The annual change in the flash estimate of the CPI stands at 0.8% in February, three tenths lower than that registered in January.

The annual rate of the flash estimate of the HICP is 0.9%

According to the flash estimate issued by the INE, the annual inflation of the CPI in February 2020 was 0.8%.

This indicator provides a preview of the CPI that, if confirmed, would imply a decrease of three tenths in the annual rate, since in January this change was 1.1%.

This behaviour highlights the increase in the prices of fuels, compared to the decrease experienced in 2018. Also influences, although in the opposite direction, the declines in electricity prices.

This behaviour highlights the decrease in the prices of fuels, compared to the increases recorded in 2019.

Annual evolution of the CPI

Overall index. Percentage

In turn, the annual variation of the flash estimate of the HICP in February stands at 0.9%. If confirmed, the annual rate of the HICP would decrease two tenths with respect to the previous month.
Monthly rate trend

According to the flash estimate of the CPI, consumer prices registered a variation of –0.1% as compared with January.

¹ The last data refers to flash estimate

In turn, the monthly change of the HICP flash estimate in February stood at 0.0%.

Review and data update

The data released today is an advance of the final CPI and HICP data, which will be published next month. Until then, the results are available in INEbase.
Metodological note

The Consumer Price Index (CPI) is a statistical measure of the evolution of the prices of goods and services consumed by the population that reside in family dwellings in Spain.

In turn, the Harmonised Index of Consumer Prices (HICP) is a statistical indicator whose objective is to provide a common average of the inflation that allows conducting international comparisons.

**Type of survey:** continuous on a monthly basis

**Base period:** 2016 (CPI) and 2015 (HICP)

**Reference period of weightings:** year prior to the current year

**Sample of municipalities:** 177

**Number of items:** 480 (CPI) y 479 (HICP).

**Number of observations:** approximately 220,000 prices per month.

**Functional classification:** ECOICOP.

**General method of calculation:** chained Laspeyres

**Collection method:** interviewers in establishments and centralised collection for special items.
