

29 June 2022

**Flash estimate of the Consumer Price Index (CPI) and  
of the Harmonised Consumer Price Index (HCPI)  
June 2022**

**The annual change in the flash estimate of the CPI stands at 10.2%  
in June, one point and a half more than the one registered in May**

**The annual rate of the flash indicator of underlying inflation  
increases six tenths, to 5.5%**

**The annual rate of the flash indicator of the HCPI is 10.0%**

### **Annual rate evolution**

The estimated annual inflation of the CPI in June 2022 is 10.2%, according to the flash indicator prepared by the NSI.

This indicator provides a preview of the CPI which, if confirmed, would mean an increase of one point and a half in its annual rate, since in May this variation was 8.7%, and would be at its highest level since April 1985.

This evolution is mainly due to the increase in *fuel prices*, higher this month than in June 2021, and in *food and non-alcoholic beverages*, compared to the stability recorded last year.

The increase in *hotel, café and restaurant prices*, higher than last year, also played a role.

For its part, the estimated annual variation rate of underlying inflation (general index excluding non-processed food and energy products) increases six tenths, to 5.5%. If confirmed, it would be the highest since August 1993.

## Annual evolution of the CPI<sup>1</sup>

General and underlying index. Percentage

<sup>1</sup> The last data refers to the flash estimate

## Monthly rate evolution

Consumer prices registered a rate of 1.8% in June compared to May, according to the leading indicator of the CPI.

## Monthly rate of CPI<sup>1</sup>

General index. Percentage

<sup>1</sup> The last data refers to the flash estimate

## Harmonized Consumer Price Index (HCPI)

In June, the estimated annual variation rate of the HCPI stood at 10.0%, one point and a half more than the one registered in the previous month.

For its part, the estimated monthly variation of the HCPI is 1.8%.

## Data reviews and updates

The data released today is a preview of the final CPI and HCPI data to be released next month. Until then, the results are available at INEbase.

## Methodological note

The Consumer Price Index (CPI) is a statistical measure of the evolution of the prices of goods and services consumed by the population that reside in family dwellings in Spain.

In turn, the Harmonised Consumer Price Index (HCPI) is a statistical indicator whose objective is to provide a common average of the inflation that allows conducting international comparisons

**Type of survey:** continuous on a monthly basis

**Base period:** 2021 (CPI) and 2015 (HCPI)

**Reference period of weightings:** year prior to the current year

**Sample of municipalities:** 177

**Number of items:** 462 (CPI) y 461 (HCPI), traditionally collected, and 493 scanner data.

**Number of observations:** approximately 210,000 prices per month.

**Functional classification:** ECOICOP.

**General method of calculation:** chained Laspeyres

**Collection method:** interviewers in establishments, *scanner data* and centralised collection for special items
