

28 February 2013

**Flash estimate of the Consumer Price Index (CPI) and
of the Harmonised Index of Consumer Prices (HICP).**
February 2013

**The annual variation of the flash estimate of the CPI stands at 2.7%
in the month of February**

The annual variation of the flash estimate of the HICP is 2.8%

According to the flash estimate issued by the INE, the annual inflation of the CPI in February 2013 was expected to be 2.7%.

This indicator provides a preview of the CPI that, if confirmed, would imply a maintenance of its annual rate, since in January this variation was 2.7%.

Annual Evolution of the CPI, base 2011 ⁽¹⁾
Overall

⁽¹⁾ The last piece of data refers to the flash estimate

In turn, the annual variation of the flash estimate of the HICP in February stood at 2.8%. If confirmed, the annual variation of the HICP would maintain as compared with the previous month.

Performance of the monthly rate¹

According to the flash estimate of CPI, consumer prices registered a 0.1% increase, as compared with the month of January.

Performance of the PCI monthly rate in January

In turn, monthly variation of the flash estimate HICP in February stood at 0.1%.
