

**Industrial Price Index. Base 2015**  
June 2022. Provisional data

**The annual variation of the Industrial Price Index decreased four tenths, to 43.2%**

**The monthly rate of industrial prices was 1.9%**

**Annual evolution of industrial prices**

The annual rate of the general Industrial Price Index (IPRI) was 43.2% in the month of June, four tenths below that registered in May.

By the economic destination of the goods, the industrial sectors with a negative influence on the evolution of the annual rate of the General IPRI were:

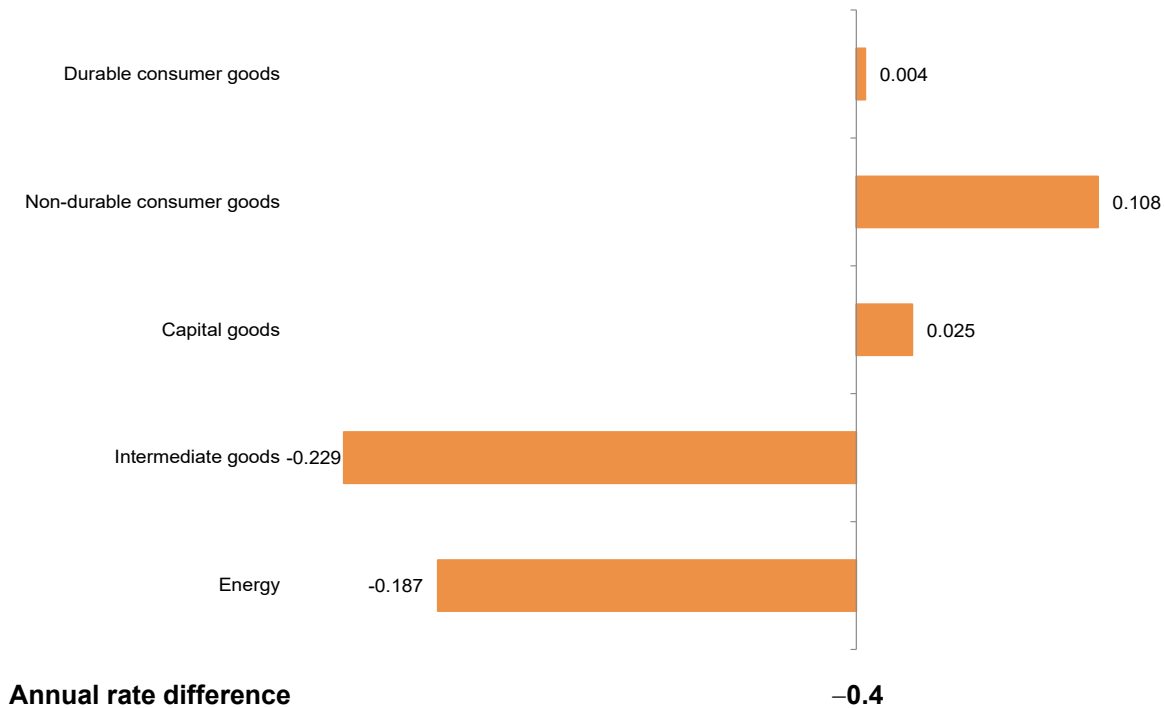

- **Intermediate goods**, whose rate decreased one point, to 24.1%. This was due to the drop in the prices of the *Manufacture of basic iron and steel and of ferro-alloys*, which increased in June of last year.
- **Energy**, whose variation fell more than two points, to stand at 111.6%. Also noteworthy in this evolution was the decrease in the prices of *Electric power generation, transmission and distribution*, which rose in the same month of 2021.

While in the opposite direction, it was also of note that the prices of the *Manufacture of refined petroleum products* and *Manufacture of gas; distribution of gaseous fuels through mains* increased more this month than in the previous year.

On the other hand, among the industrial sectors with a positive influence, worth noting were:

- **Non-durable consumer goods** had an annual rate of 10.4%, five tenths above that of the previous month. This was the result of increases in the prices of the *Manufacture of dairy products*, which fell in the same month last year, and of the *Processing and preserving of meat and production of meat products*, compared to the stability registered in 2021.

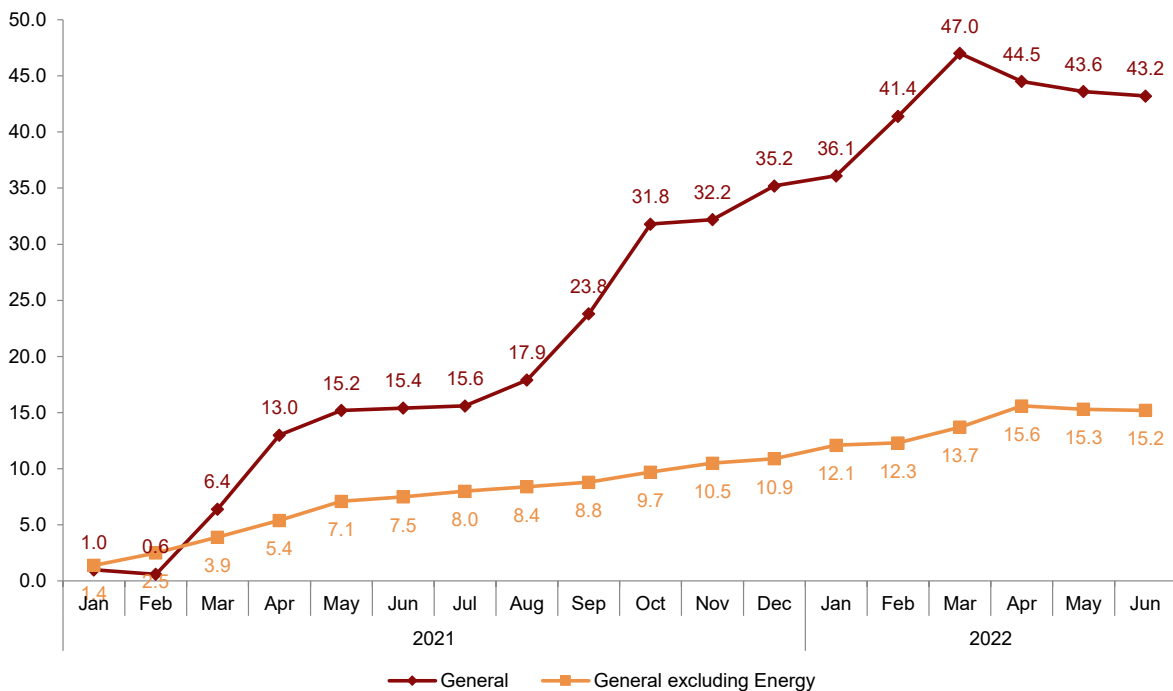

## Contribution of industrial sectors to the annual rate of the IPRI

The annual variation rate of the general index excluding Energy decreased by one tenth, to 15.2%, standing nearly 28 points below that of the general IPRI.

## Annual evolution of the IPRI

General index and general index without Energy Percentage

### Monthly evolution of industrial prices

In June, the monthly variation of the overall IPRI was 1.9%.

By economic destination of the goods, all the industrial sectors presented a positive monthly contribution. Among them, worth noting were:

- **Energy**, with a monthly rate of 5.3% and an impact of 1.809, primarily caused by the increases in the prices for the *Manufacture of refined petroleum products* and of *Gas Production; distribution by pipeline of gaseous fuels*.

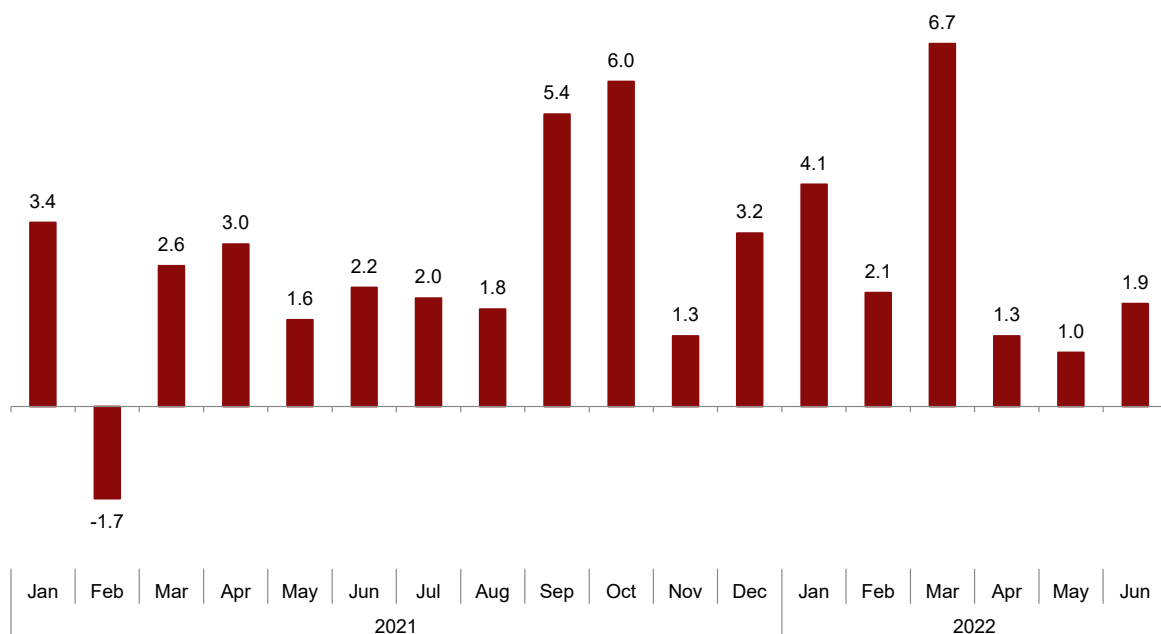

Also noteworthy in this sector, although in the negative sense, was the decrease in the prices of *Electric power generation, transmission and distribution*.

- **Non-durable consumer goods**, whose variation of 0.3% contributed 0.071. Of note in this evolution was the increase in the prices of *Processing and preserving of meat and production of meat products* and *Manufacture of dairy products*.

- **Capital goods**, with a monthly rate of 0.5%; this was due to an increase in the prices of *Manufacture of motor vehicles*. The contribution of this sector to the overall IPRI was 0.056.

### Monthly evolution of the IPRI

General index. Percentage

A more detailed analysis shows the activities that most affected the monthly rate of the IPRI in the month of June.

## **Activities with the greatest positive contribution to the monthly rate of the IPRI**

<b>Activity (CNAE-09 groups)</b>	<b>Monthly rate (%)</b>	<b>Contribution</b>
Manufacture of refined petroleum products	14.4	1,579
Manufacture of gas; distribution of gaseous fuels through mains	6.8	0,555
Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms	1.4	0,059
Manufacture of motor vehicles	2.0	0,047
Manufacture of prepared animal feeds	1.2	0,034
Processing and preserving of meat and production of meat products	0.6	0,031
Manufacture of dairy products	1.1	0,021
Manufacture of plastic products	0.8	0,020
Printing and service activities related to printing	1.7	0,019
Manufacture of pulp, paper and paperboard	2.4	0,017
Manufacture of grain mill products, starches and starch products	2.1	0,017

## **Activities with the greatest negative contribution to the monthly rate of the IPRI**

<b>Activity (CNAE-09 groups)</b>	<b>Monthly rate (%)</b>	<b>Contribution</b>
Electric power generation, transmission and distribution	-2.3	-0.327
Manufacture of basic iron and steel and of ferro-alloys	-6.6	-0.164
Manufacture of vegetable and animal oils and fats	-2.1	-0.055
Manufacture of basic precious and other non-ferrous metals	-2.6	-0.044

**Results by Autonomous Communities. Annual variation rates**

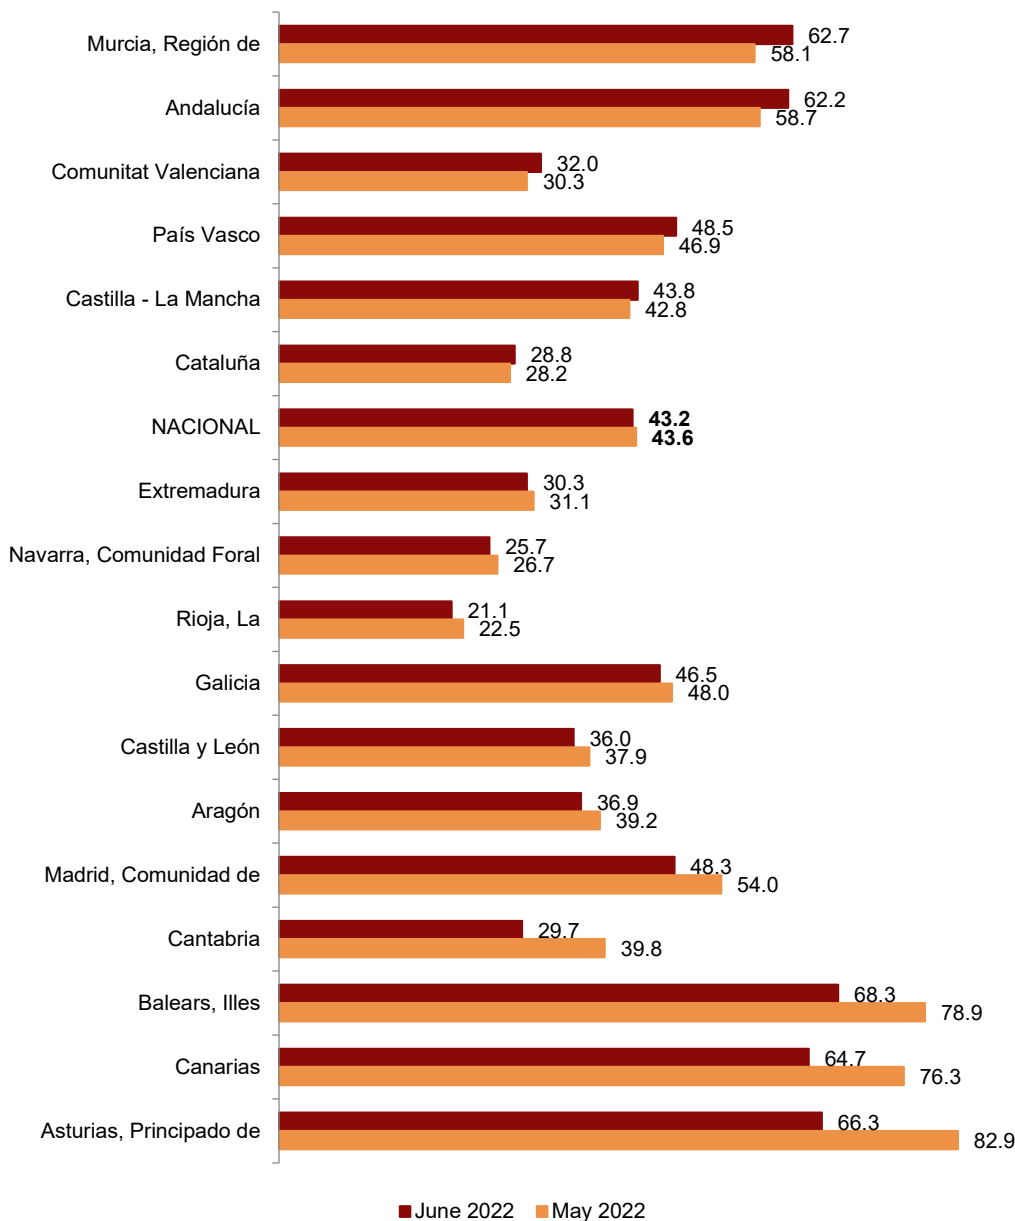

Compared to May, in June the annual rate of the IPRI decreased in 11 Autonomous Communities and increased in the remaining six.

The greatest decreases were recorded in Principado de Asturias, Canarias and Illes Balears, with decreases of 16.6, 11.6 and 10.6 points respectively.

For their part, the communities where the rate increased the most were Región de Murcia, Andalucía and Comunitat Valenciana, with rises of 4.6, 3.5 and 1.7 points, respectively.

**Annual variation rates of the IPRI**

Index by Autonomous Community. Percentage

## Data Review and Update

Coinciding with today's publication, the INE has updated the data of the IPRI series corresponding to the last three months, with the month of March 2022 becoming definitive. The results are available at INEbase.

## Methodological note

The Industrial Price Index (IPRI) is a short-term indicator that measures the monthly evolution of the prices of industrial products manufactured and sold in the domestic market, in the first step of their commercialisation, that is to say, at ex-factory prices, excluding transport and commercialisation costs and invoiced VAT.

**Type of survey:** monthly continuous survey.

Base year: 2015.

**Reference period of the weightings:** the year preceding the current year

**Population scope:** industrial workplaces

**Sample size:** 9,000 industrial establishments and 1,500 items.

**Number of observations:** approximately 28,000 monthly prices.

**General calculation method:** Laspeyres' Chain Index.

**Collection method:** internet (IRIA system), e-mail, fax, telephone or postal mail.

For more information the methodology can be accessed at:

[http://www.ine.es/en/daco/daco42/daco423/metoipri2015\\_en.pdf](http://www.ine.es/en/daco/daco42/daco423/metoipri2015_en.pdf)

The standardized methodological report is at:

<http://www.ine.es/dynt3/metadatos/en/RespuestaDatos.html?oe=30051>

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information see the section [Quality at INE and the Code of Best Practices](#) on the INE website.
