

Industrial Production Index (IPI). Base 2005

August 2010. Provisional Data

Main Results

- The **Industrial Production Index** experiences an **interannual variation** in **August** of **3.2%**, five-and-a-half points above that registered in July.
- By economic destination of the goods, all the sectors present positive interannual rates, except Capital goods.
- The average rate of the IPI stands at 1.5% in the first eight months of the year.
- Industrial production registers positive interannual rates in 12 Autonomous
 Communities in the month of August.

Annual evolution of Industrial Production

The Industrial Production Index (IPI) experienced an interannual variation of **3.2%** in August, five -and-a-half points above that registered in July. Taking July and August together, these being the months in which industries concentrated their holidays period, industrial production decreased 0.1% as compared with the same period the previous year.

By economic destination of the goods, the industrial sectors that most influenced the interannual decrease in industrial production in August were:

- Intermediate goods, with an annual rate of 6.5% and an effect of 2.074 on the general index, due to the generalised increases in the majority of activities composed by this sector. Worth noting were the increases registered in *Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary form and Manufacture of other chemical products.*
- **Non-durable consumer goods,** with an annual rate of **5.3%** and an effect of **1.606** on the general index, caused by the increases observed in the majority of activities in this sector. Among these, worth noting was *Manufacture of other food products*.

In turn, the **Capital goods** sector was the only one to have a negative influence on the general index, with an annual variation of **-8.1%** and an effect of **-1.269** due to the evolution of *Manufacture of metal elements for construction* and *Manufacture of motor vehicles*.

A more detailed analysis showed the activities that most affected the annual rate of the IPI in the month of August.

Activities with the greatest positive effect on the annual rate of the general index

	Annual	Effect
Activity: CNAE 2009 Group	rate (%)	
Petroleum refinement	9.7	0.481
Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics		
and synthetic rubber in primary forms	13.6	0.433
Manufacture of other food products	15.5	0.432
Manufacture of other chemical products	18.8	0.327

Activities with the greatest negative effect on the annual rate of the overall index

	Annual	Effect
Activity: CNAE 2009 Group	rate (%)	
Manufacture of metal elements for construction	-16.2	-0.622
Manufacture of motor vehicles	-21.1	-0.383
Manufacture of elements made of concrete, cement and plaster	-18.0	-0.295
Manufacture of knutted and crocheted garments	-30.1	-0.219

Year-to-date average rates

The average for the Industrial Production Index registered a variation rate of **1.5%** in the first eight months of the year, as compared with the same period the previous year.

By economic destination of the goods, this rate was positive for Intermediate goods (4.0%), Non-durable consumer goods (2.4%) and Energy (1.5%). Conversely, it was negative in Durable consumer goods (–6.1%) and in Capital goods (–2.7%).

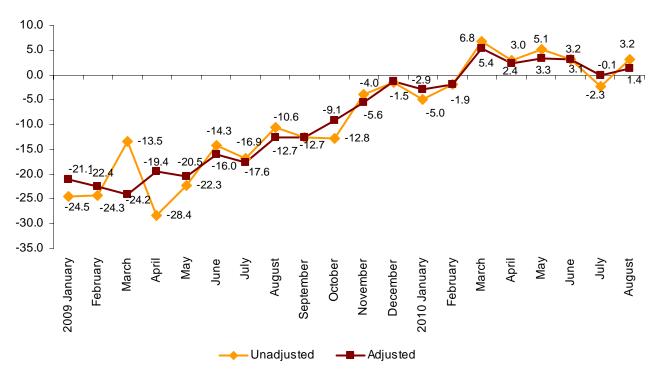

Annual and average rates of the IPI General index and by economic destination

Evolution of the IPI, adjusted for the calendar effect

After correcting the calendar effect, that is, the difference between the number of working days in a given month in different years, the interannual variation of the IPI in the month of August was **1.4**%, one-and-a-half points higher than that registered in July. The average for the indices for July and August, adjusted for calendar effect, registered a variation rate of 0.5% as compared with same period the previous year.

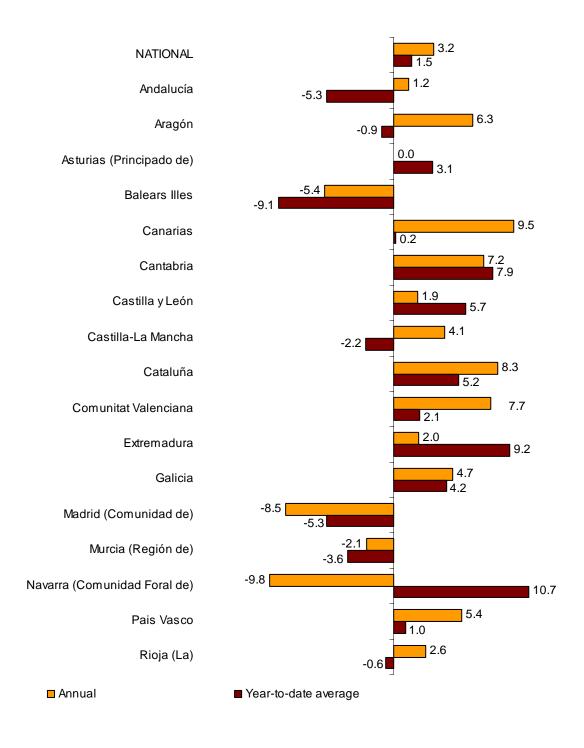

Annual evolution of the IPI General index, adjusted and unadjusted

Results by Autonomous Community

A total of 12 Autonomous Communities registered positive interannual variations in August, among which, of note were Canarias (9.5%) and Cataluña (8.3%). In turn, Comunidad Foral de Navarra (–9.8%) and Comunidad de Madrid (-8.5%) presented the highest negative annual rate.

Annual and average rates of the IPI General index by Autonomous Community
