increase of:

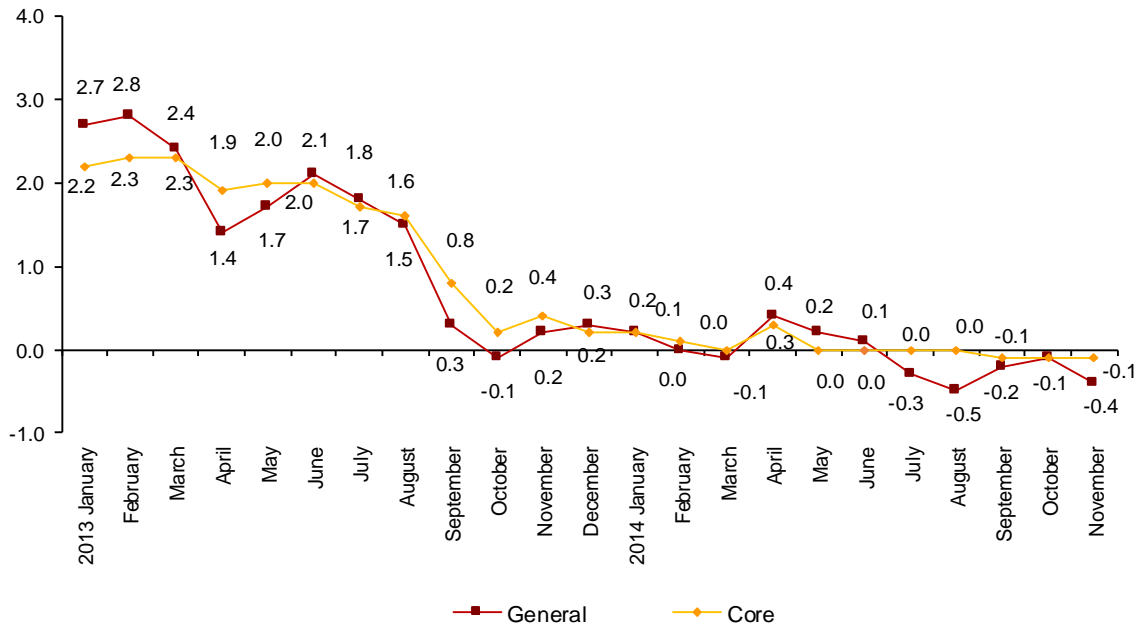

- **Recreation and culture**, with a variation of **-1.5%**, four tenths over that recorded in the previous month. This was due to the fact that the decrease in the prices of *package holidays* was smaller than in 2013.

Contribution of the groups to the annual change of the CPI

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) stood at **-0.1%**, three tenths over the rate of the overall CPI.
