

02 August 2023

Total Expenditure Survey
June 2023. Provisional data

Total expenditure by international tourists visiting Spain stood by 10,606 million, 17.5% more than in June 2022

Average daily expenditure increased by 7.9% and stood at 188 euros

Total expenditure made by international tourists visiting Spain in June reached 10,606 million euros, representing an increase of 17.5% as compared to the same month of 2022. This figure stood by 9.5% more than in the same month of 2019.

The average expenditure per tourist stood at 1,275 euros, with an annual increase of 5.9%. On the other hand, the average daily expenditure increased by 7.9%, up to 188 euros.

The average stay by international tourists was 6.8 days, 0.1 less days than in June 2022.

During the first six months of 2023 the total expenditure by international tourists increased by 28.3%, as compared with the same period of the previous year, reaching 46,011 million euros.

The expenditure of this accumulated figure stood by 14.3% more, comparing with the same period in 2019, before the pandemic.

Annual variation rate of total international tourist expenditure
Percentage

Sending countries

The main sending countries, in terms of level of expenditure in June were United Kingdom (accounting for 20.7 of the total), Germany (12.2%) and France (7.1%).

Expenditure by tourists from United Kingdom increased by 12.5% in the annual rate, by those from Germany by 3.3% and by those from France by 17.2%.

International tourist expenditure by country of residence

	June 2023							
	Total expenditure (millions of €)	Annual variation (%)	Average expenditure by tourists (€)	Annual variation (%)	Daily average expenditure (€)	Annual variation (%)	Average duration of the trips	Annual variation (%)

Review and update of data

The data published today is provisional and will be revised March next year. These results are available at INEBase.

¹ A stopover refers to each overnight stay made during the trip. A trip may have as many stopovers as intermediate destinations where the traveler has stayed at least one night.

Methodological note

The main objective of the Tourist Expenditure Survey (EGATUR) is to obtain monthly information on the tourist expenditure made by non-residents in Spain in their trips to our country.

For the preparation of EGATUR the international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed.

Type of operation: continuous monthly statistics.

Population scope: this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

Geographical scope: the entire national territory. The sample is collected at the main access points for non-resident travelers (road, airport, port and rail).

Reference period of the results: the month.

Sample size: The theoretical annual sample size of EGATUR exceeds 127,000 surveys, which are distributed throughout the year according to the seasonality of the flow of passengers and to the sample design, which is defined for each access road independently, setting a fraction of the sub-sampling from the FRONTUR sample.

Type of sampling: Single stage, where the estimates of the FRONTUR survey are used as the target population to which the EGATUR data are elevated.

Collection method: personal interviews when the traveler leaves Spain.

A more complete tabulation plan with the main series of aggregates, as well as the microdata file for the reference month, is available on the INE website.

For more information you can access the methodology at:
