

21 December 2012

Industrial Price Index (IPRI). Base 2005
November 2012. *Provisional data*

The annual rate of the Industrial Prices decreases six tenths in November and stands at 2.8%

The Industrial Prices decreases 0.5% as compared with the previous month

Annual evolution of industrial prices

The interannual variation of the Industrial Price Index (IPRI) stood at 2.8% in November, six tenths below the rate registered in October.

By economic destination of the goods, the industrial sector that most influenced in this drop was:

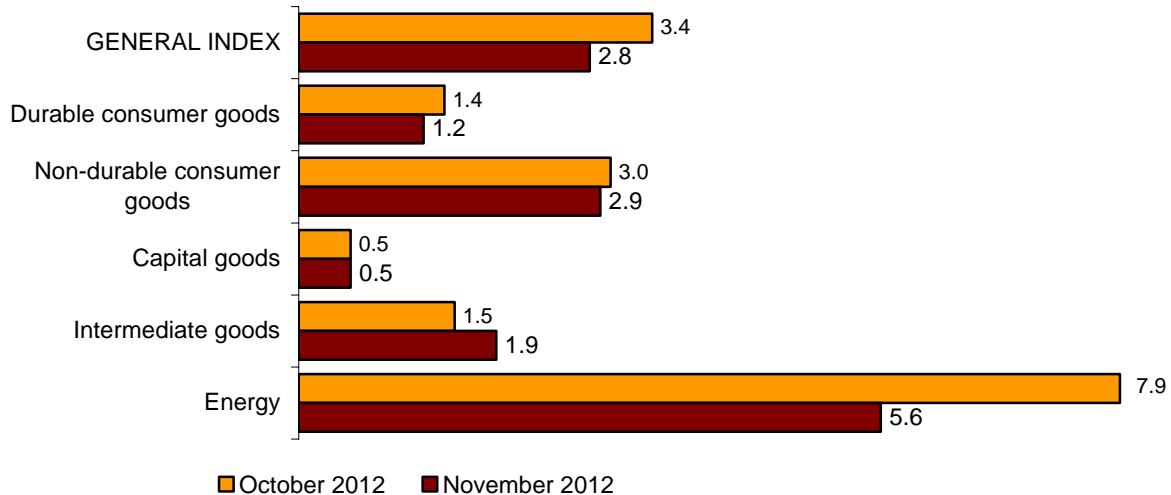

- **Energy**, whose annual variation decreased more than two points, standing at **5.6%**, the lowest rate registered by sector since November 2009. This drop was due to the decrease in prices of *Petroleum refinement*, as compared with the increase registered in November 2011.
- **Non-durable consumer goods**, with a rate decrease of one tenth, standing at **2.9%**. This drop was mainly due to the decrease in the prices of *Manufacture of vegetables and animal oils and fats* that increased in 2011.

Among the industrial sectors with the most positive effect on the annual rate, worth noting the following:

- **Intermediate goods**, whose annual variation was **1.9%**, four tenths above that registered in October. In this rise is highlighted the *Manufacture of basic iron and steel and of ferro-alloys* and of *Manufacture of prepared animal feeds*, whose prices decreased this month less than in November 2011.

Annual rates of the IPRI

General index and by economic destination

Monthly evolution of industrial prices

In November, the monthly variation of the IPRI was **-0.5%**.

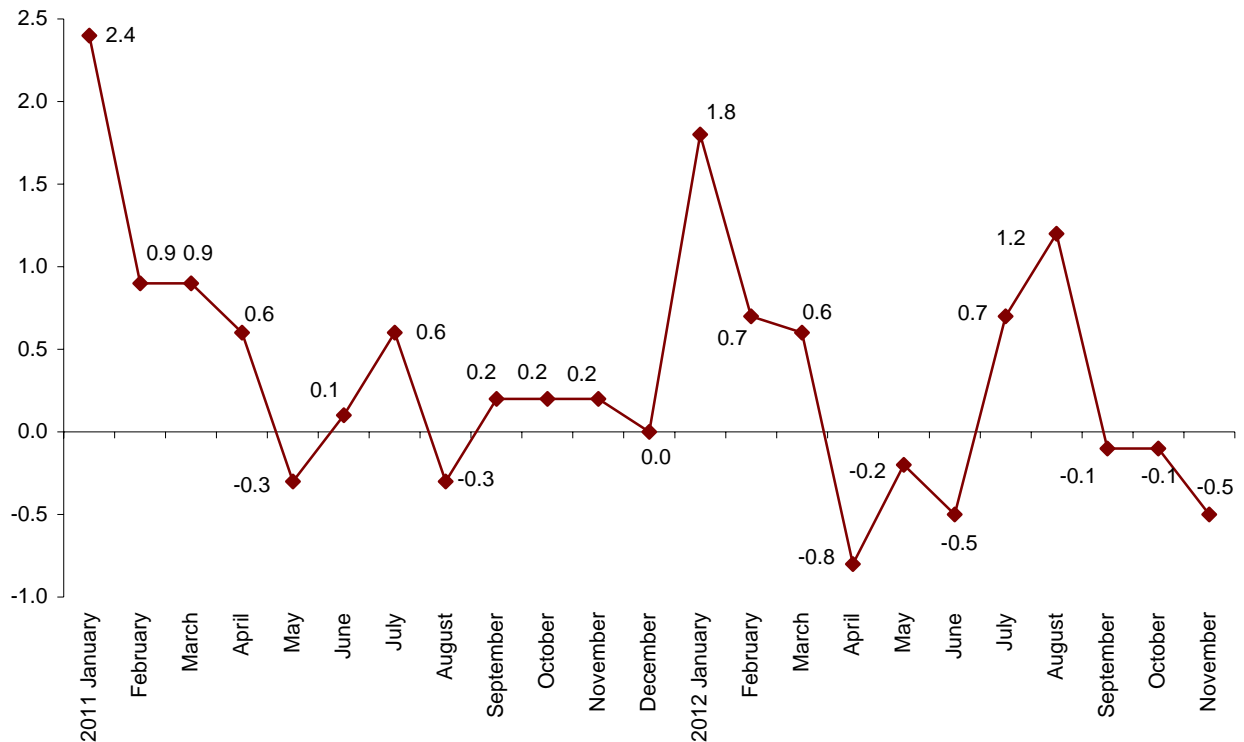

By economic destination of the goods, the sectors that presented the greatest negative effect on the general index were:

- **Energy**, with a monthly variation of **-1.4%**, that reflected the decrease in prices of *Petroleum refinement*. Its effect on the general IPRI was **-0.374**.
- **Intermediate goods**, whose monthly variation of **-0.1%** with an effect of **-0.026**. In this variation highlighting the decrease in prices of the *Manufacture of basic iron and steel and of ferro-alloys* and *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*.

In turn, the sectors that presented the greatest positive effect on the general index were:

- **Durable consumer goods**, with a monthly variation of **0.1%** and an effect of **0.003**. In this behaviour it is worth nothing the increase in prices of *Manufacture of beverages*.

Monthly evolution of the IPRI General index

A more detailed analysis showed the activities that most affected the monthly rate of the IPRI in the month of November.

Activities with the greatest positive effect on the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Manufacture of electric motors, generators, transformers and electricity distribution and control apparatus	0.9	0.014
Manufacture of beverages	0.4	0.013
Manufacture of grain mill products, starches and starch products	1.3	0.009

Activities with the greatest negative effect on the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Effect
Petroleum refinement	-3.9	-0.391
Manufacture of basic iron and steel and ferro-alloys	-1.1	-0.026
Manufacture of vegetables and animal oils and fats	-1.2	-0.016
Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms	-0.4	-0.012

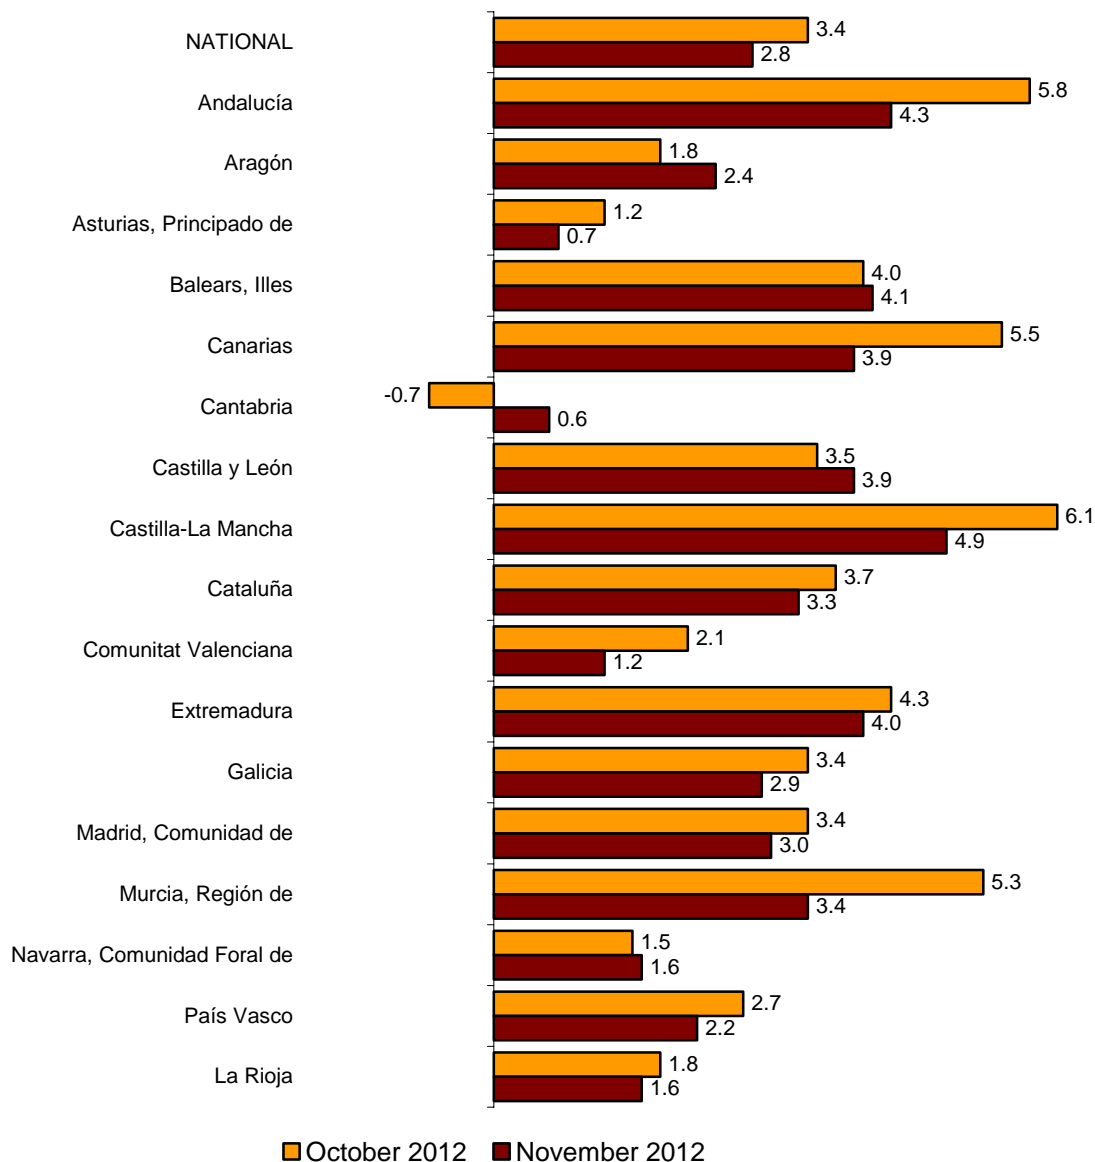

Results by Autonomous Community. Annual variation rates

The annual rate of the IPRI decreased in November in 12 Autonomous Communities. The greatest decreases corresponded to Región de Murcia (1.9 points), Canarias (1.6 points) and Andalucía (1.5 points), stood their annual rates at 3.4%, 3.9% and 4.3%, respectively.

In turn, the Autonomous Communities that registered the greatest increases in their annual rates were Cantabria (0.6%), Aragón (2.4%) and Castilla y León (3.9%), where they increased more than one tenth, six tenths and four tenths, respectively.
