|          | Monthly change | Change over last October | Annual change |
|----------|----------------|--------------------------|---------------|
| November | 0.4            | 0.3                      | -0.3          |

**Main results**

- The **annual change** of the CPI for the month of November stands at **-0.3%**, four tenths higher than that registered in the previous month.
- The **annual change** of **core** inflation increases one tenth, reaching **1.0%**.
- The **monthly change** of the overall index is 0.4%.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **-0.4%**, thus it increases five tenths as compared with October.

**Annual evolution of consumer prices**

The annual rate for the overall Consumer Price Index (CPI) in November was **-0.3%**, four tenths higher than that registered in the previous month.

The groups that most contributed to this variation were:

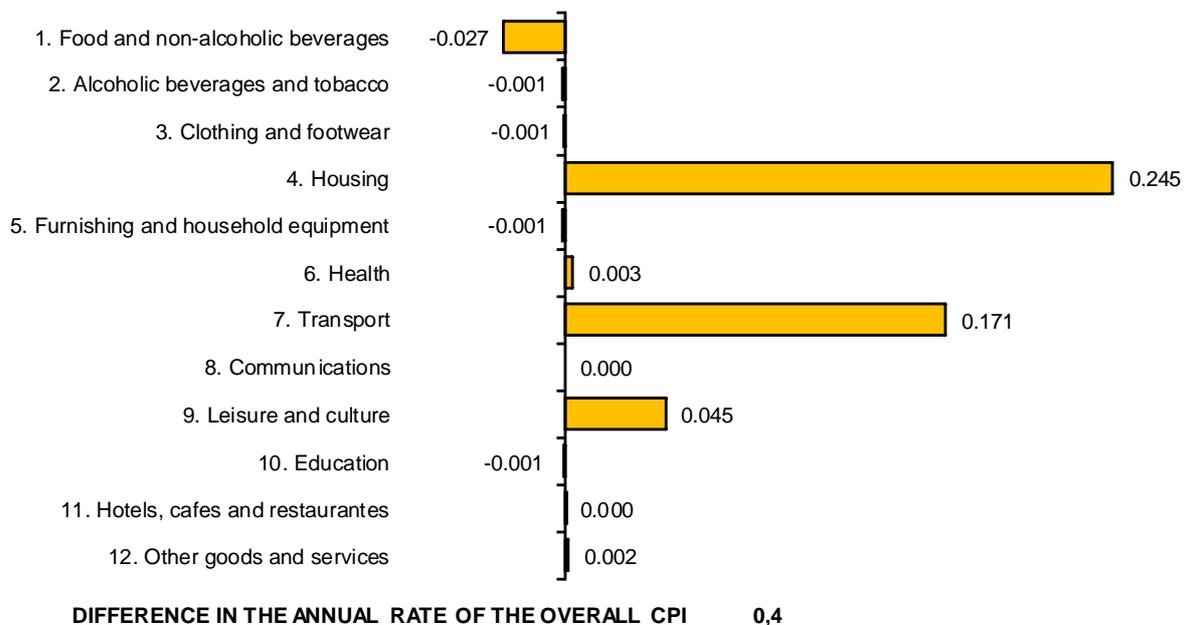

- **Housing**, whose rate stood at **-2.6%**, nearly two points higher than that of October. This was mainly due to the increase in the prices of *electricity*, as compared to the decrease of 2014.
- **Transport**, whose rate increased one point up to **-4.7%**. This was mainly due to the stability in the prices of *fuels and lubricants* this month, which decreased the previous year.
- **Leisure and culture**, whose rate stood at **0.7**, six tenths higher than that registered in the previous month. This was due to the decrease in the prices of *package holidays*, which was lower this month than in November 2014.

This increase is also influenced, in a lesser extent, by the increase of the price of *recreational and sporting services*, which decreased last year.

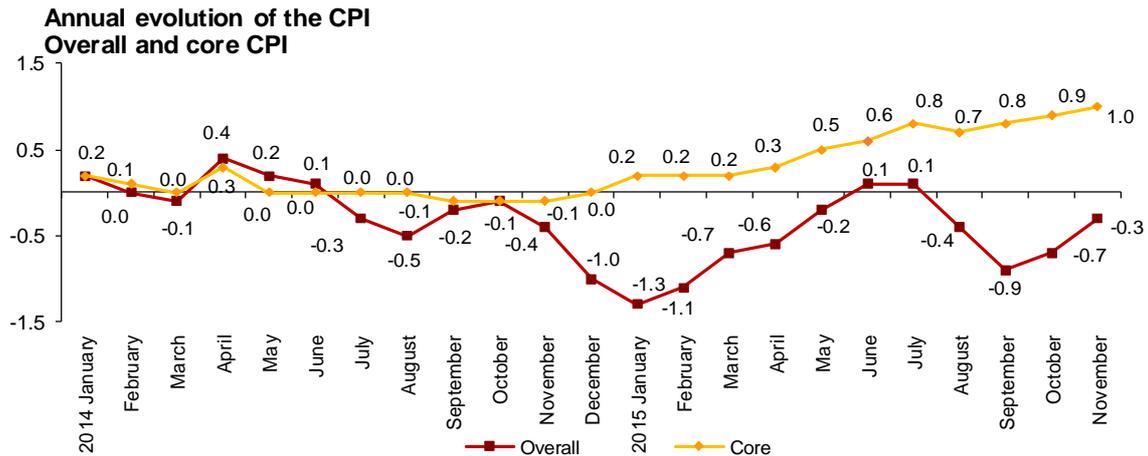

Despite the decrease in the annual change of the overall CPI, worth noting was the increase of:

• **Food and non-alcoholic beverages**, with a variation of **1.7%**, two tenths less that of the previous month. Worth noting in this behaviour was the decrease in the prices of *fresh vegetables*, greater than that registered in 2014.

## Contribution to the groups to the annual changes of the CPI

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) increased one tenth up to **1.0%**, standing almost one point and a half over the overall CPI rate.

### Monthly evolution of consumer prices
