

30 April 2019

**Flash estimate of the Consumer Price Index (CPI) and  
of the Harmonised Index of Consumer Prices (HICP)  
April 2019**

**The annual change in the flash estimate of the CPI stands at 1.5% in  
March, two tenths higher than that registered in March**

**The annual rate of the flash estimate of the HICP is 1.6%**

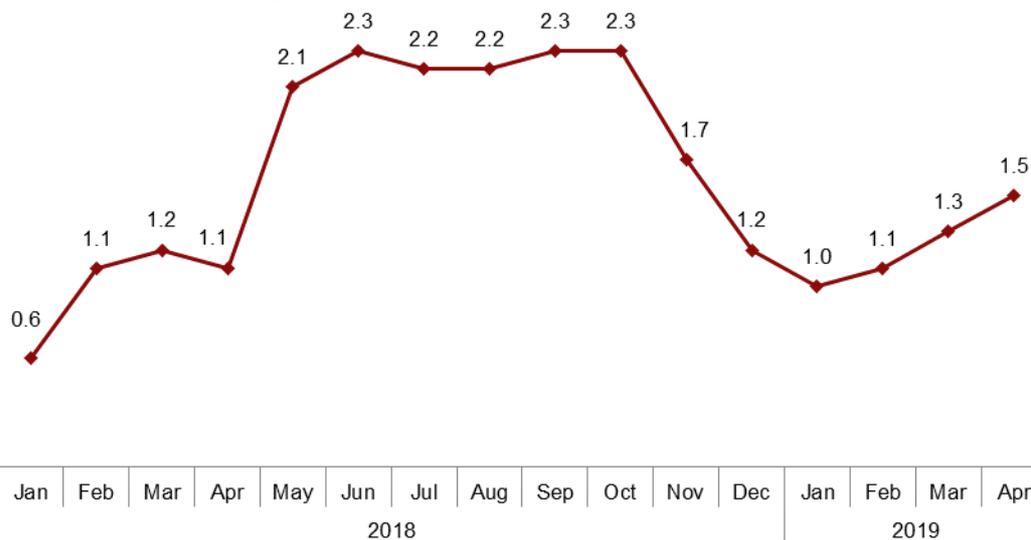

According to the flash estimate issued by the INE, the annual inflation of the CPI in April 2019 was 1.5%.

This indicator provides a preview of the CPI that, if confirmed, would imply an increase of two tenths in the annual rate, since in March this change was 1.3%.

This behaviour highlights the increase in the prices of *tourist packages* compared to the decrease experienced in 2018.

**Annual evolution of the CPI<sup>1</sup>**

Overall Index. Percentage

<sup>1</sup> The last data refers to the flash estimate

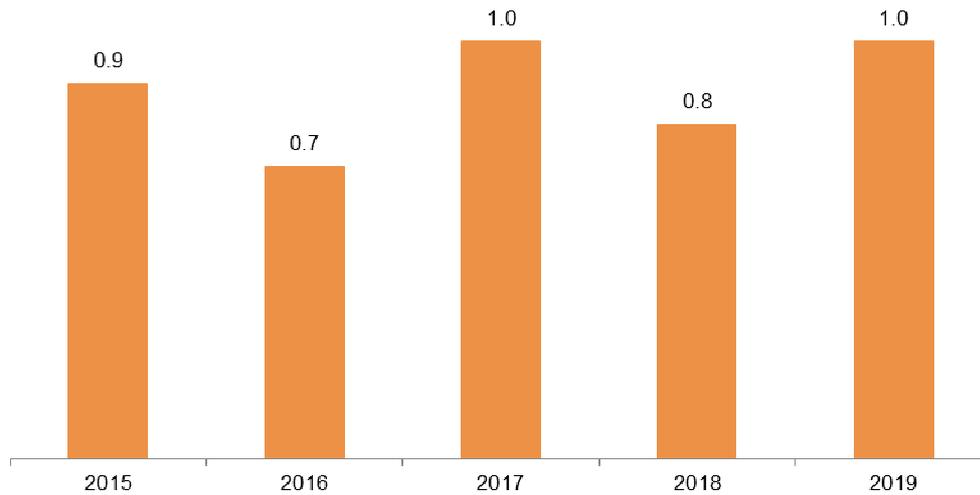

In turn, the annual variation of the flash estimate of the HICP in April stands at 1.6%. If confirmed, the annual rate of the HICP would increase three tenths with respect to the previous month.

## Monthly rate trend

According to the flash estimate of the CPI, consumer prices registered a variation of 1.0% as compared with March.

## Evolution of the monthly rate of the CPI in April<sup>1</sup>

Overall Index. Percentage

<sup>1</sup> The last data refers to flash estimate

In turn, the monthly change of the HICP flash estimate in April stood at 1.1%.

## Review and data update

The data released today is an advance of the final CPI and HICP data, which will be published next month. Until then, the results are available in INEbase.

## Methodological note

The Consumer Price Index (CPI) is a statistical measure of the evolution of the prices of goods and services consumed by the population that reside in family dwellings in Spain.

In turn, the Harmonised Index of Consumer Prices (HICP) is a statistical indicator whose objective is to provide a common average of the inflation that allows conducting international comparisons

**Type of survey:** continuous on a monthly basis

**Base period:** 2016 (CPI) and 2015 (HICP)

**Reference period of weightings:** year prior to the current year

**Sample of municipalities:** 177

**Number of items:** 480 (CPI) y 479 (HICP).

**Number of observations:** approximately 220,000 prices per month.

**Functional classification:** ECOICOP.

**General method of calculation:** chained Laspeyres

**Collection method:** interviewers in establishments and centralised collection for special items
