

24 July 2012

**Industrial Price Index (IPRI). Base 2005**  
June 2012. *Provisional data*

**Main results**

- The **interannual** rate of the IPRI for the month of June is **2.5%**, seven tenths below the rate registered in May.
- The **monthly** variation of the general index is **-0.5%**.
- The most **Autonomous Communities** register **positive interannual** rates in June.
- The Autonomous Community that records the greatest interannual variation is **Illes Balears**, with **5.4%**.

**Annual evolution of industrial prices**

The interannual variation of the Industrial Price Index (IPRI) stood at 2.5% in June, seven tenths above the rate registered in May.

By economic destination of the goods, the industrial sectors with the highest negative effect on the general index were:

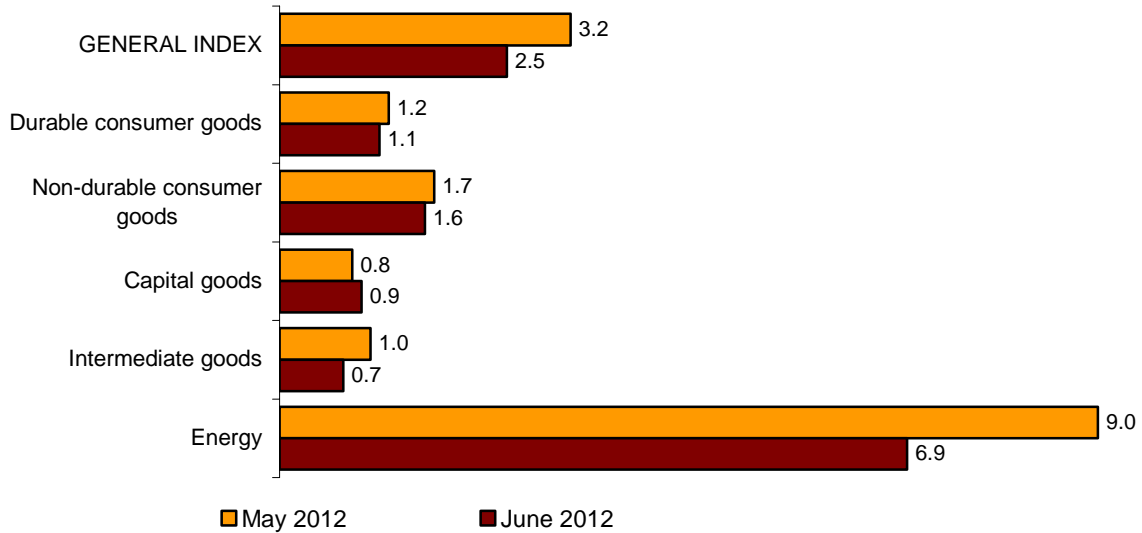

- **Energy**, whose interannual variation decreased more than two points, standing at **6.9%**, the lowest rate since February 2010. This drop was due to the decrease in prices of *Petroleum refinement*, that registered the lowest annual rate since November 2009.
- **Intermediate goods**, whose annual rate was **0.7%**, three tenths below than that registered in May and the lowest since March 2010. This decrease was due to the drop in prices of *Manufacture of basic iron, steel and ferro-alloy products*.

On the other hand, the only industrial sector with a positive effect on the general index was:

- **Capital goods**, whose annual variation stood at **0.9%**, one tenth higher than that registered the previous month. The activity that highlighting by its influence in this rise was *Manufacture of motor vehicles*, due to that the increase in prices this month was higher than that registered the same month the previous year.

## Annual rates of the IPRI

### General index and by economic destination

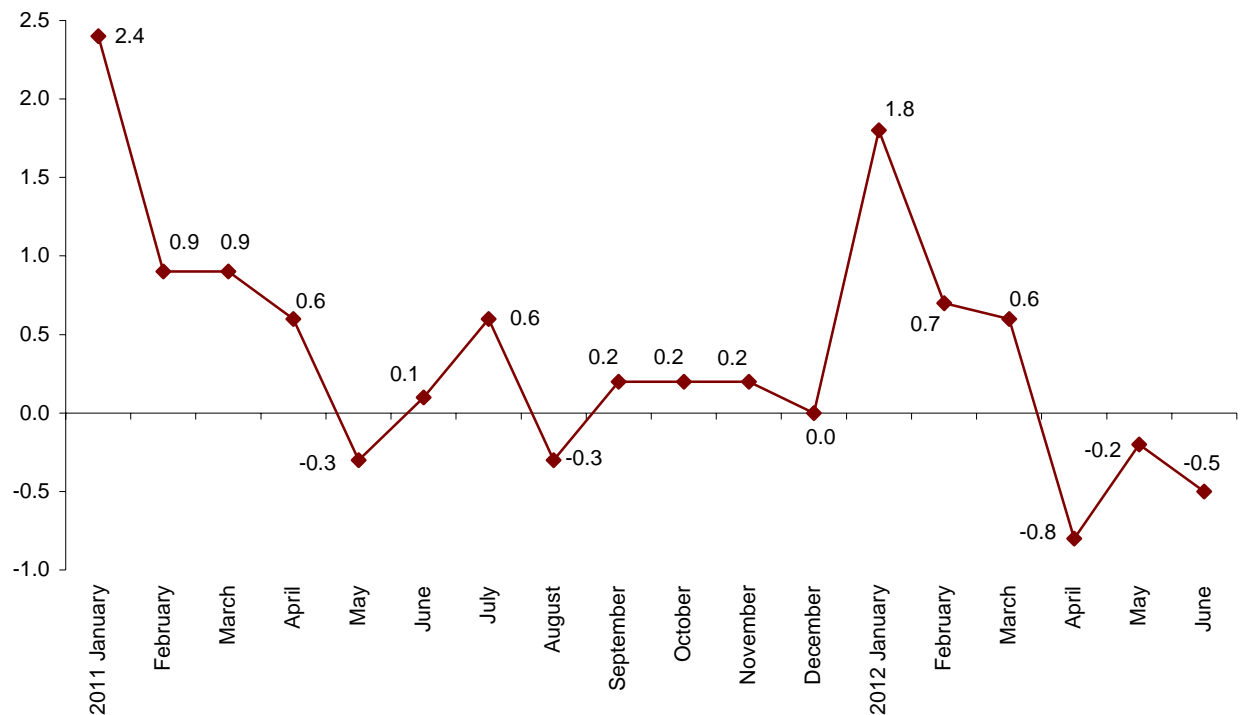

## Monthly evolution of industrial prices

In June, the monthly variation of the IPRI was **-0.5%**.

By economic destination of the goods, the sectors that presented the greatest negative monthly effect on the general index were:

- **Energy**, with a monthly variation of **-1.8%**, that reflected the decrease in prices of *Petroleum refinement*. Its effect on the general index was **-0.493**.
- **Intermediate goods**, with a monthly variation of **-0.3%** contributed **-0.104**. This was due, mainly, to the decrease in prices of *Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary forms* and *Manufacture of basic iron, steel and ferro-alloy products*.

## Monthly evolution of the IPRI General index

A more detailed analysis showed the activities that most affected the monthly rate of the IPRI in the month of June.

### Activities with the greatest positive effect on the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Production, transport and distribution of electrical energy	0,9	0,119
Manufacture of motor vehicles	0,6	0,019
Manufacture of animal feed products	0,7	0,016

### Activities with the greatest negative effect on the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Petroleum refinement	-6,1	-0,605
Manufacture of basic chemical products, nitrogen compounds, fertilisers, plastics and synthetic rubber in primary forms	-1,8	-0,054
Manufacture of basic iron, steel and ferro-alloy products	-1,5	-0,036
Production of precious metals and other non-ferrous metals	-1,1	-0,017

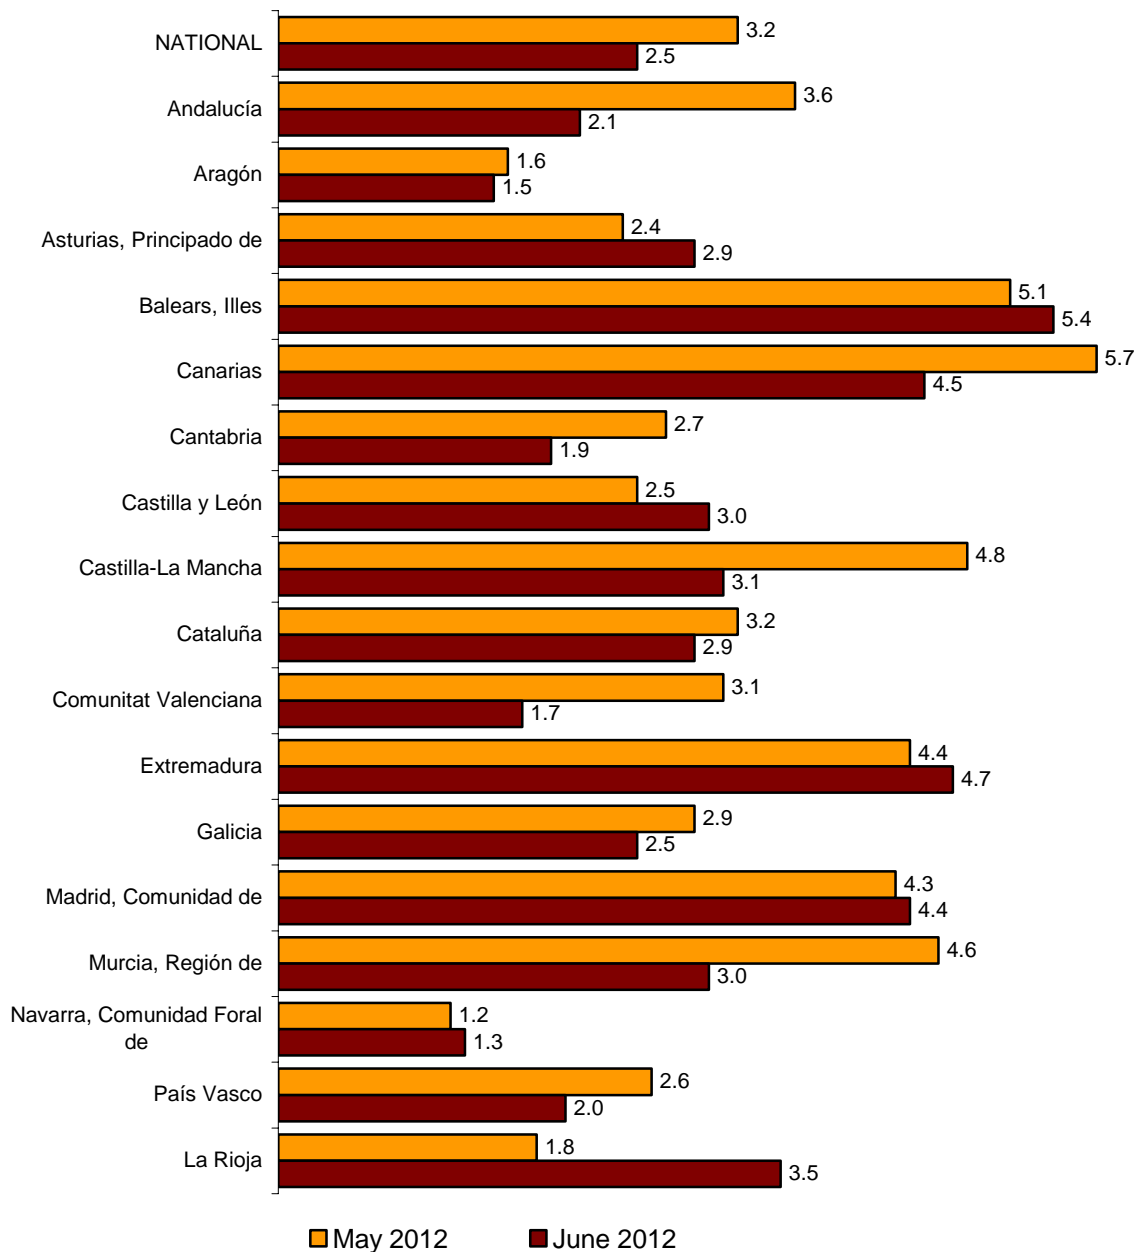

## Results by Autonomous Community. Annual variation rates

In almost all Autonomous Communities the annual rate decreased in June. The greatest decreases corresponded to Castilla-La Mancha (1.7 points), Region de Murcia (1.6 points) and Andalucía (1.5 points), whose rates stood at 3.1%, 3.0% and 2.1%, respectively.

In turn, worth noting the increase of the annual rate in La Rioja (1.7 points), standing at 3.5%.
